

Fig. S12. The difference of gene copy numbers in sensitive and non-sensitive melanoma cell lines to A-485. The copy numbers of *EP300* (A) and *MITF* (B) were significantly higher in sensitive cell lines (IC_{50} to A-485 $< 10 \mu M$) than non-sensitive cell lines (IC_{50} to A-485 $> 10 \mu M$).
