

Supplementary Table 1. Combination indices for the NSC59984 and BSO treatment on cell viability in cells

NSC59984 ($\mu\text{mol/L}$)	BSO ($\mu\text{mol/L}$)	Combination index (CI)	
		SW480	Wi38
6	1	0.67	8
6	2.5	0.52	15

Combination index (CI) <1, =1 and >1 indicate synergism, additive effect and antagonism in drug combination treatment.
