

**Supplemental Appendix A.** Descriptive statistics for patient-reported outcome measures (PROMs) and the association between time since first injection and final assessment

Measure/Variable	Timepoint									Kendall's tau*	p-value
	Pre-operative			4-weeks post-operatively			3-105 months post-operatively				
	n	M	SD	n	M	SD	n	M	SD		
<b>UDI-6</b>	83	45	18	65	32	18	107	23	18	-0.05	0.49
<b>IIQ-7</b>	85	30	2				107	15	20	-0.11	0.13
<b>ICIQ-SF</b>							107	8	5	<0.001	0.99

\* Kendall's tau used to assess the association between PROM total scores at follow-up and length of time between first injection and follow-up assessment.

n = number, M = mean, SD = standard deviation, UDI-6 = Urinary Distress Inventory Short Form, IIQ-7 = Incontinence Impact Questionnaire Short Form, ICIQ-SF = International Consultation on Incontinence Questionnaire Short Form
