

Supplementary data

Supplementary Fig. S1: Increased levels of AIM2 in RA FLSs. The expression of AIM2 in RA FLSs and HC FLSs was measured by RT-qPCR (**A**) and western blot (**B**). Data show the mean \pm SD from at least 3 independent experiments. *P < 0.05 versus HC.

Supplementary Fig. S2: The efficiency of AIM2 knockdown. RA FLSs were subjected to RT-qPCR analysis (**A**) and Western blotting (**B**). A representative blot is shown. The data show the mean \pm SD of samples from at least 3 independent experiments. *P < 0.05, **P < 0.01 vs. CTR.

Supplementary Fig. S3: Immunohistochemical staining was used to measure the expression of IL-6, IL-8, CCL2, MMP-1, MMP-3, MMP-13 in synovial tissues from CIA mice. Representative images were from normal mice, DMSO-treated mice, and Myr-treated mice (original magnification, $\times 200$).

Supplementary Fig. S4: Immunohistochemical staining was used to measure the expression of p-AKT in synovial tissues from mice. Representative images were from normal mice, DMSO-treated mice, and Myr-treated mice (original magnification, $\times 200$).

Supplementary Fig. S5. Detection of surface molecules and phagocytosis of FLSs. The surface molecules CD11b, Fc γ RII, and Fc γ RIII receptor were detected by flow cytometry(**A**). Phagocytosis of FLSs were evaluated by fluorescent bead uptake assay. Representative images were shown(**B**) (original magnification, $\times 100$).

Table S1: Sequences of primers for RT-qPCR.

gene		sequences
AIM2	Forward	AGCAAGATATTATCGGCACAGTG
	Reverse	G TTCAGCGGGACATTAACCTT
β -actin	Forward	TCAAGATCATTGCTCCTCCTGAG
	Reverse	ACATCTGCTGGAAGGTGGACA
IL-1 β	Forward	ATGATGGCTTATTACAGTGGCAA
	Reverse	GTCGGAGATTCGTAGCTGGA
IL-6	Forward	ACTCACCTCTTCAGAACGAATTG
	Reverse	CCATCTTTGGAAGGTTTCAGGTTG
IL-8	Forward	ACTGAGAGTGATTGAGAGTGGAC
	Reverse	AACCCTCTGCACCCAGTTTTTC
CCL2	Forward	CAGCCAGATGCAATCAATGCC
	Reverse	TGGAATCCTGAACCCACTTCT
MMP-1	Forward	CTCTGGAGTAATGTCACACCTCT
	Reverse	TGTTGGTCCACCTTTCATCTTC
MMP-3	Forward	AAAGACAGGCACTTTTGGCG
	Reverse	CTTCATATGCGGCATCCACG
MMP-9	Forward	TGTACCGCTATGGTTACACTCG
	Reverse	GGCAGGGACAGTTGCTTCT
MMP-13	Forward	ACTGAGAGGCTCCGAGAAATG
	Reverse	GAACCCCGCATCTTGGCTT

Table S2: The sequences of siRNA oligonucleotides.

AIM2	siRNA-1	GCAACGTGCTGCACCAAAA
	siRNA-2	GCAGGAATCTATCAGAGAA
	siRNA-3	GAAGCGCTGTTTGCCAGTT

Table S4. Demographic and clinical features of patients with active RA

Age, yrs (mean ± SD)	56.67±4.63
Female: Male	8:2
Disease duration, yrs (mean±SD)	11.90±6.92
Rheumatoid factor-positive (%)	90
Anti-CCP-positive (%)	90
DAS28 (mean±SD)	6.09±1.20
Previous medications (%)	
Prednisone (<10mg/d)	30
Methotrexate	70
Leflunomide	10
Sulfasalazine	0
Hydroxychloroquine	20
NSAIDs	50

Table S5. Demographic and clinical features of health control subjects

Age, yrs (mean ± SD)	37.55±13.33
Female: Male	3:7
Previous medications (%)	
Prednisone (<10mg/d)	0
Methotrexate	0
Leflunomide	0
Sulfasalazine	0
Hydroxychloroquine	0
NSAIDs	80
