Leaf Area (rosette stage). Population structure correction based on Principal Coordinates and Kinship (left), or Kinship only (right).

Leaf Width (rosette stage). Population structure correction based on Principal Coordinates and Kinship (left), or Kinship only (right).

Leaf Length (rosette stage). Population structure correction based on Principal Coordinates and Kinship (left), or Kinship only (right).

Leaf Ratio (rosette stage). Population structure correction based on Principal Coordinates and Kinship (left), or Kinship only (right).
Leaf Area (heading stage). Population structure correction based on Principal Coordinates and Kinship (left), or Kinship only (right).

Leaf Width (heading stage). Population structure correction based on Principal Coordinates and Kinship (left), or Kinship only (right).

Leaf Length (heading stage). Population structure correction based on Principal Coordinates and Kinship (left), or Kinship only (right).

Leaf Ratio (heading stage). Population structure correction based on Principal Coordinates and Kinship (left), or Kinship only (right).
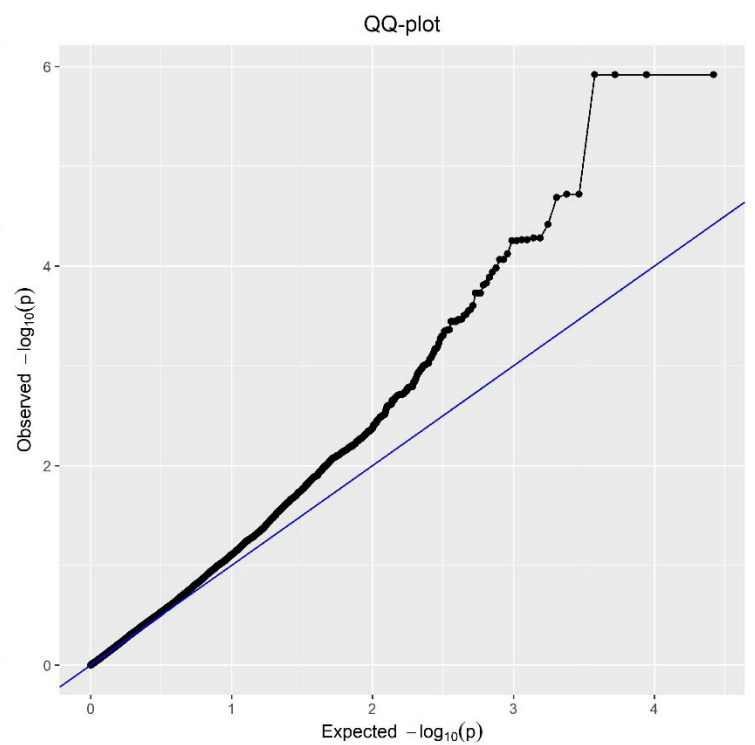

Rosette Leaf Number (heading stage). Population structure correction based on Principal Coordinates and Kinship (left), or Kinship only (right).

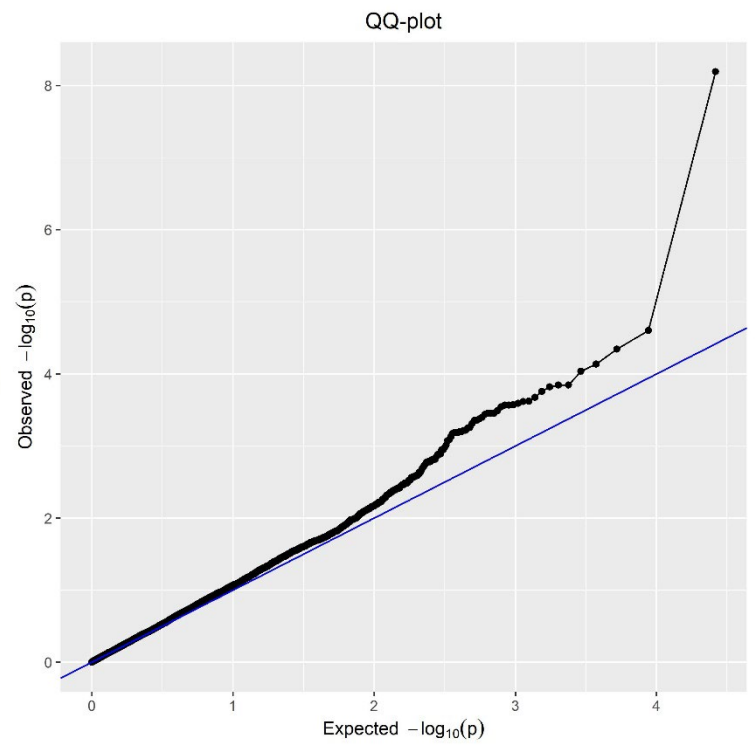

Head Area. Population structure correction based on Principal Coordinates and Kinship (left), or Kinship only (right).

Head Width. Population structure correction based on Principal Coordinates and Kinship (left), or Kinship only (right).

Head Height. Population structure correction based on Principal Coordinates and Kinship (left), or Kinship only (right).

Head Ratio. Population structure correction based on Principal Coordinates and Kinship (left), or Kinship only (right).

Head Weight. Population structure correction based on Principal Coordinates and Kinship (left), or Kinship only (right).
