Predict Quit

Please Note: currently, these models are **only used for** the exhibition of research results. They **should not** be used in clinical practice until they are validated in large prospective studies!

Supplementary Figure 8. A web-based application demonstration for the Ipredictor and ICpredictor models (available at <https://www.jchen-lab.work:8082/imbc/>). When ER status, PR status, HER2 status, and immunological gene expression file were inputted (left panel), it can calculate the predict scores and predict the pCR probabilities for the Ipredictor and ICpredictor models (right panel).
