

<b>Acronym</b>	<b>Definition</b>
ART	Assisted reproductive technology
aART	Advanced assisted reproductive technology
AI	Artificial insemination
CPA	Cryoprotective agent
ET	Embryo transfer
ICM	Inner cell mass
ICSI	Intra cytoplasmic sperm injection
iPS cells	Induced pluripotent stem cells
IUCN	International Union for the Conservation of Nature
IVF	<i>In vitro</i> fertilisation
SCNT	Somatic cell nuclear transfer
iSCNT	Interspecific somatic cell nuclear transfer
<b>Term</b>	<b>Definition</b>
Assisted reproductive technology	Technologies that utilise oocytes and spermatozoa to generate offspring (for example, AI, IVF, ET and ICSI)
Advanced assisted reproductive technology	Technologies that utilise genetic material from cells other than gametes to generate offspring (for example, SCNT/iSCNT, iPS cells)
Biobank	A secure, organised and searchable collection of biological samples and associated data stored for future use
Cryopreservation	The process of freezing cells with cryoprotectants enabling long-term viable storage using liquid nitrogen at -196°C or ultra-low freezers
Cryobank	A biobank of viable, cryopreserved biological samples
