## MOOSE (Meta-analyses Of Observational Studies in Epidemiology) Checklist

A reporting checklist for Authors, Editors, and Reviewers of Meta-analyses of Observational Studies. You must report the page number in your manuscript where you consider each of the items listed in this checklist. If you have not included this information, either revise your manuscript accordingly before submitting or note N/A.

Reporting Criteria	Reported (Yes/No)	Reported on Page No.
Reporting of Background		
Problem definition		
Hypothesis statement		
Description of Study Outcome(s)		
Type of exposure or intervention used		
Type of study design used		
Study population		
Reporting of Search Strategy		
Qualifications of searchers (eg, librarians		
and investigators)		
Search strategy, including time period		
included in the synthesis and keywords		
Effort to include all available studies,		
including contact with authors		
Databases and registries searched		
Search software used, name and		
version, including special features used		
(eg, explosion)		
Use of hand searching (eg, reference		
lists of obtained articles)		
List of citations located and those		
excluded, including justification		
Method for addressing articles		
published in languages other than		
English		
Method of handling abstracts and		
unpublished studies		
Description of any contact with authors		
Reporting of Methods		
Description of relevance or		
appropriateness of studies assembled for		
assessing the hypothesis to be tested		
Rationale for the selection and coding of		
data (eg, sound clinical principles or		
convenience)		
Documentation of how data were		
classified and coded (eg, multiple raters,		
blinding, and interrater reliability)		
Assessment of confounding (eg,		
comparability of cases and controls in		
studies where appropriate		

Reporting Criteria	Reported (Yes/No)	Reported on Page No.
Assessment of study quality, including		
blinding of quality assessors;		
stratification or regression on possible		
predictors of study results		
Assessment of heterogeneity		
Description of statistical methods (eg,		
complete description of fixed or random		
effects models, justification of whether		
the chosen models account for predictors		
of study results, dose-response models,		
or cumulative meta-analysis) in sufficient		
detail to be replicated		
Provision of appropriate tables and		
graphics		
Reporting of Results		
Table giving descriptive information for		
each study included		
Results of sensitivity testing (eg,		
subgroup analysis)		
Indication of statistical uncertainty of		
findings		
Reporting of Discussion		
Quantitative assessment of bias (eg,		
publication bias)		
Justification for exclusion (eg, exclusion		
of non–English-language citations)		
Assessment of quality of included studies		
Reporting of Conclusions		
Consideration of alternative explanations		
for observed results		
Generalization of the conclusions (ie,		
appropriate for the data presented and		
within the domain of the literature review)		
Guidelines for future research		
Disclosure of funding source		

Once you have completed this checklist, please save a copy and upload it as part of your submission. DO NOT include this checklist as part of the main manuscript document. It must be uploaded as a separate file.
