

Supplementary Material

The clinical performance of the RealTime High Risk HPV assay on self-collected vaginal samples within the VALHUDES framework

Excluded samples

- No urine samples were collected (n=4)
- No cervical samples were collected (n=2)
- No vaginal sample were collected (n=1)
- No Multi-Collect were collected (n=1)
- No colposcopy performed (n=1)
- Inadequate biopsy (1)
- Major protocol violations on urine samples (n=14)
- Invalid HPV test result on vaginal samples (n=8)
- Invalid HPV test result on cervical samples (n=5)
