Table S3

Bivariate correlations between the specific areas of pandemic-related stress and the outcomes on parent level

	overall burden	childcare closures	school closures	home- work online	work- place closures	home office	maintain daily structure	social distancing	restrict. outside activ.	worries own health	worries others' health	restrict medical treatment	restrict psychoth. treatment	restrict child services
PS	.229***	.235***	.284***	.338***	.138*	.251***	.314***	.104**	.153***	.162***	.090**	.177***	.289***	.393***
GS	.300***	.089*	.290***	.317***	.261***	.292***	.362***	.247***	.232***	.323***	.299***	.297***	.339***	.298***
SH	-.137***	.002	-.150***	-.191***	-.102	-.199***	-.153***	-.077*	-.097**	-.293***	-.201***	-.236***	-.273***	-.265***
ANX	.240***	.107*	.205***	.182**	.236***	.136**	.185***	.187***	.158***	.283***	.263***	.240***	.288***	.302***
DEPR	.244***	.134**	.206***	.203***	.113*	.141**	.258***	.191***	.185***	.220***	.213***	.196***	.246***	.223***

Notes. PS = Parental stress; GS = general stress; SH = subjective health rating; ANX= anxiety; DEPR = Depression; for the subjective health rating, higher scores indicate better health, for the other outcomes, higher scores indicate higher burden, stress and symptoms; all parental outcomes with respect to the time of the subjectively highest burden; * $p < .05$. ** $p < .01$. *** $p < .001$.
