40	40		mainly lying down	unable to do most activity	mainly assistance			
30	30	4	bedbound		total care	minimal		
20	20					mouth care only		
10	10						confused, drowsy, or comatose	
0	0	5	dead					

Supplementary Table 1: Calculation of Karnofsky Performance Status (“KPS”) scores. Pieces of information in the same row(s) are considered to represent equivalent KPS scores. Note that Palliative Performance Scale (“PPS”) scores correspond directly to equivalent KPS scores. Equivalent Eastern Cooperative Oncology Group (“ECOG”) are also displayed. The rightmost 5 columns of the table are the 5 components of the PPS score, which was calculated and translated into the corresponding KPS score.
