

**S4 Table.** Annotation of processed variants detected in desmoid tumor samples

| Patient ID | Processed variants | Total locus (QC-passed) | Het /Homo | Novel/Existing variants | Novel/Existing (%) | SNPs  | INDELs/ Sub | Transition In SNPs | Transversion In SNPs | Ti/Tv ratio |
|------------|--------------------|-------------------------|-----------|-------------------------|--------------------|-------|-------------|--------------------|----------------------|-------------|
| 3          | 82,086             | 846                     | 846/0     | 443/403                 | 52.3/47.7          | 614   | 232         | 363                | 251                  | 1.45        |
| 5          | 91,812             | 832                     | 832/0     | 411/421                 | 49.3/50.7          | 626   | 206         | 401                | 225                  | 1.78        |
| 6          | 98,694             | 1,280                   | 1,280/0   | 762/518                 | 59.5/40.5          | 830   | 450         | 522                | 308                  | 1.69        |
| 8          | 242,987            | 4,110                   | 4,110/0   | 2,593/1,514             | 63.1/36.9          | 3,128 | 982         | 1,900              | 1,228                | 1.55        |
| 9          | 163,985            | 2,140                   | 2,140/0   | 1,354/786               | 63.3/36.7          | 1,513 | 627         | 973                | 540                  | 1.8         |
| 15         | 96,373             | 1,465                   | 1,465/0   | 966/499                 | 65.9/34.1          | 983   | 482         | 599                | 384                  | 1.56        |
| 16         | 114,154            | 1,977                   | 1,977/0   | 1,398/579               | 70.7/29.3          | 1,245 | 732         | 758                | 487                  | 1.56        |
| 18         | 107,933            | 1,824                   | 1,824/0   | 1,282/542               | 70.3/29.7          | 1,173 | 651         | 588                | 585                  | 1.01        |
| 19         | 83,290             | 1,065                   | 1,065/0   | 605/460                 | 56.8/43.2          | 770   | 295         | 470                | 300                  | 1.57        |

Annotation-based summary was obtained using ANNOVAR. Het, heterozygous; Homo, homozygous; INDEL, insert and deletion; QC, quality control; SNP, single nucleotide polymorphism; Sub, substitution; Ti, transition; Tv, transversion.
