

Supplemental Table 2A. Neuronal proportion in SZ and NPC subjects. Neuron proportion did not differ between STG samples from SZ and NPC subjects (two-sample t-test; p=0.50).

Abbreviations: NPC, non-psychiatric comparison; STG, superior temporal gyrus; SZ, schizophrenia.

Neuron Proportion	SZ	NPC
Median (minimum-maximum)	0.45 (0.38-0.61)	0.46 (0.37-0.59)
Median (standard deviation)	0.46 (0.04)	0.46 (0.05)
