**Table S2. The information of primary antibodies in this study**

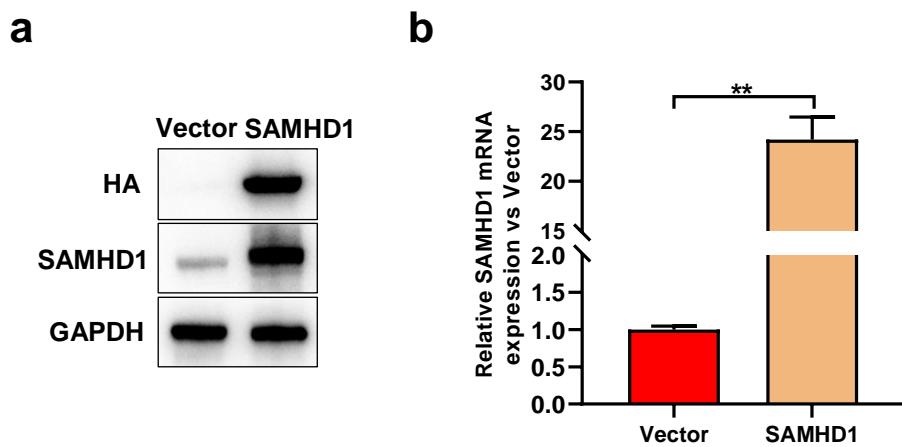

| <b>Antibodies</b> | <b>Company</b> | <b>Cat.No</b> | <b>Concentration</b>     |
|-------------------|----------------|---------------|--------------------------|
| Anti-SAMHD1       | Proteintech    | 12586-1-AP    | WB: 1:2000<br>IHC: 1:200 |
| Anti-HA-tag       | ABclonal       | AE008         | WB: 1:2000               |
| Anti-MAP2K6       | Proteintech    | 12745-1-AP    | WB: 1:500                |
| Anti-Phos-p38     | Affinity       | AF4001        | WB: 1:500                |
| Anti-p38          | Affinity       | AF6456        | WB: 1:500                |
| Anti-GAPDH        | Affinity       | AF7021        | WB: 1:3000               |
| Anti-KLF4         | Proteintech    | 11880-1-AP    | WB: 1:500<br>ChIP: 2 µg  |

## Fig.S1

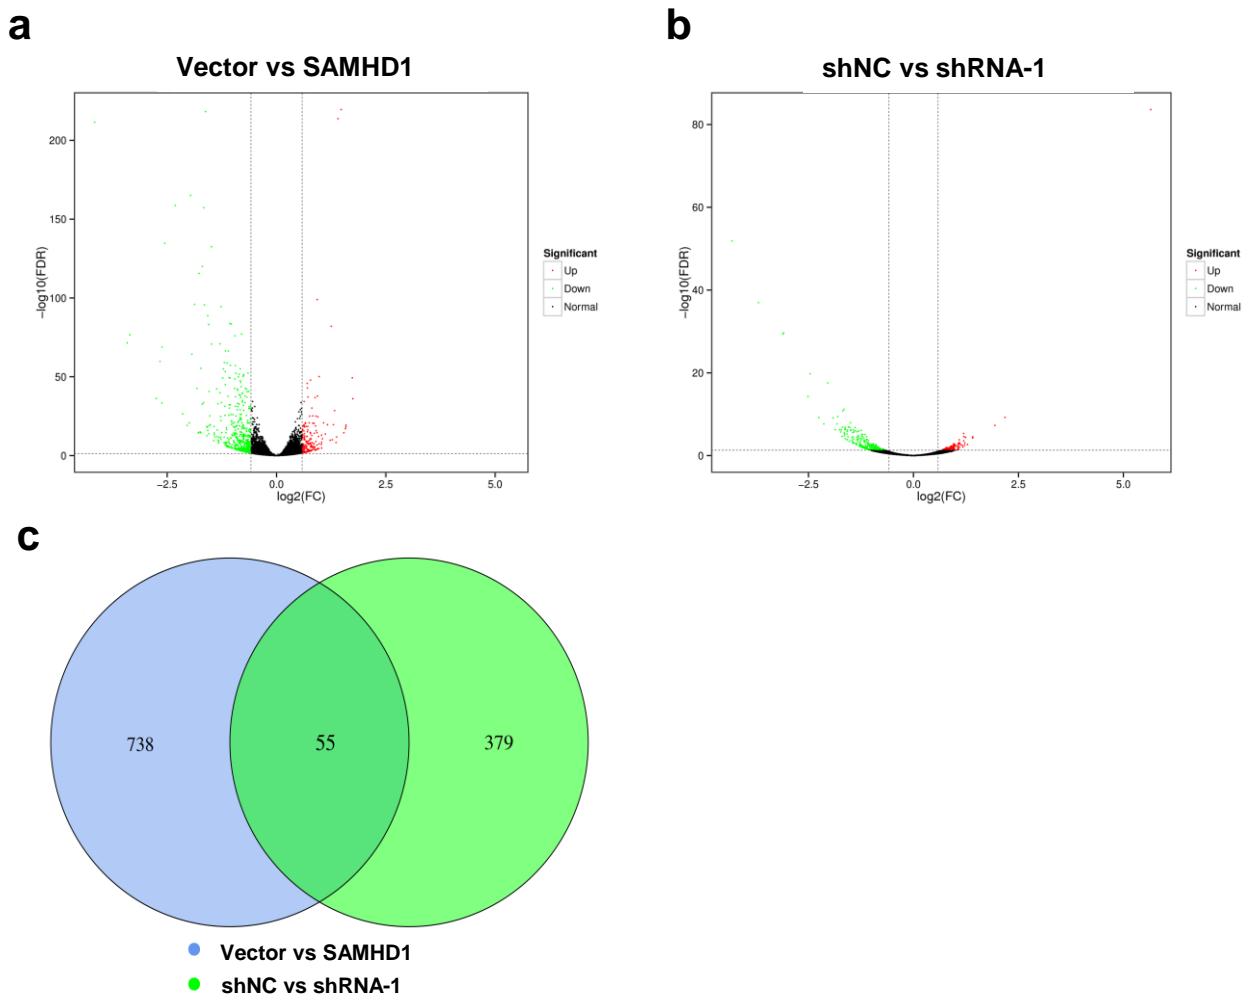

**Fig.S1 Establishment of HGC-27 and MGC-803 cells with stable knockdown of SAMHD1. (a, b)** Western blot was used to detect the expression levels of SAMHD1 protein in HGC-27 cells. **(c)** The expression levels of SAMHD1 mRNA in HGC-27 cells were detected using qRT-PCR. **(d, e)** Western blot was used to detect the expression levels of SAMHD1 protein in MGC-803 cells. **(f)** The expression levels of SAMHD1 mRNA in MGC-803 cells were detected using qRT-PCR.

**Fig.S2**

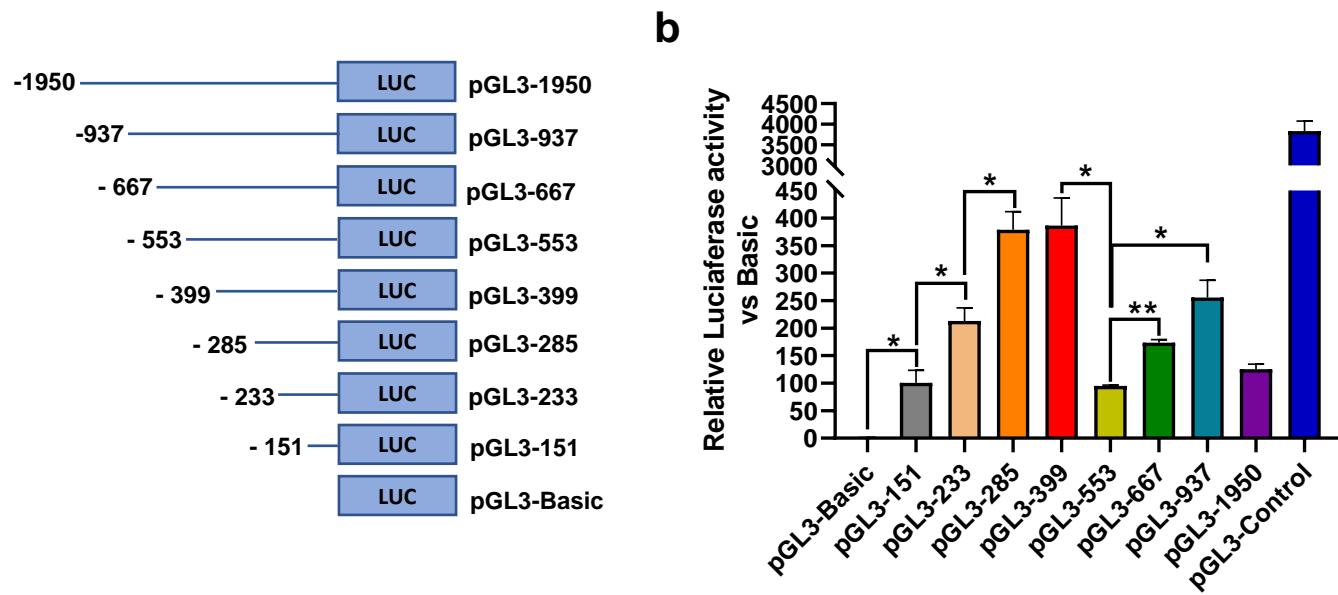

**Fig.S2 Establishment of AGS cells with stable overexpression of SAMHD1.** (a) Western blot was used to detect the expression levels of SAMHD1 protein in AGS cells. (b) The expression levels of SAMHD1 mRNA in AGS cells were detected using qRT-PCR.

**Fig.S3**

**Fig.S3 Analysis of differentially expressed genes in AGS and HGC-27 cells.** (a) The RNA seq was performed in AGS cells from SAMHD1 and Vector groups, and the Volcano plot is presented. (b) The RNA seq was performed in HGC-27 cells from shRNA-1 and shNC groups, and the Volcano plot is presented. (c) Venn diagram of differentially expressed genes in AGS and HGC-27 cells. Each set of mapping data was obtained from two independent RNA-seq.

**Fig.S4**

**Fig.S4 Identification of core promoter of SAMHD1 gene.** (a) Schematic diagram of pGL3 plasmids containing SAMHD1 promoter. (b) Double luciferase reporting assay was used to identify the core promoter of SAMHD1 gene.
