

## **Supplementary Material**

Oral anticoagulants in the oldest old with recent stroke and atrial fibrillation

Polymeris et al

### **Table of Contents**

Supplementary Table 1. Participating cohort studies .....	1
Supplementary Table 2. Cox proportional cause-specific hazards models for time to recurrent ischemic stroke, intracranial hemorrhage and death, accounting for competing risks .....	2
Supplementary Table 3. Net clinical benefit of DOAC over VKA .....	3
Supplementary Table 4. Cox models for time to composite outcome using age dichotomized at 90 years .....	4
Supplementary Table 5. Complete list of investigators of the cohort studies that contributed patients to this analysis .....	5

**Supplementary Table 1.** Participating cohort studies

Cohort study	Study period	Number of patients contributed to the final pooled cohort in this study	Median follow-up (days)
<b>Single-center</b>			
NOACISP-LONGTERM*	2012 – 2019	798	717
Erlangen Registry*	2011 – 2013 2016 – 2019	1,174	107
Verona Registry	2013 – 2015	222	90
<b>Multicenter</b>			
CROMIS-2	2011 – 2015	1,245	786
RAF	2012 – 2014	553	90
RAF-DOAC	2014 – 2016	868	90
SAMURAI-NVAF	2011 – 2014	1,124	717

\* The datasets of these ongoing studies were updated since the initial data pooling (Seiffge et al. Ann Neurol 2019) to include additional patients with index event up to December 31<sup>st</sup>, 2019.

**Supplementary Table 2.** Cox proportional cause-specific hazards models for time to recurrent ischemic stroke, intracranial hemorrhage and death, accounting for competing risks

Model (N = 5,984)	Variable	Recurrent ischemic stroke			Intracranial hemorrhage			All-cause death		
		Hazard ratio	95 % confidence interval	p-value	Hazard ratio	95 % confidence interval	p-value	Hazard ratio	95 % confidence interval	p-value
simple model	DOAC (vs. VKA)	0.90	[0.67, 1.20]	0.463	0.38	[0.20, 0.72]	0.003	0.72	[0.60, 0.88]	<0.001
	Age <85 years (vs. ≥85 years)	0.83	[0.63, 1.10]	0.193	0.78	[0.45, 1.37]	0.391	0.34	[0.29, 0.39]	<0.001
simple model with interaction term	DOAC (vs. VKA)	0.87	[0.53, 1.44]	0.591	0.60	[0.22, 1.69]	0.334	0.61	[0.47, 0.79]	<0.001
	Age <85 years (vs. ≥85 years)	0.82	[0.54, 1.22]	0.323	1.01	[0.48, 2.12]	0.988	0.29	[0.23, 0.36]	<0.001
	Interaction OAC by age	1.04	[0.60, 1.81]	0.885	0.53	[0.17, 1.66]	0.277	1.36	[1.00, 1.86]	0.054
adjusted model* with interaction term	DOAC (vs. VKA)	0.90	[0.55, 1.50]	0.692	0.58	[0.21, 1.63]	0.303	0.66	[0.51, 0.86]	0.002
	Age <85 years (vs. ≥85 years)	0.85	[0.57, 1.29]	0.449	0.91	[0.43, 1.95]	0.814	0.29	[0.23, 0.36]	<0.001
