

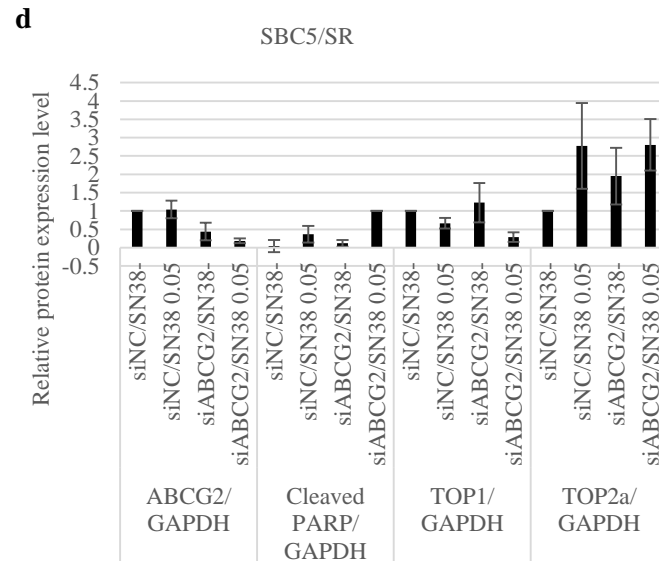

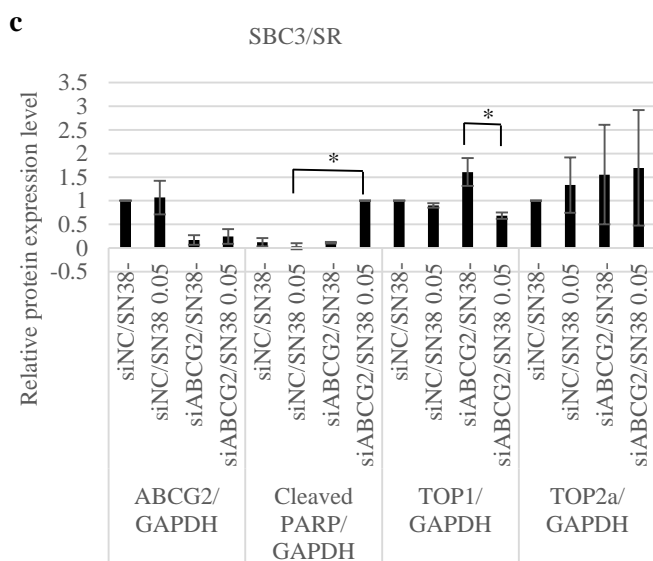

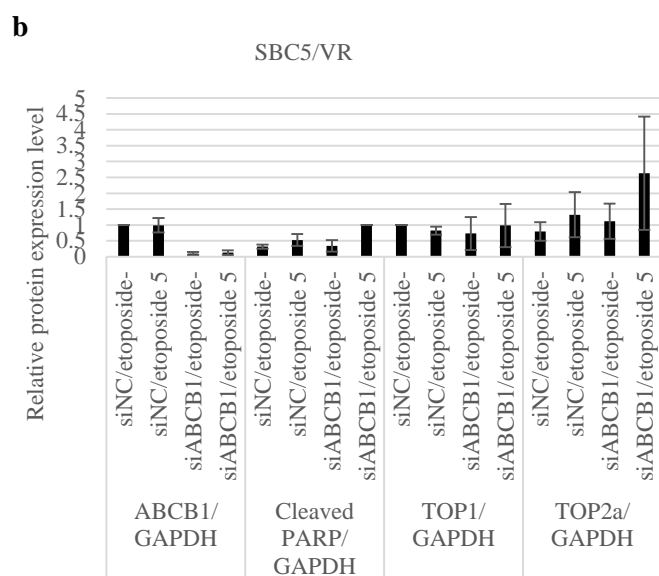

Figure S6.**Figure S6.**

Quantification of protein expression in resistant cells by the inhibition of ABC transporters using siRNAs combined with topoisomerase inhibitors: etoposide-resistant cells (a, b), SN-38-resistant cells (c, d). ABCB1, ATP-binding cassette sub-family B member 1; ABCG2, ATP-binding cassette sub-family G member 2; GAPDH, glyceraldehyde 3-phosphate dehydrogenase; NC, negative control; PARP, poly ADP ribose polymerase; TOP, topoisomerase. * $p < 0.05$
