

Figure 4A – source data 2_ Uncropped gel with the relevant bands labeled: Protein staining of ChAdOx1 nCoV-19 vaccine lot and UUIm ChAdOx1. 3×10^9 adenoviral vector particles were separated by SDS-PAGE under denaturing and reducing conditions. Proteins were visualized by silver staining. Marker bands are labeled. ChAdOx1 ABV9317 was purified by the manufacturer; UUIm ChAdOx1 was purified by CsCl density gradient centrifugation.
