Supplemental information

**Dopaminergic neurons are not a major
Sonic hedgehog ligand source for striatal
cholinergic or PV interneurons**

Flavia Correa Turcato, Elliot Wegman, Tao Lu, Nathan Ferguson, and Yu Luo

Supplementary Fig 1 Validation of the *Shh* floxed mice, in relation to Fig 3. Global deletion of *Shh* mediated by CMV-driven cre in the CMVcre-shh KO mice leads to typical developmental defects in neural tube at embryonic stage E10.5 and E13.5, consistent with previous reports. n>3 for each genotype showed similar phenotype.
