

Figure S3: Tissue distribution of PSMA-1-Pc413 in mice. Tissues were collected at 24 h and 96 h post injection. PSMA-1-Pc413 fluorescent signal in tissues was quantified by Maestro imaging. The fluorescent signal in PC3pip tumor remained the same at 24 h and 96 h. In contrast the signals in other organs such as liver and kidneys dramatically reduced over time, indicating washout of the probe. Values are mean \pm SD of 5 animals.
