

Supplementary Table 4

Descriptive Statistics for Pain Rating and Network Activation Data, by Temperature Category

<i>Variable</i>	<i>High Temperatures</i>		<i>Low Temperatures</i>	
	<i>Mean</i>	<i>S.E.</i>	<i>Mean</i>	<i>S.E.</i>
Pain Rating	118.83	5.06	61.16	5.82
Component 1	-0.17	0.01	-0.22	0.01
Component 2	0.11	0.02	0.02	0.02
Component 4	0	0.02	-0.04	0.03

Note. Pain ratings are given on a 200-point VAS scale, Component activations are given by FIR-based predictor weights outputted by fMRI-CPCA (see section 2.6.). S.E. = standard error of the mean.
