

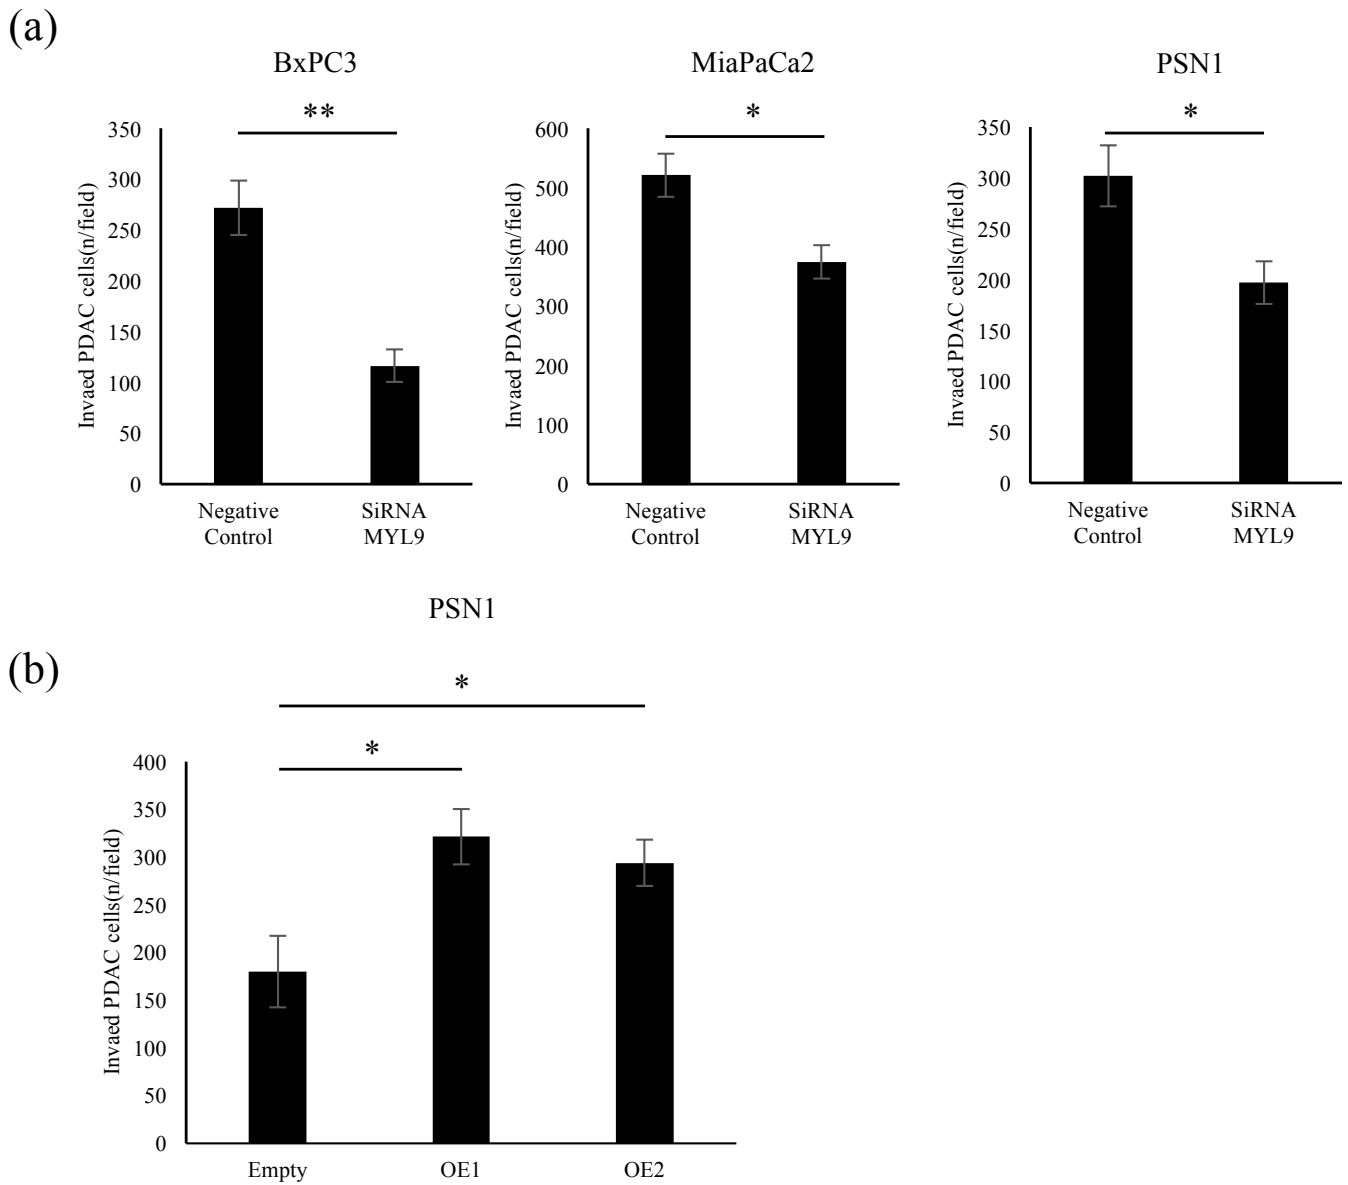

Fig. S2.

Supplementary figure 2.

(a) The alteration in the number of invasive cells upon MYL9 knockdown. The percentage of change that occurred initially after the treatment is shown. Invasiveness in PDAC cells decreased upon transfection with siRNA against MYL9. (b) The alteration in the number of invasive cells expressing lentivirus-mediated MYL9. The percentage of change that occurred initially after treatment is shown. Invasiveness in PDAC cells increased with lentivirus-mediated overexpression of MYL9. Each bar represents the mean \pm SEM of samples measured in triplicate (* p <0.05, ** p <0.01).
