

Description of Additional Supplementary Files

Supplementary Movie 1: Merged movie of CTLH NP accumulation in stenosis-induced DVT in pregnant rats. Two-photon microscopy observation of the co-localization of Cy3-CTLH NP with FITC-labelled fibrin in the left iliac vein with stenosis-induced DVT for 0 to 4 h after i.v. injection of Cy3-CTLH NP.

Supplementary Movie 2: Merged movie of CTLH NP accumulation in FeCl₃-induced DVT in pregnant rats. Two-photon microscopy observation of the co-localization of Cy3-CTLH NP with FITC-labelled fibrin in the left iliac vein with FeCl₃-induced thrombosis for 0 to 4 h after i.v. injection of Cy3-CTLH NP.
