

Supplementary Table 5: Multivariate logistic regression showed that both age and molecular subtypes were independent predictors for the 6GPS in METABRIC discovery cohort.

METABRIC discovery			
Variables	n (%)	Multivariate OR (95% CI)	P
Age			0.007
≥ 40	886 (94.4)	1	
< 40	53 (5.6)	2.5 (1.29-4.79)	
Molecular subtype			<0.001
Luminal A+B	734 (78.2)	1	
Non-Luminal (HER2; TNBC)	205 (21.8)	9.1 (6.40-12.96)
