Protective factors for Subjective Cognitive Decline Individuals: Trajectories and changes in a longitudinal study with Italian elderly

Sara Mondini, Veronica Pucci, Sonia Montemurro & Raffaella Ida Rumiati

Supplementary Table 1 shows the changing profiles of participants over time. In the Declining group, but not in the Resistant group, the participants' profiles worsened. At T2, 434 participants (79.9% of the total) were Declining and 109 participants (20.1% of the total) were Resistant. At T3, 104 participants (83,2% of the total) were Declining and 21 (16,8% of the total) were Resistant.

Number of participants	From T1 to T2		Number of participants	From T2 to T3	
434	<i>Declining</i>		104	<i>Declining</i>	
13	SCD	MildND	7	SCD	MildND
13	SCD	MajorND	6	SCD	MajorND
74	MildND	MajorND	30	MildND	MajorND
302	MajorND	MajorND	61	MajorND	MajorND
109	<i>Resistant</i>		21	<i>Resistant</i>	
35	SCD	SCD	7	SCD	SCD
52	MildND	MildND	8	MildND	MildND
18	MildND	SCD	6	MildND	SCD
543	<i>Total</i>		125	<i>Total</i>	

Supplementary Table 1 shows the changing profile of participants from T1 to T2 among the total of 543 participants who had a second assessment (T2) and from T2 and T3 among the 125 participants who underwent a third assessment (T3).
