

Fig S4. T_2 -weighted MRI permits tumor localization. Corresponding T_2 -weighted images for MDA231Br-GFP tumor bearing rat brains from Fig 3, prior to (A) VCAM-MPIO and (B) IgG-MPIO administration. Corresponding T_2 -weighted images for U87MG tumor bearing rat brains from Fig 4, prior to (A) VCAM-MPIO and (B) IgG-MPIO administration. (E) Corresponding T_2 -weighted image for PBS injected rat brain from Fig 3C. White arrowhead denotes location of tumor; scale bar = 2 mm.
