Dear Dr. Ulsh:

Please accept our revised manuscript, RE: HPJ-D-20-00049, entitled, **“A systematic review of the hematopoietic acute radiation syndrome (H ARS) in canines and nonhuman primates: Acute mixed neutron/gamma versus reference quality radiations.”** by Thomas J. MacVittie, Ann M. Farese and William Jackson III.

Please find attached the response to reviewers and the revised manuscript. We have responded to all the reviewer's queries and found the review extremely helpful in preparing a "better" manuscript for the community. It was an excellent review. We extend our compliments to the reviewers for their time and expertise.

We appreciate your time and effort on our behalf and that of the readership of the Journal, Health Physics.

Sincerely,

Thomas J. MacVittie, M.S., Ph.D.
