

CRISTAL Study Group. Effect of aspirin vs enoxaparin on symptomatic venous thromboembolism in patients undergoing hip or knee arthroplasty: the CRISTAL randomized trial. *JAMA*. Published August 23, 2022. doi:10.1001/jama.2022.13416

Data Sharing Statement

Data

Data available: Yes

Data types: Deidentified participant data

How to access data: Data will be available upon reasonable request from the senior author, Prof Ian Harris, via email ianharris@unsw.edu.au

When available: With publication

Supporting Documents

Document types: None

Additional Information

Who can access the data: De-identified data will be made available to researchers whose proposed use of the data has been approved by the governing human research ethics committee.

Types of analyses: Data must be used for non-commercial, research purposes only.

Mechanisms of data availability: Data will be made available with investigator support subject to approval by the governing human research ethics committee.

Any additional restrictions: Any future analyses using study data must include at least one senior investigator from the original study to provide context and ensure correct use and appropriate interpretation of the data.
