

**Supplementary Fig. S5: The clinical impact of macrophages in the T cell low group in the mIHC cohort**

Supplementary Fig. S5: The clinical impact of macrophages in the T cell low group in the mIHC cohort. A) Unsupervised hierarchical clustering of macrophage subtypes in the T cell low group quantified by mIHC. B-C) Kaplan-Meier (log-rank test) survival plots depict OS (B) and PFS (C) in the T cell low/macrophage low (T cell low/M low) and in the T cell low/macrophage high (T cell low/M high) groups.
