

**Supplementary figure 6: Evaluation of STAT5 phosphorylation 5 (Y694) following IL-7 treatment in MPM cells.** PBMCs, obtained from blood of healthy donor and isolated using Ficoll gradient, and MPM cells were incubated for 15 minutes with 10 ng/ml of IL-7. Then, p(Y694)STAT5 was measured using flow cytometry. MPM, malignant pleural mesothelioma; PBMC, peripheral blood mononuclear cells.
