

Supplementary Table 2. ORR by location of injected lesion by dose. The highest response rate was in patients who had lesions in lymph nodes injected. While data on HPV status were incomplete, response in nodes was not associated with positive HPV status.
 ORR by location of injected lesion.

	2 mg	8 mg	Total
Head	0/4	1/5	1/9 (11%)
Neck	1/5	0/5	1/10 (10%)
Lymph node	4/13	4/9	8/22 (36%)
Skin	1/2	1/4	2/6 (33%)
subcutaneous	1/4	0/2	1/6 (17%)
