# Supplementary Table 2: Full list of 941 original questions submitted in survey 1. 743 unanswered, 49 answered, 149 out of scope.

No. of questi	The 743 unanswered questions
ons	
1	What are the underlying genetic and physiological causes of obesity?
2	Further research on deepening understanding of factors which influence obesity on an individual basis (psychological, biological,
	genetic, etc.).
3	Connection between underlying health issues/genes/metabolic rates that may cause Obesity.
4	How much is obesity controlled by genetics, physiology etc. as opposed to a person's free will?
5	What are the underlying mechanisms for the journey to Obesity?
6	What factors are involved in weight related concerns - i.e. psychological/psychosocial/physical/environmental? And which of these
_	play a bigger part in obesity?
<del>7</del>	What are the social factors that contribute to obesity- and how can they be supported?  What are the social* and power montal determinants of obesity/body weight? **this includes how cocial policies influence incidence.
9	What are the social* and environmental determinants of obesity/body-weight? *this includes how social policies influence incidence How do we tackle the upstream determinants of diet and physical activity related to obesity?
10	
11	Fully understanding the reasons for obesity and factors with achieving weight loss.  What causes you to be obese or what do you think causes obesity?
12	What factors have influenced my weight gain?
13	Why do we gain weight?
14	What is the root cause of obesity and T2 diabetes?
15	What other than food affects your weight gain/loss?
16	What causes Obesity
17	How do genetics affect obesity?
18	My family has hereditary obesity issues. Will that affect me certainly?
19	Why do people become obese? Is it genetic? Is it just over eating?
20	What is the effect of genetics on body weight and on what BMI percentile somebody will fall in?
21	Research into is obesity passed from one from parents?
	How can we combat the genetic component contributing to obesity-desire to eat/appetite, less ability to feel satisfied with food,
22	preference for high calorie food?
23	Is obesity hereditary?
24	Is weight gain hereditary?
25	Is obesity hereditary?
26	I would like to know if genetics play a part.
27	Is obesity genetic? Can anything be done to prevent it?
	How true is the public belief that they are predisposed to be overweight - the broad sweep statement that genetic factors are to blame
28	for a huge proportion of the weight issues observed
29	Do genetics play a big part in obesity?
30	Are there inherited factors to obesity?
31	Is obesity genetic
32	How big a role does genetics play in familial obesity?
33	Why can some people eat what they want yet others put on weight when they do the same
34	What are the direct effects / mechanisms of poverty in relation to obesity
	What are the impacts of poverty and socioeconomic status on health; on body weight; and on health related stigma? What policy
	decisions could effectively address and reduce the health disparity and life expectancy disparity between richer and poorer
35	communities in Britain?
36	What are the key drivers in SES disparities regarding overweight/obesity?
37	What is the relationship between poverty and obesity?
38	Why are people from a lower socio-economic background more likely to have overweight or to be obese?
39	Is there a link with peoples income and them being overweight
40	Why is it that some people can eat what they like n not put on weight yet I only have to look at food and the scales go up.
	How true is the public belief that they are predisposed to be overweight - the broad sweep statement that genetic factors are to blame
28	for a huge proportion of the weight issues observed
29	Do genetics play a big part in obesity?
30	30. Are there inherited factors to obesity?
31	Is obesity genetic
32	How big a role does genetics play in familial obesity?
33	Why can some people eat what they want yet others put on weight when they do the same
34	What are the direct effects / mechanisms of poverty in relation to obesity
	What are the impacts of poverty and socioeconomic status on health; on bodyweight; and on health related stigma? What policy
	decisions could effectively address and reduce the health disparity and life expectancy disparity between richer and poorer
35	communities in Britain?

What is the relationship between poverty and obesity?  What is the relationship between poverty and obesity?  Why are people from a lower socio-economic background more likely to have overweight or to be obese?  Is there a link with peoples income and them being overweight  Why is it that some people can eat what they like n not put on weight yet I only have to look at food and the scales go up.  Why we falter/fail when we know weight loss is beneficial  Why do some people gain weight when others do not when consuming similar calories?  Why do some people get fat and others don't  Why do some people gain weight and others don't on the same diet?  Causes of obesity  Why do some patients manage to keep significant weight loss off and yet others don't? Is it because of where their set point is genetic/epigenetic, or environmental or is it behavioural/psychological differences.	
38 Why are people from a lower socio-economic background more likely to have overweight or to be obese? 39 Is there a link with peoples income and them being overweight 40 Why is it that some people can eat what they like n not put on weight yet I only have to look at food and the scales go up. 41 Why we falter/fail when we know weight loss is beneficial 42 Why do some people gain weight when others do not when consuming similar calories? 43 Why do some people get fat and others don't 44 Why do some people gain weight and others don't on the same diet? 45 Causes of obesity 46 Why do some patients manage to keep significant weight loss off and yet others don't? Is it because of where their set point is genetic/epigenetic, or environmental or is it behavioural/psychological differences.	
Is there a link with peoples income and them being overweight  Why is it that some people can eat what they like n not put on weight yet I only have to look at food and the scales go up.  Why we falter/fail when we know weight loss is beneficial  Why do some people gain weight when others do not when consuming similar calories?  Why do some people get fat and others don't  Why do some people gain weight and others don't on the same diet?  Causes of obesity  Why do some patients manage to keep significant weight loss off and yet others don't? Is it because of where their set point is genetic/epigenetic, or environmental or is it behavioural/psychological differences.	
Why is it that some people can eat what they like n not put on weight yet I only have to look at food and the scales go up.  Why we falter/fail when we know weight loss is beneficial  Why do some people gain weight when others do not when consuming similar calories?  Why do some people get fat and others don't  Why do some people gain weight and others don't on the same diet?  Causes of obesity  Why do some patients manage to keep significant weight loss off and yet others don't? Is it because of where their set point is genetic/epigenetic, or environmental or is it behavioural/psychological differences.	
40 Why is it that some people can eat what they like n not put on weight yet I only have to look at food and the scales go up. 41 Why we falter/fail when we know weight loss is beneficial 42 Why do some people gain weight when others do not when consuming similar calories? 43 Why do some people get fat and others don't 44 Why do some people gain weight and others don't on the same diet? 45 Causes of obesity 46 Why do some patients manage to keep significant weight loss off and yet others don't? Is it because of where their set point is genetic/epigenetic, or environmental or is it behavioural/psychological differences.	
41 Why we falter/fail when we know weight loss is beneficial 42 Why do some people gain weight when others do not when consuming similar calories? 43 Why do some people get fat and others don't 44 Why do some people gain weight and others don't on the same diet? 45 Causes of obesity Why do some patients manage to keep significant weight loss off and yet others don't? Is it because of where their set point is genetic/epigenetic, or environmental or is it behavioural/psychological differences.	
42 Why do some people gain weight when others do not when consuming similar calories? 43 Why do some people get fat and others don't 44 Why do some people gain weight and others don't on the same diet? 45 Causes of obesity Why do some patients manage to keep significant weight loss off and yet others don't? Is it because of where their set point is genetic/epigenetic, or environmental or is it behavioural/psychological differences.	
43 Why do some people get fat and others don't 44 Why do some people gain weight and others don't on the same diet? 45 Causes of obesity Why do some patients manage to keep significant weight loss off and yet others don't? Is it because of where their set point is genetic/epigenetic, or environmental or is it behavioural/psychological differences.	
44 Why do some people gain weight and others don't on the same diet? 45 Causes of obesity Why do some patients manage to keep significant weight loss off and yet others don't? Is it because of where their set point is genetic/epigenetic, or environmental or is it behavioural/psychological differences.	
45 Causes of obesity Why do some patients manage to keep significant weight loss off and yet others don't? Is it because of where their set point is genetic/epigenetic, or environmental or is it behavioural/psychological differences.	
Why do some patients manage to keep significant weight loss off and yet others don't? Is it because of where their set point is genetic/epigenetic, or environmental or is it behavioural/psychological differences.	
46 genetic/epigenetic, or environmental or is it behavioural/psychological differences.	
	? Is it
47 Who is most likely to recover from a bacity, how and why?	
47 Who is most likely to recover from obesity, how and why?	
48 Why some people don't put on weight even eating unhealthy and excessive food?	
49 Why people in one family on much the same diet vary so much in weight?	
50 Why can't some people lose weight?	
51 are some people more prone to obesity, if so why	
Which people with obesity will have a good response to behavioural weight management and which will need drugs or surger	yto lose
52 weight?	
53 What subgroups of people with obesity respond differently to different behavioural interventions?	
Why is weight loss maintenances o hard? [I am a serial offender. Have lost 3stones+at least 3 times in my life (one of those w	as 5st)
54 and 2stones+at least twice.]	
55 Why is it so hard to keep weight off after you lose it? [I've dieted many times and lost a lot of weight.]	
56 Why do those empty fat cells shout 'feed me!' for at least 3 years after weight loss? Can anything be done to shut them up qui	cker??
57 Is the rise in obesity in the general public genetic or a learned pattern of behaviour	
58 How much of an individual's weight is due to lifestyle factors, and how much is due to genetics?	
59 How much of an effect is genetics and how much is environmental	
How much of an impact does the environment have on an individual's weight (e.g. family circumstances, education, SES, available of the control of the contro	b ility and
access to food), and is there anything that can be done to change this (government policies, retailer interventions, school food	policies)
61 Why are certain ethnicities at a disproportionate risk?	
62 Can we develop predictors of outcomes that can aid personalising treatment approaches?	
63 What are predictors of weight loss success for a specific dietary or physical activity intervention?	
64 What leads of healthy and unhealthy weight gain in children?	
65 How can we make interventions close rather than widen gaps in deprived populations	
Can we assess the cause of people's weight gain by simple questionnaire in order to target the most appropriate intervention?	
example, those who are overweight would need different action, depending on whether the main contributor is a health cond	ition
(physical or mental), lack of exercise, financial constraints, making it difficult to buy healthy and filling food at low cost, busy

	What can behavioural insights tell us about working to change the obesogenic environment? How can this complement the whole
213	systems approach to obesity work?  How to change the environment so to make it less obesogenic e.g. fast food shops
214	How can we effectively change the obesogenic environment to promote a doption and maintenance of healthier diet and physical
215	activity habits?
216	What specific strategies help to a void temptation in an environment filled with food cues?
217	How does the obesogenic environment directly affect obesity rates?
218	Why, despite public awareness are there so many fast food outlets?
219	How can we change the behaviour of policy makers / town planners to restructure the obesogenic environment?
220	What is the impact of policies looking to change the built environment?
221	Implementation of healthy planning/ obesogenic environment
222	How can we change the environment to help prevent obesity? Should we implement more taxes, reduce advertising or do more?
223	How can we make environments less obesogenic?  Governance of food environment-thinking in systems
225	How can we adapt our environment to encourage less sedentary behaviour (through town planning/workplace policies/nudges etc.)?
223	Whether is it possible to navigate the obesogenic environment without gaining weight or whether the obesogenic environment is has to
226	change?
227	What do we need to change in the environment to support people to have a health weight?
	Which health policies that target the obesogenic environment (e.g. town planning, advertising restrictions, taxation) are most effective
228	at reaching low socio-economic groups?
229	The obesogenic environment is a fairly new development, so why can't it be designed a way again?
230	The impact on neighbourhoods built to promote active lifestyles on obesity and prevention of obesity.
231	How can better urban planning actually be implemented?  Modification of food environment
233	What makes people remain a healthy weight in an obesogenic environment?
234	How do we best prevent obesity in the first place; and how do we best lose weight over time if we have a few extra pounds?
235	How obesity can be *prevented*, rather than cured.
236	How to take sufficient, & sustainable preventative measures soon enough in a life to combat obesity
237	How to treat obesity and prevent it
238	What is best way to prevent, is it to never be obese or to fight it later?
239	Have any governments taken effective steps to tackle obesity, and could we learn from this?
240	What kind of public health promotion programmes and campaigns should governments be promoting/investing in?
241	More research into how other countries are managing to avoid having the same proportions of their population as overweight or obese.
242	What policy interventions can influence either obesity or other health outcomes related to obesity?  What kind of public policy changes are effective at helping people lose weight (e.g., traffic light labelling, calorie counts)?
244	What societal changes could be implemented easily / cheaply / at a local level - that would help reduce obesity
245	What community intervention strategies are successful for promoting weight loss in obese populations?
246	Do we have good evidence for community-based weight loss and management interventions?
247	What are the effects of population level or systems level interventions?
248	Is a wider public health rather than a targeted approach better of best used at the same time
249	How can we apply obesity prevention strategies at the population level?
250	What has research shown about if it is easier / cheaper to prevent obesity related diseases?
251	Early screening and intervention. Let's get creative, appropriate, and effective - what works?
252	Why doesn't medical intervention via paid subscription to a club or group start at 15% overweight, when it's still possible to see results
232	and do ever ice incread of waiting until 100% to overweight, when ever ice is impossible and loss so slow you ever see any end to dieting
	and do exercise instead of waiting until 100%+ overweight, when exercise is impossible and loss so slow you ever see any end to dieting  What is the impact of the development and implementation of national food policies to support healthy weight in public settings such
253	and do exercise instead of waiting until 100%+ overweight, when exercise is impossible and loss so slow you ever see any end to dieting  What is the impact of the development and implementation of national food policies to support healthy weight in public settings such as schools and hospitals?
253 254	What is the impact of the development and implementation of national food policies to support healthy weight in public settings such
	What is the impact of the development and implementation of national food policies to support healthy weight in public settings such as schools and hospitals?
254 255 256	What is the impact of the development and implementation of national food policies to support healthy weight in public settings such as schools and hospitals?  What influence does fast food advertising have on children obesity?  Should the government put heavy taxes on unhealthy processed food/drinks and heavily subsidise healthy organic whole food/drinks?  What is the impact of increasing sugar tax or other legislation to encourage healthier eating
254 255 256 257	What is the impact of the development and implementation of national food policies to support healthy weight in public settings such as schools and hospitals?  What influence does fast food advertising have on children obesity?  Should the government put heavy taxes on unhealthy processed food/drinks and heavily subsidise healthy organic whole food/drinks?  What is the impact of increasing sugar tax or other legislation to encourage healthier eating  How important are things like the sugar tax and food labelling in the prevention of obesity?

274	Is active travel possible in both cities and rural areas?
275	What impact does active commute really have on weight loss?
276	How can we increase levels of physical activity for those working long hours where being sedentary is largely unavoidable?
277	Should employers provide be nefits for staff e.g. gym membership discounts, walk/cycle to workschemes? How could this be fund ed?
278	What do people think about using standing desks at work? What would help motivate obese people to use a standing desk?
	Do employers have an obligation to a ctively promote healthy lifestyles within the workplace to help employees with diet and o besity?
279	Would this have an impact on a bsence levels and improve employee performance and engagement.
280	What more can employers do to help employees keep to a healthy weight?
281	How to fit exercise into your week
282	How can I add some exercise to my life?
283	What is the obstacles for people that stop them getting some physical activity
284	Why do obese people feel it is not possible to exercise? How can we make this very acceptable and a pplauded?
285	What could be done to encourage obese people to increase their physical activity?
286	Populations could include parents for school active travel, or a dults travelling to work.
200	
207	Whilst exercise causes us to produce endorphins our response to this varies from person to person, does having a lower respon se make
287	us more susceptible to putting on weight and less likely to exercise?
288	How does people's perceptions of air quality influence the likelihood of active travel?
289	Reduction in amount of activities
290	Do you get out of puff (short of breath) when you walk?
291	The importance of fitness/physical activity when overweight/obese
292	How can I better judge how many calories are burned by exercising?
293	How can we develop objective tracking of energy balance
	Is there a phone app that can be used to photograph a person's plate / food that would provide information on the calorific and
	nutritional value of the food and inform the person when they had reached their daily recommended allowance. This allowance would
294	be tailored to the individual in terms of age, sex, levels of activity and other health information.
	Is there such a thing as an app which can accurately tell user what the calories are in a meal/drink, perhaps by using camera on phone
295	and specific bowl/plate sizes (it can be very complicated if you have to input calories all the time)
	Many interventions focus on changing people's diets, but it is hard to measure what has changed without using long & detailed
	questionnaires or apps that often result in inaccurate results. Is there a way to measure diet quality that can easily be applied in clinical
296	/ research settings?
297	Do you lose more weight if you exercise or not?
298	Why do people think moderate amounts of exercise creates weight loss
299	Is there enough emphasis on combining healthy eating and exercise and a way of combating obesity rather than purely dieting?
300	How important is exercise in weight loss?
301	Is calorie controlling best way to control weight?
302	What is the best combination of dietary and physical activity strategies to maximize weight outcomes and appetite?
303	What is the best form of exercise to lose weight?
304	what is the most efficient exercise to lose weight
305	Most effective exercise
306	What types of sport contribute to a reduction in obesity for those that don't regularly play or do sports.
307	What kind of exercise do I need to do and how often to lose weight?
308	Best forms of physical activity for weight loss/maintenance
	What are the health risks of being overweight/obese but physically active? Does being physically active despite being overweight
309	reduce disease risks of being overweight?
	To what degree is higher weight due to more muscle OK vs higher weight due to more fat? Basically is it alright be to slightly overweight
310	ifit's 'all muscle'?
311	How can we widen access to effective weight loss support services for people affected by obesity?
	Does regional variation in provision of obesity services have a positive or negative correlate with regional prevalence of - and
312	trajectories in-obesity

328 329 330	How to engage health service staff in recognising and supporting weight problems
	What interventions are realistically delivered within the current NHS models of care e.g. nursing chronic disease reviews? How simple
330	$interventions \ or \ clinician \ training \ might \ impact. \ More \ of a \ focus \ on \ 1:1 \ interventions \ as \ well \ as \ Public \ health \ interventions.$
	What strategies can be used by GPs to promote physical activity in obese people?
331	Do doctors have the information they need to help all weight related issues?
	What is the baseline knowledge regarding what a healthy diet consists of in the population? Then look at sub-groups e.g. age groups,
222	depressed, diabetes etc. Also research what doctors knowledge is of healthy eating AND how important it is to health, how much they
332 333	feel confident to discuss this with patients or have time to.
334	How confident are health professionals when raising the issue of weight, and what is their current skill level to have these conversations  How can health professionals be more effectively utilised to support behaviour change conversations during routine interactions
335	Consultation skills: confidence and capabilities of health care professionals in raising the issue in any points of contacts
333	Training and education requirements of different healthcare professionals to advice on nutrition on diet the role of pharmacists in
336	weight and obesity management (Split-rest of question used in two other sections)
330	How can we support implementation of obesity guidelines such that very person with obesity is offered significant support to reduce
337	their weight with an acceptable chance of it working?
338	Is weight loss through diet or surgery of benefit for patients with type 1 diabetes?
339	Is weight loss surgery a good option for the severely obese, or would lifestyle changes/diet effect a similar long-term result?
340	Should the threshold for consideration bariatric surgery be lowered?
341	Is there any medication than can control appetite and suppress urges that is safe
342	Is there an effective satiety-inducing drug or other intervention?
343	About the design of drugs for obesity, should it focus on drugs for weight loss or should it focus on drugs not to recover lost weight?
344	Where do medications fit in the treatment pathway?
345	Design of a new obesity measure a part from BMI.
	A new 'BMI' i.e. we know that BMI is often not relevant. Would be great to come up with a new 'scoring' system related to risk with
346	weight
347	Why is BMI still used as an indication of healthy weight?
348	Is the BMI a good guide to healthy weight?
349	Why is BMI still used to define obesity?
350	With BMI being the crux of determining whether a person is overweight or not - is this notion now somewhat outdated?
351 352	Is BMI a reliable indicator of obesity, or not?  Why obesity seems somehow to be related to height but not frame size
353	To produce a betterversion of a weight measure than BMI
354	What better ways are there to assess weight other than BMI?
355	Accurate diagnostic criteria for obesity
356	Is our definition of obesity accurate
357	How accurate is a BMI as a guide to health if you are not an average body type?
358	What is the best way to estimate someone's healthy weight?
	When will a more appropriate classification of obesity be made, focusing on the origin of the disease, which is necessary for a better
359	treatment?
360	Is the BMI an appropriate way to decide if you're overweight for everybody, e.g., for BAME people?
361	How do I tell if I am a TOFI - Thin on Outside, Fat on Inside (i.e. around vital organs). I might be thin looking but have hidden fat issues.
	The role of visceral fat [We are becoming increasingly aware that you can be 'skinny' but still unhealthy with regards to general health
362	with high a mounts of visceral fat.]
363	Clothing size could be used as a measure of weight.
364	What are the body composition changes post-bariatric surgery with and without weight resistance exercise?
365	What is the best, simple measure of adiposity in children?
266	Why is poor quality (highly processed) food so much cheaper than fresh/healthy food and how to get consumers to appreciate the
366	health implications of each?  How can we make whole nutritious food more accessible and affordable than heavily processed foods?
367	What parts of the global food system are tending to increase the availability of unhealthy foods and what can be done to reverse these
368	tendencies?
369	The effect on obesity if healthy food were cheaper and not healthy were very expensive
370	Decrease price of fresh food to enable people on low budget to stop eating processed foods.
<del></del>	Changing the environment in supermarkets and high streets - how can these organisations be motivated to improve quality of food
371	choices
3,1	How can we make healthier food more accessible, attractive and convenient?
372	The effect of the availability of various foods on eating choices and how the current system encourages or discourages the production
	The effect of the availability of various loods offeating choices and how the current system efficial ages of discoulages the production

What is the rate of eating disordered behaviour in people with obesity, particularly those who repeatedly try to lose weight What percentage of people are overweight because of disordered eating (I.e. mental health)?		
What percentage of people are overweight because of disordered eating (I.e. mental health)?		
435 The calorific values of food. how can we accurately assess the amount we eat		
	435	The calorific values of food. how can we accurately assess the amount we eat

436	Long term efficiency: Restrictive diets or permissive?
	Is 'positive' messaging about dietary change (e.g. eat more fruit and veg, eat more fibre) more effective at maintaining a healthy weight
437	than 'negative' messaging (e.g. eat less, fat, sugar, high calorie foods)?
438	How much weight and how fast is it lost using time-restricted eating?
439	Will intermittent fasting stop obesity
440	Fasting and if that helps lose weight and maintain it.
441	Does intermittent fasting work better than calorie restriction on its own?
442	Is intermittent fasting a good idea?
443	Is the intermittent fasting a truly healthy lifestyle to adopt?
444	Is intermittent dieting/fasting good for health beyond weight loss
445	Us fasting bad for your body? Either by restricting calories 2 days a week or eating in a 8 hour window
446 447	What thoughts on keto intermittent fasting  Do you know if you want to lose weight you should do intermittent fasting and you shouldn't eat carbohydrates?
447	How important is the timing of when you eat and what you eat?
449	The best hours (or routines) to eat.
450	How important is the practice of restricted time eating to weight control, metabolic health and well being
451	What is the impact of meal timing on weight, appetite and metabolic outcomes?
452	Late night eating (NE)
732	What foods should I avoid to help lose weight? [Should I be eating more protein after doing exercise and less carbs. it is quite
453	confusing.]
454	Does the time between last meal at night and breakfast, the first meal in the morning have an effect on weight?
455	Is okay to skip breakfast?
456	What impact does workhours (shifts / etc.) have on weight?
457	Which is better for weight loss, the traditional 3 meals a day or snacking throughout the day?
	Is there really a difference between the different diets you read about in terms of diabetes remission? Can you get the same benefits
458	with weightloss by any means?
See	Insulin resistance and its role in weight gain and obesity (rest of question used in two other sections)
336	
459	Are you aware of the role insulin plays in the storage of fat?
460	What other health conditions are directly impacted by obesity, as opposed to correlating with obesity?
461	Are fat cells created after puberty?
	In the UK the shape of women's bodies has undergone a drastic change over the past couple of decades. What are the underlying
462	causes, can we identify the people group, and how can we help reverse this?
463	Underlying issues when it comes to why people eat too much and or choose the wrong foods?
464	Look at why we eat from an environmental and behaviour perspective
465	Does my emotional state influences my overeating?
466	Are overeating behaviours linked to emotional states? Do we eat more when happy or sad?  How can I disassociate eating from how I am feeling?
467 468	Research into eating habits and mood swings, i.e. when do they binge. Trigger points.
469	Mental mind set how is this managed?
403	What is lacking (physically, emotionally or psychologically) when someone overeats and can we be taught to obtain this from another
470	source?
471	Why are some people unable to not or stop eating foods they know are bad for their health?
472	Best methods to suppress appetites
473	How is the "I'm full now - you can stop eating" response triggered?
474	Should we start our weight management by sleeping more?
475	What happens in the brain during weight regain?
476	What parts of the brain can we turn off to control the addiction?
	Is there an answer in neuroscience that actually physically disable the part of the brain responsible for the addiction? We do don't
	become addicted to alcohol / drugs etc. so young because we are not exposed to them, but we are exposed to food, and the pattern is
477	set.
478	Impact of Autism on eating patterns
	Does stomach muscles have a direct link to satiety? If you have loose stomach muscles due to pregnancy, will you not feel full how
479	much ever you eat
480	Energy Requirements for pre and post bariatric patients at various stages after surgery (e.g. 6mo, 12 mo, 18mo, 24mo)?
404	How do changes in body weight and composition influence the energy balance behaviours that may undermine weight management
481	interventions  Diagnostic algorithm for cardiovascular risk stratification in nations with obesity
482	Diagnostic algorithm for cardiovascular risk stratification in patients with obesity  How much does the microbiome affect absorption and which foods (if any) can keep it at its optimal level
484	The mechanism behind the effect of the gut microbiome in obesity development.
404	To look at the microbiome of level 3 weight management services and see if they carry particular obesity genes and to see what the
485	diversity of their gut microbes look like.
486	How does the microbiome influence body habitus - using metagenomics could contribute to this question
487	Can faecal transplant impact weight
488	Does healthy bacteria in the intestines affect /reduce weight gain?
489	Can improving gut hacterial alongside dietary/exercise interventions help increase weight loss and maintain weight loss?
489	Can improving gut bacterial alongside dietary/ exercise interventions help increase weight loss and maintain weight loss?  How can we change our gut microhiome to help maintain a healthy weight
489 490 491	Can improving gut bacterial alongside dietary/ exercise interventions help increase weight loss and maintain weight loss?  How can we change our gut microbiome to help maintain a healthy weight  The best forms of pre- and pro-biotics to improve health and facilitate weight loss.

492	What effect does GOS supplementation happen on the adverse outcomes of obesity
493	Can Obesity cause or contribute to Cancer and Dementia?
494	To explore the relationship between the over-consumption of antibiotics and the increase in obesity.
495	Can some antide pressant meds cause weight gain;
496	Which, and by how much, do prescribed medications adversely affect the patients weight?
497	Impact of medications on obesity
498	What is the best way to don't put weight while taking sertraline?
498	The effect of obesity on other health issues including dementia, arthritis etc.
	,
500	Does losing weight reduce the risk of cancer and how much weight do you need to lose
501	Does weight loss reduce risk of heart failure in people with known heart failure?
502	Do patients with mild/moderate heart failure benefit from weight loss interventions?
503	Do obese people have more digestive problems than normal weight people?
504	Weight loss plan for those with IBS and Diverticulitis and gluten intolerance

	Can we improve coded weight/height/BMI data for children in the GP record? I have an interest in Childhood obesity and would be
	interested in considering process that would help to code weight related data in the primary care record. There are currently over
	27,000 children aged 0-16yrs with registered GP practices in Oxford alone, of these only 19 children had recorded BMI >25, yet we know through NCMP data the prevalence of higher weight status far exceeds this, plus we know very few contacts with families through
604	current programmes for tackling this (e.g. 2019 NCMP only generated 4 referrals in Oxfordshire)
004	What are the current effects of the National Childhood Measurement Programme in terms of weight trajectories, health care usage,
605	and mental health?
606	Is NCMP fit for purpose if, as in many places, it is to become a screening programme/pathway into child weight management?
607	What are the repercussions of obesity in childhood, in later life?
608	Does obesity impact on children's long term educational outcomes?
609	Does obesity impact on children's long term life chances?
610	How does obesity impact on children's happiness, confidence and mental health?
611	To explore the relationship between adverse childhood events (ACES) and obesity at a population level.
612	The relationship between ACE and obesity (either childhood development or adult).
613	Did you have an easy/stress free childhood?
614	Do childhood or a dolescent negative events have an impact on unhealthy eating?
615	Is there a connection with mental trauma in childhood to obesity?
616	We need more research into the role of childhood trauma in causing obesity and / or weight related issues in a dulthood.
617	Childhood trauma and being morbidly obese
618	What treatments for obesity should be available to children/adolescents?
	What effective management options are there for paediatric obesity - who should people be referred to/supported by? And how widely
619	available/accessible are these currently?
see	Is there any improvement in the figures for schools which provide lunches/boarding schools? (First part of question answered see
748	748)
	[What efforts are being made to identify sugar/corn syrup/harmful additives content in food? Why are harmful vegetable oils still being
_	used, especially for take-outs? Can law be passed to embolden the content printing of harmful additives on containers?] How about
See	advertisements/ doing further checks on school meals. Jamie Oliver did some great ground work. We need follow up. ( <i>First part of</i>

	Why aren't people living with obesity given the same consideration as others with chronic diseases?
	Are overweight people less likely to receive appropriate health investigation as obesity is seen as causative first, rather than following
655 t	the same diagnostic route that you would immediately follow with a person whose weight is considered normal/acceptable?
١	Why are people who are obese not given the same access to healthcare? People who are obese are blocked from receiving NHS surgery
656 k	by virtue of their weigh. Why is the NHS discriminatory against obese people in the supply of surgical procedures?
657	Does obesity stigma influence healthcare professional referral practices
1	Is access to primary care compromised for people classified as overweight or obese because GPs tend to focus on that rather than the
658	concern/symptom the patient actually presented with?
E	Explore whether how all health care professionals are trained around obesity perpetuates weight stigma attitudes which are then
659 r	reflected in their delivery of care
660 \	What words used in a GP consultation influence a person's desire to change their eating habits? (Evidence based)
ŀ	How can GPs tackle consultations regarding weight loss in the most sensitive manner? Should the emphasis be on diet as opposed to
	weight at all?
662 A	Are you happy with your weight?
	l, as an individual, have been received as better thin than fat.
	Do current BMI bands and definitions make sense to the public?
	What forms our image of a healthy body and how can this be used to promote a healthy weight and how society be educated in what is
	a healthy body weight?
	Why is obesity accepted as a normand not treated as a serious problem?
	Is society's acceptance of obesity creating a feeling in the obese that it is okay to neglect yourself in the way?
	Is the body positivity movement ok? Is it ok to celebrate morbidly obese body shapes?
	What role does constant media talk of the obesity crisis or 'drain on NHS have on weight bias and perpetuating obesity?
	How does the internet, and specifically social media, affect the drive to eat?
	Does social media influence eating behaviours?
	What role has the media played in causing obese people to have low self-esteem?
	How much is obesity related to education and personal responsibility
	Why don't people who are obese make an effort to lose weight? Is it a lack of dietary understanding; poor motivation: or acceptance of
	their body image?
	Why do people continue to be obese, when we have plenty of evidence to tell people how not to be?
	Is it a mind-set problem that causes people to be obese and not deal with it?
	What role should personal responsibility play in obesity discussions?
	Why is there not more emphasis on personal responsibility when it comes to weight control?
	Why don't people take ownership of their own health practices

771	What evidence is there for the ways in which weight affect various disease processes?
772	What is the best why to avoid obesity related disease?
773	How much weight gain is permissible before I am at a risk of diseases?
774	What are the five most common health complications that arise from obesity.
775	How does weight impact on chronic illness and function?
776 777	What is the link between obesity and illness/disability?  Related medical condition
777	relationship between obesity and longevity - and is there a genetic tendency to obesity
779	Genetically are we becoming inbred?
780	what are risks relating to gastric band
781	What single change would make the biggest difference to weight loss
782	What is the best second line treatment for late gastric dumping post surgery?
783	Failure of procedure
784	Complications of procedure
785	Are psychological interventions being offered routinely within weight management services in the UK?
786	How does stigma around weight and obesity contribute to difficulties initiating weight loss?
787	What impact does weights tigma have on those trying to lose weight?
788	How mental attitudes impact on people's a bility to lose weight
789	Weight stigma and the experience of the overweight/obese
790	Weight-based stigma in healthcare professionals: how this impacts people's ability to lose weight
791	What is the correlation of certain amount of physical activity (run, walk, etc.) with the calories we burn?  Would psychological counselling regarding eating behaviours make people more likely to loose weight and maintain it?
792	
	149 out of scope submissions (15.8% of all submitted questions): out of scope / not a
	research question / too broad / not obesity related / opinion based / unclear/ unclear
	but similar question in included research question above.
	but similar question in included research question above.
793	What is your correct weight bearing in mind BMI
794	How do I find out what is normal and healthy for my age and gender?
795	How is obesity measured?
796	Why do you think you are overweight?
797	Should obesity be considered a disease?
798	Staging of obesity
799	What is Obesity? Specific definition and subtypes.
800	How to encourage Healthy meals uptake in school settings.
801	How much damage to our bodies and how they work do fad diets actually a chieve? Are we not just chasing an expectation that do esn't
	exist?
802	How to navigate and choose the best diet type?
803	Do you know the three macronutrients?
804	How can I get past health information on food products to understand what is bad in them, not just what is good?
805	healthydiet promotion and education
806	Why is sugar so freely available?
807	Why, as consumers, are we sold unhealthy food to eat? If trans-fatty acids are as bad for our health as is now being said why is the
	medical profession, the government and the authorities not informing people? Why are they not preventing the sale and banning the
	production of processed foods containing these s fats?
808	What are the corporate determinants of obesity/body-weight?
809	How do we get government to implement more effective policies regarding selling and producing unhealthy food etc.
810	How does obesity policy fit into wider public health policy?
811	When was the latest guidance on nutrition in obesity published and who recommended/reviewed it.
812	What is the current and best guidelines to use
813	How much natural, non-processed food do you eat?
814	The only downfall is the excess saggy skin Is it possible to be 'overweight' but still in good health?
815	Does a 'healthy' BMI a lways reflect healthy physiology? Can you be overweight and healthy?
816	Can one be healthy at any weight?
817	My parents are both type 2 diabetic, lifestyle-induced. Does this mean I am certain to be as well?
818	Do you have any medical / physical conditions
819	Should obesity be recognised as a disease?
820	Is it calories in and then exercise means calories out?
821	How can we bring more 'eating behaviours' interventions into standard practice?
822	Do we need to focus on body weight or risk factors/health?
823	Lap band had 12 years ago worked but broke last feb had removed had bypass in june in latvia at much expense dudnt work
824	will there be a mirade cure in the future?
825	Is there a "cure" for obesity?
826	What are the psychological contradictions for Bariatric Surgery?

827	Should there be more psychological assessment available for those with obesity other than those with diagnosed eaing disorders?
828	Post operative psychological advice is lacking. This is only open to specific individuals? Other than funding, why has this not be identified as an integral part of the bariatric process
829	Would psychological counselling regarding eating behaviours make people more likely to loose weight and maintain it? I am about to start a program of counselling as a pre requisite for bariatric surgery. I have also had experience with Overeaters Anonymous. I feel
	that half the battle when it comes to obesity is mental & emotional.
830	Can obesity now be labelled as an eating disorder as it is without a doubt disordered eating and results from many if the same complex
	psychological, emotional and behavioural issues as anorexia, bulimia etc and can have equally devastating results mentally and
024	physically.
831	Psychologically informed services, training etc
832	Do fat people need to feel bad about themselves?
833	Do you enjoy food
834	To ask the client how they think they would feel if they were able to lose weight and what they miss doing the most.
835	Do you require and emotional or psychological help or guidance?
836	Do you think you would be happier if you were not obese?
837	Are you happy with your size
838	Can increased metabolism rate means you can eat more food
839	How do you speed up your metabolism?
840	On a scale of 1 to 10 (with 10 being the happiest), how happy are you with your weight?
841	What would make it a 10?
842	What could we do to help you make it a 10?
843	What could you do to help you make it a 10?
844	What do you already understand about obesity and weight management?
845	to change diets and attitudes to food
846	Does shaming obese people really work
847	Why are the aids via drugs which are available in the USA ignored in the uk
848	Are there safe drugs available to treat the condition?
849	Is there a magic pill that you can take to lose weight?
850	What level / amount of physical activity / exercise do you undertake in an average week
851	What is you weekly routine in terms of "movement": how often do you exercise, do you walk to work - if yes how far, do you walk up
	the stairs or use the escalator and so on, if you have a dog, do you take it for a walk and how long are those, how busy is you after work
052	life: do you have to manage the kids or do you come home and sit in front of the TV.
852 853	Does the person do regular exercise to manage weight  Do you do any exercise?
854	What can we learn from the epidemiology of obesity to help in terms of prevention?
855	Do you think it's possible to lose weight and would you like help to lose your excess weight.
856	Why if you ever manage to lose weight, having wasted your life in fat, does the nhs refuse to assist with skin removal, thereby giving
030	you a body to be proud of instead of a grotesque thing to hide, which will inevitably be refilled
857	Do you know what services are available to support weight loss?
858	The type weight-loss programme that is suitable dependent upon size, age and physical health presentation. To reduce potential risk of injury, stroke or heart attack
859	Are researches into obesity funded bygovernment?
860	
000	I. Who should help patients lose weight? What is the evidence that things such as MECC actually works? Or should we leave it to

### Supplementary Table 3: 149 Unanswered re-phrased questions in rank order from survey 2

Rank	Re-phrased questions	Mean score (SD)
1	What are the most effective methods for weight maintenance following weight loss? What are the effective components of treatments/ programmes incorporating a behavioural element? How many and in what combination are most effective? What is the optimal duration of these programmes?	8.36 (1.87)
2	What is the cost and affordability of a healthy balanced diet? What policy measures could make healthier foods more affordable? What policy measures could improve access to healthy diets for different social and cultural groups, such as people in poverty, people in inner cities, or young and older people?	7.85 (2.06)
3	Does an intervention that focuses on improving overall health rather than a specific focus on weight loss improve health and wellbeing?	7.81 (2.25)
4	Does having a psychological disorder such as depression and anxiety affect weight, and, if so, what is the mechanism? How do external perceptions of weight affect mental health? What is the effect of weight loss methods and repeated dieting on mental health outcomes?	7.75 (2.03)
4	What are the most effective methods for weight loss? What are the effective components of treatments/ programmes incorporating a behavioural element? How many and in what combination are most effective? What is the optimal duration of these programmes?	7.75 (2.36)
6	What is the most effective and cost effective mix of population/public health and individual interventions to tackle obesity?	7.72 (2.26)
7	Do interventions (e.g. nutrition education and physical activity) in pre-school, primary school and secondary school reduce children's risk of unhealthy weight gain and, if so, how do they act? Does the effect of such interventions differ by social and cultural groups?	7.67 (2.22)
7	What are the drivers of food choice, appetite, and intake and do variations in these drivers explain who develops obesity and who does not?	7.67 (2.24)
9	What are the most effective ways to prompt people to make a weight loss attempt or engage with a weight loss support programme? What are the most effective methods to increase uptake and adherence to programmes?	7.65 (2.30)
10	How do demographic, social and cultural factors, e.g. age, socioeconomic status (SES), lifestyle, environment, psychosocial functioning affect weight status, weight gain and regional fat distribution? What are the mechanisms involved? Does the effectiveness of weight loss methods depend on social and cultural background and, if so, can the effects be made more equitable? Are weight loss methods tailored to people's background more effective for weight loss and weight maintenance than general methods?	7.59 (2.41)
11	Are people living with obesity at higher risk of infectious diseases? Are they at higher risk of severe consequences from these diseases? What are the proposed mechanisms?	7.54 (2.31)
=12	Is weight loss an effective treatment for certain medical conditions and chronicillnesses, e.g. polycystic ovary syndrome (PCOS), hypothyroidism, lipaedema, gastrointestinal conditions, heart failure, osteoarthritis, chronic pain etc? Should specific weight loss methods be recommended for people with overweight and obesity with certain medical conditions and chronicillnesses?	7.53 (2.40)
=12	Do parents' attitudes to food influence their children's food intake and risk of obesity?	7.53 (2.35)
=12	Does the quality or amount of sleep influence bodyweight? Do interventions that increase/ decrease sleep affect weight loss and weight maintenance?	7.50 (2.15)
=12	In people living with overweight and type 2 diabetes, does losing weight lead to diabetes remission and how long does remission last? What health checks are needed for people who have achieved diabetes remission?	7.47 (2.41)
=16	Does losing weight and regaining it repeatedly adversely affect long-term health or psychological wellbeing compared with staying at a higher weight the whole time?	7.45 (2.60)

=16	How do genetic factors, physiological and metabolic processes affect weight status, weight gain and regional fat distribution? What are the mechanisms involved? Do these factors affect the ability to lose and maintain body weight? Do weight loss programmes tailored to a person's genetic makeup or physiology produce greater weight loss than untailored programmes?	7.45 (2.20)
18	Do interventions that target the 'obesogenic environment', such as community interventions, urban planning, placement of fast food outlets or workplace policies, affect population mean weight and do these effects differ by baseline weight status (underweight, healthy weight, overweight, obesity)? Which of this type of interventions are most effective at reaching low socio-economic groups?	7.44 (2.40)
19	Why do some people struggle to maintain motivation during a weight loss attempt?	7.41 (2.54)
20	What are the effects of obesity in childhood on outcomes other than physical health e.g. psychological wellbeing, educational achievement, employment, relationship status etc?	7.39 (2.37)
21	Does incorporating physical activity into weight loss interventions enhance weight loss? Does this depend upon the frequency and type of physical activity (e.g. high vs low intensity, resistance vs cardiorespiratory activity)?	7.36 (2.37)
22	What effect do working hours (e.g. shift work) and/or a late eating pattern have on body weight and adiposity?	7.35 (2.70)
23	Does being physically active mitigate the health consequences of overweight/obesity?	7.31 (2.12)
23	Does prolonged psychological stress affect bodyweight? Do interventions that aim to reduce stress increase weight loss in people living with overweight and obesity compared with interventions not addressing stress?	7.31 (2.20)
25	Do interventions that address emotional or social overeating lead to weight loss or weight loss maintenance?	7.29 (2.43)
26	What is the relationship between emotions and appetite or energy intake?	7.19 (2.29)
27	What changes in supermarkets or the wider food industry are effective in promoting healthier diets?  Does changing labelling and/or packaging on foods affect purchasing, consumption and body weight?	7.18 (2.36)
28	Do interventions in primary care prevent obesity? What are the effects of offering weight management referrals on the prevalence of obesity?	7.17 (2.30)
28	How accurate are existing models of the health consequences of excess weight and the impact of weight loss? Which assumptions are critical in determining the long-term effectiveness and cost-effectiveness of weight loss interventions? What is the impact of weight regain on the incidence of disease and cost-effectiveness of weight loss interventions in these models?	7.17 (2.21)
28	How does the brain control food intake and can we use knowledge of these mechanisms to aid weight loss? What are the brain responses to food during weight loss and following weight regain?	7.17 (2.51)
28	Does social influence affect the amount of energy dense-nutrient poor foods or consumption of	7.17
32	healthier foods, and can these norms be changed?  What is the effect of parental support for their children's weight management on weight in a child living with obesity? Are family based interventions aiming at childhood weight control effective?	7.16 (2.34)
33	What are the effects of interventions to influence health professionals to support patients with overweight and obesity?	7.15 (2.32)
34	What is the effect of adult obesity on social behaviour, self-confidence, self-esteem and self-worth?	7.14 (2.38)
35	Does the gut microbiome have an effect on weight gain or the risk of obesity? Does the gut microbiome influence body composition or fat distribution? Do human genetics influence the gut microbiome? Can a change in gut microbiome aid weight loss and by what mechanisms? Which strains of bacteria are associated with greatest weight loss during a weight loss attempt? What is the effect of prebiotics or probiotics on weight loss/weight maintenance?	7.12 (2.53)
36	What impact does obesity have on life opportunities? E.g. employment, marital status, happiness, education.	7.11 (2.65)
=37	How effective and cost effective are subsidies for healthy food or access to leisure facilities to prevent or treat obesity?	7.10 (2.45)
=37	Does obesity cause dementia?	7.10 (2.34)
	•	

=37	Is there a difference in the way that health professionals respond to patients living with obesity compared with people of a healthy weight in terms of investigation, diagnosis and follow up?	7.10 (2.49)
40	Are interventions to treat children or adolescents living with severe obesity effective?	7.08 (2.54)
41	Is it better to advise incorporating physical activity into daily life or taking formal exercise to increase overall levels of physical activity in the population?	7.07 (2.41)
42	Are there benefits of some types of diets on diabetes that are independent of the amount of weight lost?	7.06 (2.27)
43	What is the impact of reducing the availability of energy dense-nutrient poor foods on overall energy intake?	7.05
=44	What are the mechanisms that lead to satiation during meals?	7.04 (2.28)
=44	Does having a choice of how to lose weight improve the success of the weight loss attempt?	7.04 (2.48)
=44	In people living with obesity, does losing weight affect how the heart works?	7.00 (2.32)
=44	How do we assess cardiovascular risk in people living with overweight and obesity? Should we stratify interventions for weight loss based on cardiovascular risk in those living with overweight and obesity?	7.00 (2.24)
48	Can the provision of healthy school food reduce obesity in children?	6.99 (2.73)
=49	What are the most effective treatments for obesity in people with severe mental illness? Is integrating weight management into mental healthcare effective in supporting weight loss or weight loss maintenance?	6.98 (2.36)
=49	Does living with obesity affect quality of life? Does losing weight or gaining weight affect quality of life in people living with overweight and obesity?	6.98 (2.61)
=51	Do family dynamics cause unhealthy weight gain?	6.97 (2.59)
=51	Why do some people living with overweight and obesity do insufficient physical activity and what advice or interventions might increase this?	6.97 (2.52)
=53	Do interventions to encourage healthier food purchasing affect population mean weight or the prevalence of overweight and obesity?	6.96 (2.46)
=53	Does eating a diet high in processed foods make losing weight, maintaining lost weight, or gaining weight more likely? Do diets high in processed foods lead to a higher incidence of weight-related illness, such as diabetes or heart disease, independent of body weight status?	6.96 (2.69)
=53	Does eating a diet high in processed foods make losing weight, maintaining lost weight, or gaining weight more likely? Do diets high in processed foods lead to a higher incidence of weight-related illness, such as diabetes or heart disease, independent of body weight status?	6.96 2.69
55	What are the health risks for individuals who have previously been overweight but have now lost weight compared with those who have never been overweight?	6.93 (2.43)
56	How do energy requirements change following weight loss and what are the mechanisms involved?	6.92 (2.36)
57	Can interventions modify individuals' food preferences and does this affect weight outcomes?	6.91 (2.29)
58	Does the imagery used in weight loss interventions and public health messaging affect motivation for behaviour change?	6.88 (2.48)
59	Does the amount of sugar in baby food affect children's weight gain?	6.83 (2.62)
60	Is overeating a form of self-harm for some people living with obesity?	6.80 (2.86)
=61	Does the mode of delivery e.g. in-person face-to-face, group, digital, telephone influence the weight loss achieved by a weight loss programme?	6.80 (2.45)
=61	Does age of onset of obesity or years lived with obesity influence the effectiveness of specific weight loss methods?	6.80 2.27

-62	Door shill the od trauma or montal health disorder in shill the advance sheet it?	6.79
=63	Does childhood trauma or mental health disorder in childhood cause obesity?	2.63
=63	Is attempting to avoid snacking more or less effective than 'little and often' for weight loss and weight maintenance?	6.79 2.56
65	Does fast food advertising affect the prevalence of overweight and obesity in childhood?	6.78 2.80
66	Do markers of blood glucose control and cardiovascular disease (e.g. insulin, glucagon, HbA1c, blood pressure, cholesterol etc) predict weight gain and obesity? What effect do these markers have on weight loss and weight maintenance?	6.77 2.39
67	What are the most accurate and practical ways to measure dietary intake?	6.76 2.67
68	Do weight loss interventions improve blood glucose control or influence cardiovascular risk in people living with type 1 diabetes and obesity and what are the adverse effects?	6.75 2.51
69	Is there institutional bias towards people living with overweight and obesity in different employment sectors and can this be changed?	6.73 2.72
70	Do diets high in fat or high in sugar increase the likelihood of gaining weight?	6.71 2.80
=71	What are the effects of tier 3 services on weight loss and are these services cost-effective?	6.68 2.20
=71	Do restrictive or permissive diets lead to greater weight loss or weight loss maintenance? Is permissive messaging about dietary change more effective at maintaining a healthy weight than restrictive messaging?	6.68 2.26
73	How do the words used to define and describe overweight and obesity affect perceived discrimination as well as emotional and psychological wellbeing in people living with overweight and obesity? Would changing the language reduce the blame culture associated with obesity? What language used in public health messaging about overweight/obesity encourages weight control without increasing stigma towards people living with obesity?	6.67 2.75
=74	What is the role of the adipocyte life cycle in body weight and obesity?	6.66 2.36
=74	Do food additives and non-nutritives weeteners affect appetite regulation, post-prandial metabolic and endocrine responses and energy intake? Is replacing sugar with non-nutritives weeteners an effective method of weight loss and weight maintenance?	6.66 2.70
76	What medical conditions can lead to weight gain and obesity?	6.65 2.55
77	Do social prescribing schemes such as community gardening, cookery classes, choir, lunch club, or book clubs lead to greater weight loss when trying to lose weight than attempting weight loss without such prescription?	6.64 2.47
78	What effect does social media have on eating behaviours and weight control?	6.63 2.61
79	Are there methods to combine pharmacological and behavioural weight loss treatments that mean the combination is greater than the sum of the parts?	6.62 2.69
=80	What is the prevalence of disordered eating in people living with obesity? Do weight loss interventions increase the risk of disordered eating?	6.61 2.22
=80	Is it possible to suppress appetite and so reduce energy intake? Is this an effective way to lose weight?	6.61 2.68
82	Can screening programmes identify those at risk of developing obesity? Does identifying people at risk and implementing early interventions prevent weight gain?	6.59 2.67

83	What is the role of social networks in weight control? Does having a weight loss buddy lead to better outcomes?	6.58 2.41
=84	What is the effect of behavioural, dietary, pharmacological, and surgical interventions on body composition and fat distribution? Can exercise attenuate loss of lean tissue associated with weight loss?	6.57 2.31
=84	What interventions can help parents to identify if their child is overweight and does this increase their engagement in weight management services?	6.57 2.67
86	What are the advantages and disadvantages of the various methods of quantifying body fat in routine healthcare? What is the association between these measures and risk of obesity-related health outcomes? What are the most appropriate classifications for overweight and obesity in different demographic groups, e.g. ethnicity, age, gender? Can we develop an easy measurement for 'Thin on Outside, Fat on Inside' for use in routine healthcare? What is the association between being 'Thin on Outside, Fat on Inside' and other obesity related outcomes?	6.55 2.34
=87	Do interventions in the general population to improve cookery skills improve weight control?	6.53 2.53
=87	Is limiting daily energy intake a more successful method than limiting daily carbohydrate intake for weight loss and weight maintenance?	6.53 2.52
=89	Is attempting to follow intermittent fasting (including 5:2, every other day diet, etc.) or time restricted eating (e.g. 16:8 or eating between specific hours of the day) effective for weight loss and weight maintenance? Is intermittent fasting or time restricted eating more effective than calorie restriction alone? Are the benefits from intermittent fasting or time restricted eating (e.g. metabolic health, general wellbeing) independent from weight loss? Are there any side effects or health risks from intermittent fasting or time restricted eating?	6.52 2.60
=89	Do people crave or become addicted to certain foods and, if so does this cause obesity? Can treatments reduce pica, food cravings or addiction?	6.52 2.53
=89	Is taxing unhealthy foods and drink effective in reducing the prevalence of overweight and obesity?	6.52 2.81
92	Is obesity a cause or a consequence of reduced physical activity?	6.51 2.54
93	Would rules that limit the energy or macronutrient content of certain categories of food products affect the prevalence of overweight and obesity?	6.49 2.54
=94	Does the menopause cause weight gain/loss? Does the age at menopause affect weight gain and weight loss?	6.46 2.46
=94	What effect does social media have on self-confidence, self-esteem and self-worth of people living with overweight and obesity?	6.46 2.78
=96	What are the most accurate and practical ways to measure total energy expenditure and physical activity?	6.44 2.66
=96	In women entering pregnancy with overweight or obesity, do intentional efforts to reduce the amount of weight gained reduce the risk of obesity in the offspring?	6.44 2.59
98	Does informing a person living with overweight or obesity that she or he has non-alcoholic fatty liver disease (NAFLD) motivate weight loss?	6.40 2.60
99	Are there long-term health benefits from short-term weight loss? If so, is there a minimum amount of weight loss/duration that has clear benefits?	6.39 2.39

		•
=100	Are interventions aimed at weight control effective in helping women entering pregnancy with overweight or obesity limit weight gain during pregnancy or lose weight after birth?	6.38 2.47
=100	Are total diet replacement programmes with behavioural support as effective as using diet replacement products without behavioural support?	6.38 2.66
102	What are the effects of the body positivity movement on body weight?	6.36 2.70
103	Does breastfeeding increase post-partum weight loss or reduce risk of later obesity for the mother?	6.34 2.70
104	What are the effects on health of having a body mass index (BMI) within the overweight/obese range yet with high proportion of lean tissue/high muscle mass?	6.33 2.62
=105	Has the National Childhood Measurement Programme had an effect upon weight trajectories, health care usage, and mental health of children or their parents?	6.32 2.67
=105	Does attempting to limitalcohol intake reduce the risk of weight gain or increase weight loss?	6.32 2.75
107	Does the low carbohydrate ketogenic diet cause greater weight loss than a reduced carbohydrate non-ketogenic diet? Is attempting to follow a ketogenic or reduced carbohydrate diet safe and effective for weight loss and weight loss maintenance? What are the effects on fat distribution/body composition of these diets? Are there any adverse effects or long-term health risks?	6.31 2.88
108	Does the fact that most people are overweight mean that people are less concerned about their own excess weight?	6.28 2.76
109	Are workplace interventions to support active commuting, or schemes to increase physical activity provided through workplaces feasible, acceptable, and do they affect weight?	6.26 2.23
110	Is training people to eat less through techniques such as mindfulness or slow eating, or responding to internal hunger and thirst cues effective in helping people lose weight?	6.25 2.76
=111	Do some people living with overweight and obesity not recognise that they are overweight and what effect would interventions to improve recognition have?	6.19 2.65
=111	Do interventions, including clinical follow-up, after bariatric surgery prevent weight regain?	6.19 2.56
=111	Does the perception that the causes of obesity relate to matters of personal responsibility motivate people to control their own weight?	6.19 2.49
=111	What are the adverse consequences of bariatric surgery and can these be predicted?	6.19 2.51
115	Do marketing campaigns or policy changes affect population mean weight and do these effects differ by baseline weight status (underweight, healthy weight, overweight, obesity)? Do marketing campaigns, policy changes and community interventions prevent weight gain, prompt attempts to lose weight or enhance weight loss in those attempts?	6.18 2.52
116	How effective are interventions to reduce portions in restaurants, café/food outlets on energy intake and the prevalence of overweight and obesity?	6.16 2.77
117	Do the prevailing messages about the costs of obesity on healthcare affect prevalence of obesity or bias against people living with overweight?	6.15 2.66
118	Does the level of naturally occurring sex hormones (testosterone, oestrogen, progesterone) influence bodyweight? Does administering sex hormones lead to weight loss or weight loss maintenance, e.g. Hormone replacement therapy (HRT), testosterone etc?	6.14 2.43

119	Are high protein diets safe and effective for weight loss and weight loss maintenance?	6.10 2.65
120	Does the macronutrient composition of the diet influence the progression of non-alcoholic fatty liver disease (NAFLD) in people living with obesity?	6.06 2.53
=121	What methods are available to measure diet in infants, children, and adolescents and how do they compare in reliability and practicality?	6.02 2.68
=121	Is the use of commonly prescribed medications (e.g. antibiotics and pain medication) related to weight gain and obesity? What are the effective methods to prevent weight gain and achieve weight loss in peopletaking medications known to cause weight gain?	6.02 2.43
123	How effective are emerging pharmacological treatments for weight loss and how can we develop new drug treatments to help people lose weight (e.g. appetite suppressants, nutrient absorption etc)?	5.99 2.71
124	Why do some people with overweight try to lose weight and some people with overweight do not?	5.98 2.64
125	Do interventions in the general population to grow food improve weight control?	5.91 2.64
126	Does having heavy or irregular periods affect bodyweight?	5.89 2.56
=127	Are total diet replacement programmes (based on energy restricted formula food products) effective, safe, and tolerable for weight management in special populations e.g. attenuation of weight gain in pregnant women or for other groups where rapid weight loss may change outcomes, such as prior to a planned surgery?	5.86 2.55
=127	Why do people living with severe obesity eligible for surgery decide not to proceed with the surgery and do they take up other interventions?	5.86 2.55
=127	Does endorsement or delivery of interventions by different sources enhance the effectiveness of weight loss interventions? E.g. GP referral, celebrity endorsements, social media, family and friends. Does measurement and acknowledgement of body mass index (BMI) by a credible source influence motivation to attempt weight loss or adherence to weight loss programmes?	5.86 2.51
130	Is a vegan, vegetarian diet, pescatarian diet or a diet inclusive of meat better for weight loss, weight maintenance and metabolic health?	5.83 2.67
=131	Has the fat distribution in females changed over time?	5.82 2.80
=131	Does effectiveness of weight loss interventions vary depending on weight status of the individual delivering the intervention?	5.82 2.66
133	How do diets with varying macronutrient composition affect adherence to energy restriction?	5.80 2.72
134	Do vitamin and mineral deficiencies cause or contribute to weight gain? Do vitamins, minerals and other dietary supplements aid weight loss?	5.70 2.52
135	Does variation in gastric capacity explain who does and does not develop obesity?	5.63 2.46

136	Does advice to omit breakfast lead to greater weight loss and better weight maintenance than dietary advice that includes breakfast?	5.60 2.75
137	What is the effectiveness and cost-effectiveness of bariatric surgery for people with type 1 and type 2 diabetes with any degree of overweight but with a body mass index (BMI) &It 35?	5.57 2.54
138	Do concerns about the environment and sustainability affect weight?	5.55 2.78
139	What is the impact of cookery related television programmes on diet and weight?	5.48 2.84
140	Are people with addictions to drugs and alcohol at greater risk of unhealthy weight gain?	5.39 2.73
141	What are the psychosocial consequences of bariatric surgery for example, on intimate relationships and eating disorders, and do these vary by social and cultural group?	5.32 2.45
142	What are the methods available to measure adiposity in children? How valid and reliable are these methods?	5.31 2.48
143	Does pseudogynaecomastia in men living with obesity influence psychological wellbeing?	5.23 2.52
144	Does autismincrease the risk of obesity?	5.16 2.55
145	How does people's perception of air quality affect their engagement in outdoor physical activity and does this influence their weight?	4.80 2.74
146	Does having a liver transplant in childhood or adolescence lead to unhealthy weight gain?	4.67 2.42
147	What is the association between clothing size and body mass index (BMI)?	4.66 2.92
148	Do 'speciality foods' including genetically modified and organic foods influence total energy intake and hence bodyweight?	4.56 2.76
149	How does imprisonment effect body weight? What factors influence weight change and obesity during imprisonment?	4.46 2.49

Mean number of people who ranked each question (SD): 115 (9.7) Mean priority score (SD): 6.61 (2.5)

#### Supplementary Table 4: Research questions for workshop

#### Survey 2 top 30 debated at the workshop

- 1. What are the most effective methods for weight maintenance following weight loss? What are the effective components of treatments/ programmes incorporating a behavioural element? How many and in what combination are most effective? What is the optimal duration of these programmes?
- 2. What is the cost and affordability of a healthy balanced diet? What policy measures could make healthier foods more affordable? What policy measures could improve access to healthy diets for different social and cultural groups, such as people in poverty, people in inner cities, or young and older people?
- 3. Does an intervention that focuses on improving overall health rather than a specific focus on weight loss improve health and wellbeing?
- 4. Does having a psychological disorder such as depression and anxiety affect weight, and, if so, what is the mechanism? How do external perceptions of weight affect mental health? What is the effect of weight loss methods and repeated dieting on mental health outcomes?
- 5. What are the most effective methods for weight loss? What are the effective components of treatments/ programmes incorporating a behavioural element? How many and in what combination are most effective? What is the optimal duration of these programmes?
- 6. What is the most effective and cost effective mix of population/ public health and individual interventions to tackle obesity?

- 7. Do interventions (e.g. nutrition education and physical activity) in pre-school, primary school and secondary school reduce children's risk of unhealthy weight gain and, if so, how do they act? Does the effect of such interventions differ by social and cultural groups?
- 8. What are the drivers of food choice, appetite, and intake and do variations in these drivers explain who develops obesity and who does not?
- 9. What are the most effective ways to prompt people to make a weight loss attempt or engage with a weight loss support programme? What are the most effective methods to increase uptake and adherence to programmes?
- 10. How do demographic, social and cultural factors, e.g. age, socioeconomic status (SES), lifestyle, environment, psychosocial functioning affect weight status, weight gain and regional fat distribution? What are the mechanisms involved? Does the effectiveness of weight loss methods depend on social and cultural background and, if so, can the effects be made more equitable? Are weight loss methods tailored to people's background more effective for weight loss and weight maintenance than general methods?
- 11. Are people living with obesity at higher risk of infectious diseases? Are they at higher risk of severe consequences from these diseases? What are the proposed mechanisms?
- 12. Is weight loss an effective treatment for certain medical conditions and chronic illnesses, e.g. polycystic ovary syndrome (PCOS), hypothyroidism, lipaedema, gastrointestinal conditions, heart failure, osteoarthritis, chronic pain etc? Should specific weight loss methods be recommended for people with overweight and obesity with certain medical conditions and chronic illnesses?
- 13. Do parents' attitudes to food influence their children's food intake and risk of obesity?
- 14. Does the quality or amount of sleep influence bodyweight? Do interventions that increase/decrease sleep affect weight loss and weight maintenance?
- 15. In people living with overweight and type 2 diabetes, does losing weight lead to diabetes remission and how long does remission last? What health checks are needed for people who have achieved diabetes remission?
- 16. Does losing weight and regaining it repeatedly adversely affect long-term health or psychological wellbeing compared with staying at a higher weight the whole time?
- 17. How do genetic factors, physiological and metabolic processes affect weight status, weight gain and regional fat distribution? What are the mechanisms involved? Do these factors affect the ability to lose and maintain body weight? Do weight loss programmes tailored to a person's genetic makeup or physiology produce greater weight loss than untailored programmes?
- 18. Do interventions that target the 'obesogenic environment', such as community interventions, urban planning, placement of fast food outlets or workplace policies, affect population mean weight and do these effects differ by baseline weight status (underweight, healthy weight, overweight, obesity)? Which of this type of interventions are most effective at reaching low socio-economic groups?
- 19. Why do some people struggle to maintain motivation during a weight loss attempt?
- 20. What are the effects of obesity in childhood on outcomes other than physical health e.g. psychological wellbeing, educational achievement, employment, relationship status etc?
- 21. Does incorporating physical activity into weight loss interventions enhance weight loss? Does this depend upon the frequency and type of physical activity (e.g. high vs low intensity, resistance vs cardiorespiratory activity)?
- 22. What effect do working hours (e.g. shift work) and/or a late eating pattern have on body weight and adiposity?
- 23. Does being physically active mitigate the health consequences of overweight/obesity?

- 24. Does prolonged psychological stress affect bodyweight? Do interventions that aim to reduce stress increase weight loss in people living with overweight and obesity compared with interventions not addressing stress?
- 25. Do interventions that address emotional or social overeating lead to weight loss or weight loss maintenance?
- 26. What is the relationship between emotions and appetite or energy intake?
- 27. What changes in supermarkets or the wider food industry are effective in promoting healthier diets? Does changing labelling and/or packaging on foods affect purchasing, consumption and body weight?
- 28. Do interventions in primary care prevent obesity? What are the effects of offering weight management referrals on the prevalence of obesity?
- 29. How accurate are existing models of the health consequences of excess weight and the impact of weight loss? Which assumptions are critical in determining the long-term effectiveness and cost-effectiveness of weight loss interventions? What is the impact of weight regain on the incidence of disease and cost-effectiveness of weight loss interventions in these models?
- 30. How does the brain control food intake and can we use knowledge of these mechanisms to aid weight loss? What are the brain responses to food during weight loss and following weight regain?

## Research questions asked by more than 10 people in the first survey – emailed to workshop participants

- 1. What are the effects of interventions to influence health professionals to support patients with overweight and obesity?
- 2. Does the gut microbiome have an effect on weight gain or the risk of obesity? Does the gut microbiome influence body composition or fat distribution? Do human genetics influence the gut microbiome? Can a change in gut microbiome aid weight loss and by what mechanisms? Which strains of bacteria are associated with greatest weight loss during a weight loss attempt? What is the effect of prebiotics or probiotics on weight loss/weight maintenance?
- 3. Is there a difference in the way that health professionals respond to patients living with obesity compared with people of a healthy weight in terms of investigation, diagnosis and follow up?
- 4. What are the most effective treatments for obesity in people with severe mental illness? Is integrating weight management into mental healthcare effective in supporting weight loss or weight loss maintenance?
- 5. Does the mode of delivery e.g. in-person face-to-face, group, digital, telephone influence the weight loss achieved by a weight loss programme?
- 6. How do the words used to define and describe overweight and obesity affect perceived discrimination as well as emotional and psychological wellbeing in people living with overweight and obesity? Would changing the language reduce the blame culture associated with obesity? What language used in public health messaging about overweight/obesity encourages weight control without increasing stigma towards people living with obesity?
- 7. What are the advantages and disadvantages of the various methods of quantifying body fat in routine healthcare? What is the association between these measures and risk of obesity-related health outcomes? What are the most appropriate classifications for overweight and obesity in different demographic groups, e.g. ethnicity, age, gender? Can we develop an easy measurement for 'Thin on Outside, Fat on Inside' for use in routine healthcare? What is the association between being 'Thin on Outside, Fat on Inside' and other obesity related outcomes?

- 8. Is attempting to follow intermittent fasting (including 5:2, every other day diet, etc.) or time restricted eating (e.g. 16:8 or eating between specific hours of the day) effective for weight loss and weight maintenance? Is intermittent fasting or time restricted eating more effective than calorie restriction alone? Are the benefits from intermittent fasting or time restricted eating (e.g. metabolic health, general wellbeing) independent from weight loss? Are there any side effects or health risks from intermittent fasting or time restricted eating?
- 9. Do people crave or become addicted to certain foods and, if so does this cause obesity? Can treatments reduce pica, food cravings or addiction?
- 10. Do interventions, including clinical follow-up, after bariatric surgery prevent weight regain? What are the adverse consequences of bariatric surgery and can these be predicted? Why do people living with severe obesity eligible for surgery decide not to proceed with the surgery and do they take up other interventions? What are the psychosocial consequences of bariatric surgery for example, on intimate relationships and eating disorders, and do these vary by social and cultural group?
