

Low asparagine metabolism HCC subgroup with better prognosis

High asparagine metabolism HCC subgroup with worse prognosis

Supplementary Figure 2. Scheme of high and low asparagine metabolism HCC subgroups. GOT2: glutamic-oxaloacetic transaminase 2; Gln: Glutamine; Glu: glutamate; Asn: asparagine; Asp: aspartate; TCA: tricarboxylic acid; ASNS: asparagine synthetase; GLS2: glutaminase 2; ASCT2: Alanine, Serine, Cysteine Transporter 2
