# To identify relevant articles we used the following search strategies in PubMed, Web Of Science, and Eric

The search strategy we used in PubMed is included in the manuscript. For the remaining databases, we used the same search strategy, however, since their search engine is designed differently, we found it necessary to include the search strategies as a supplementary file. As mentioned in the article, no websites or grey literature were examined in this review. Additionally, we didn't use any limitations. The manuscripts were approved based on the eligibility criteria.
