

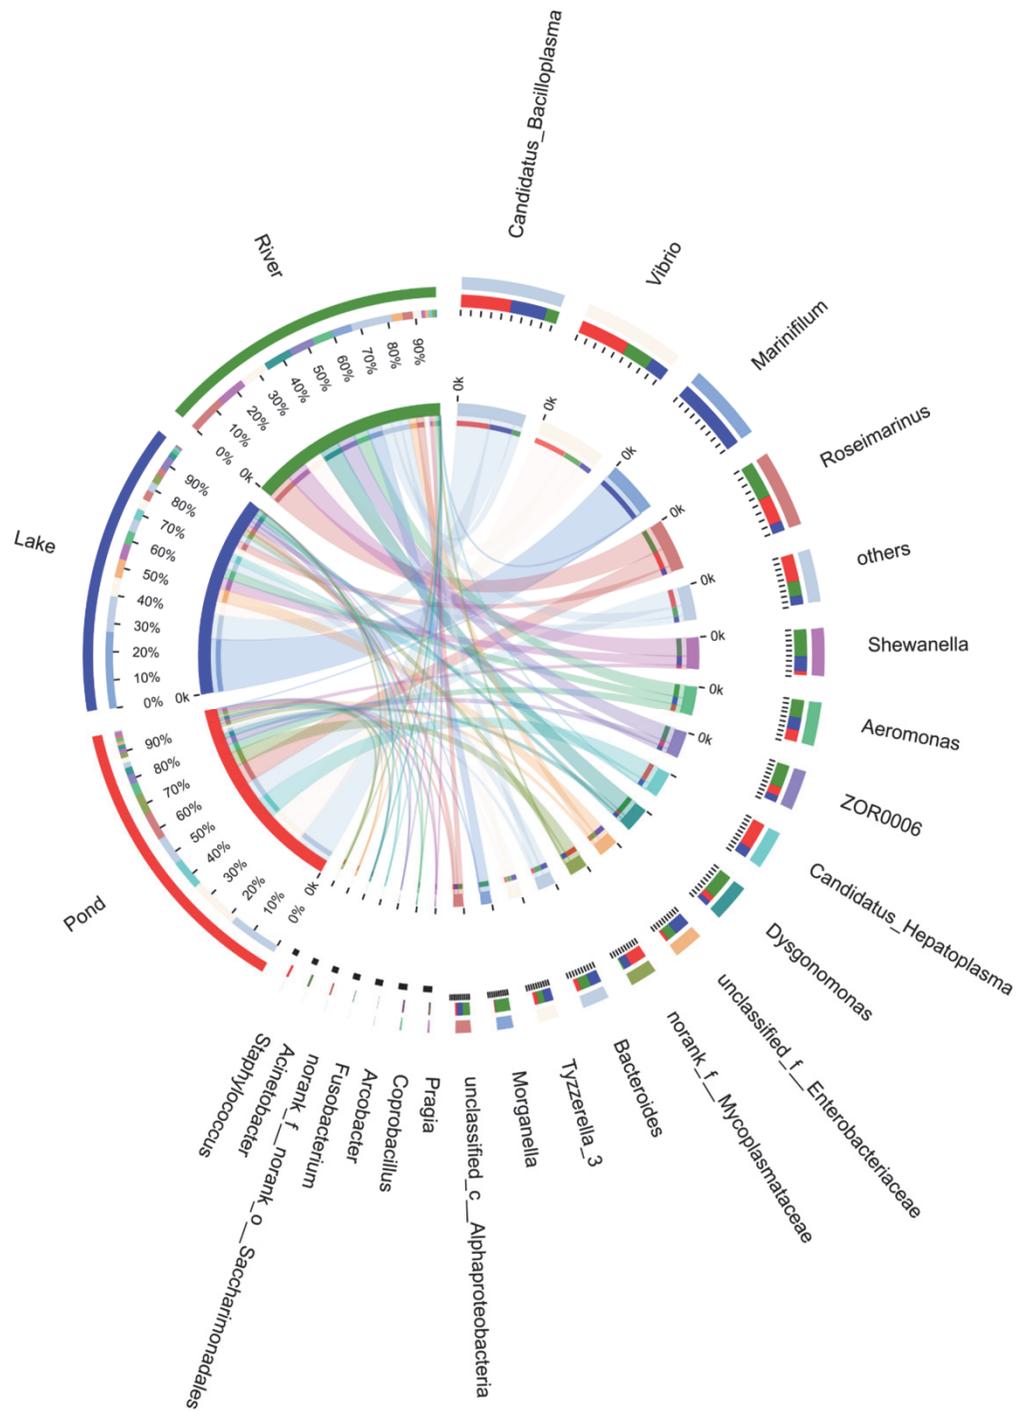

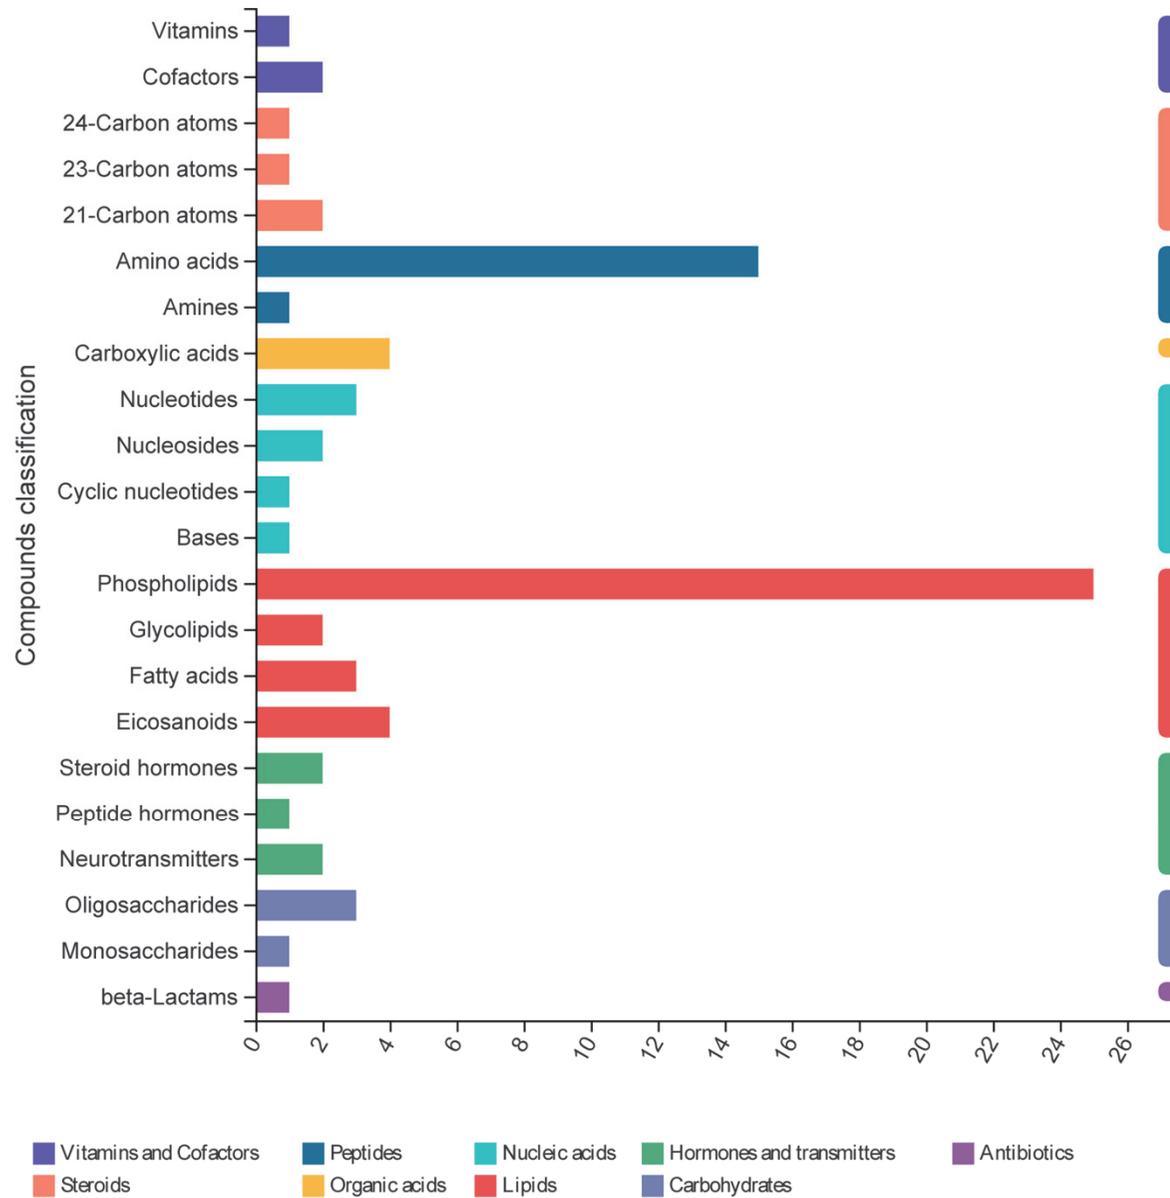

**Figure S1.** Shannon rarefaction curve of the read numbers and Shannon indices at the OTU level.

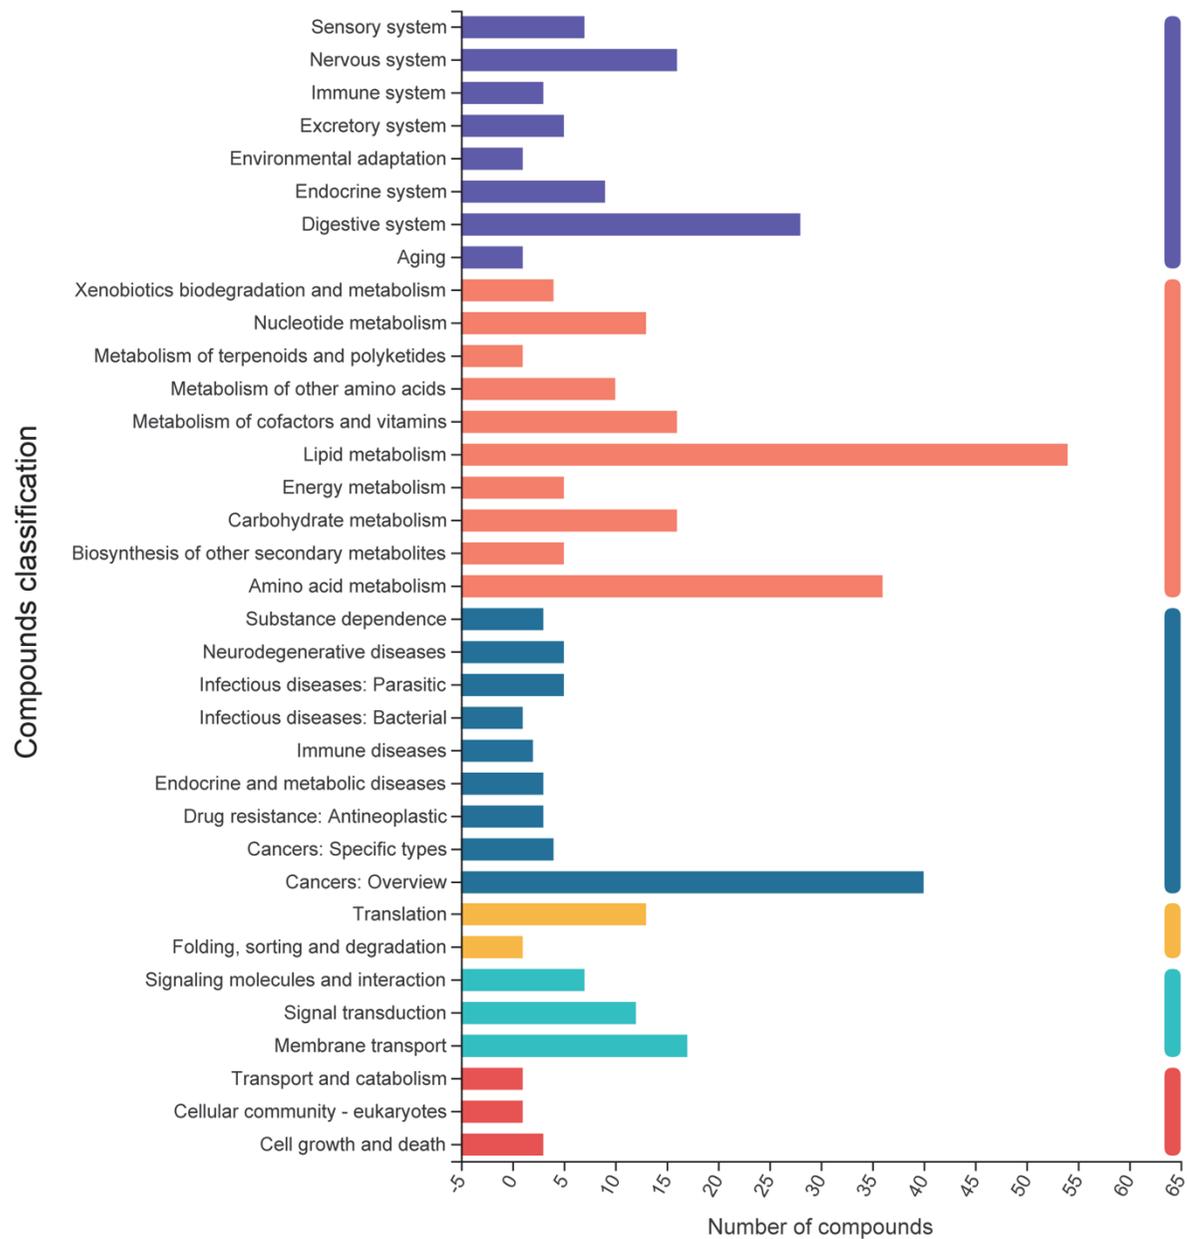

**Figure S2.** Circos plot of the proportion of gut microbiome in the three environmental groups at genus level.

## KEGG Compound Classification

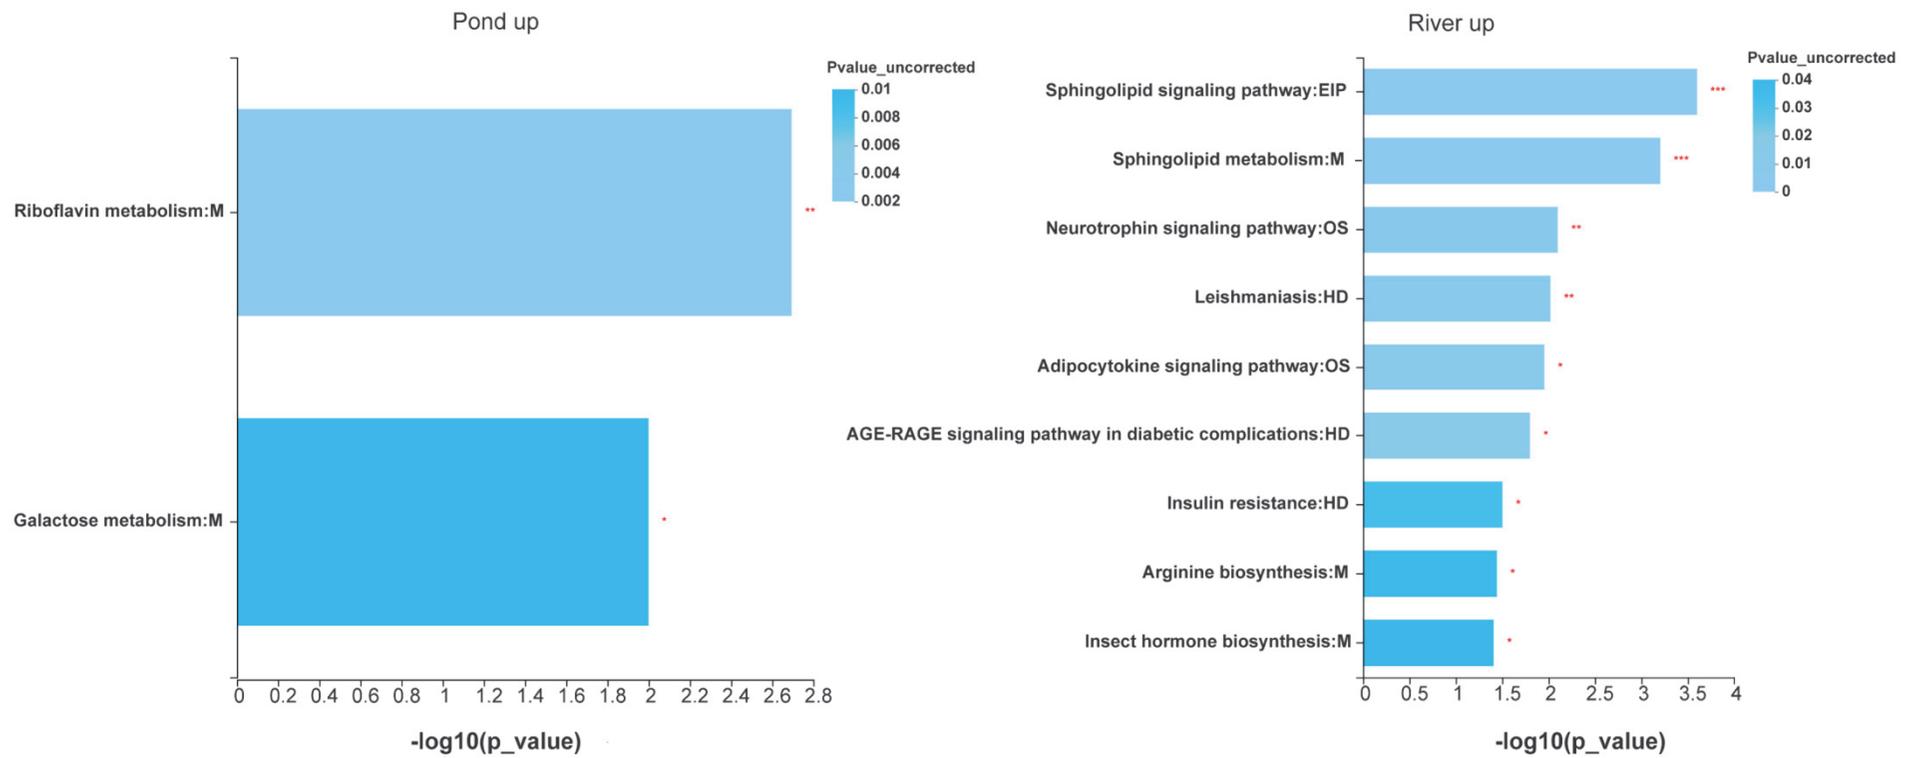

**Figure S3.** KEGG compound classification for the total identified metabolites.

### KEGG Pathway

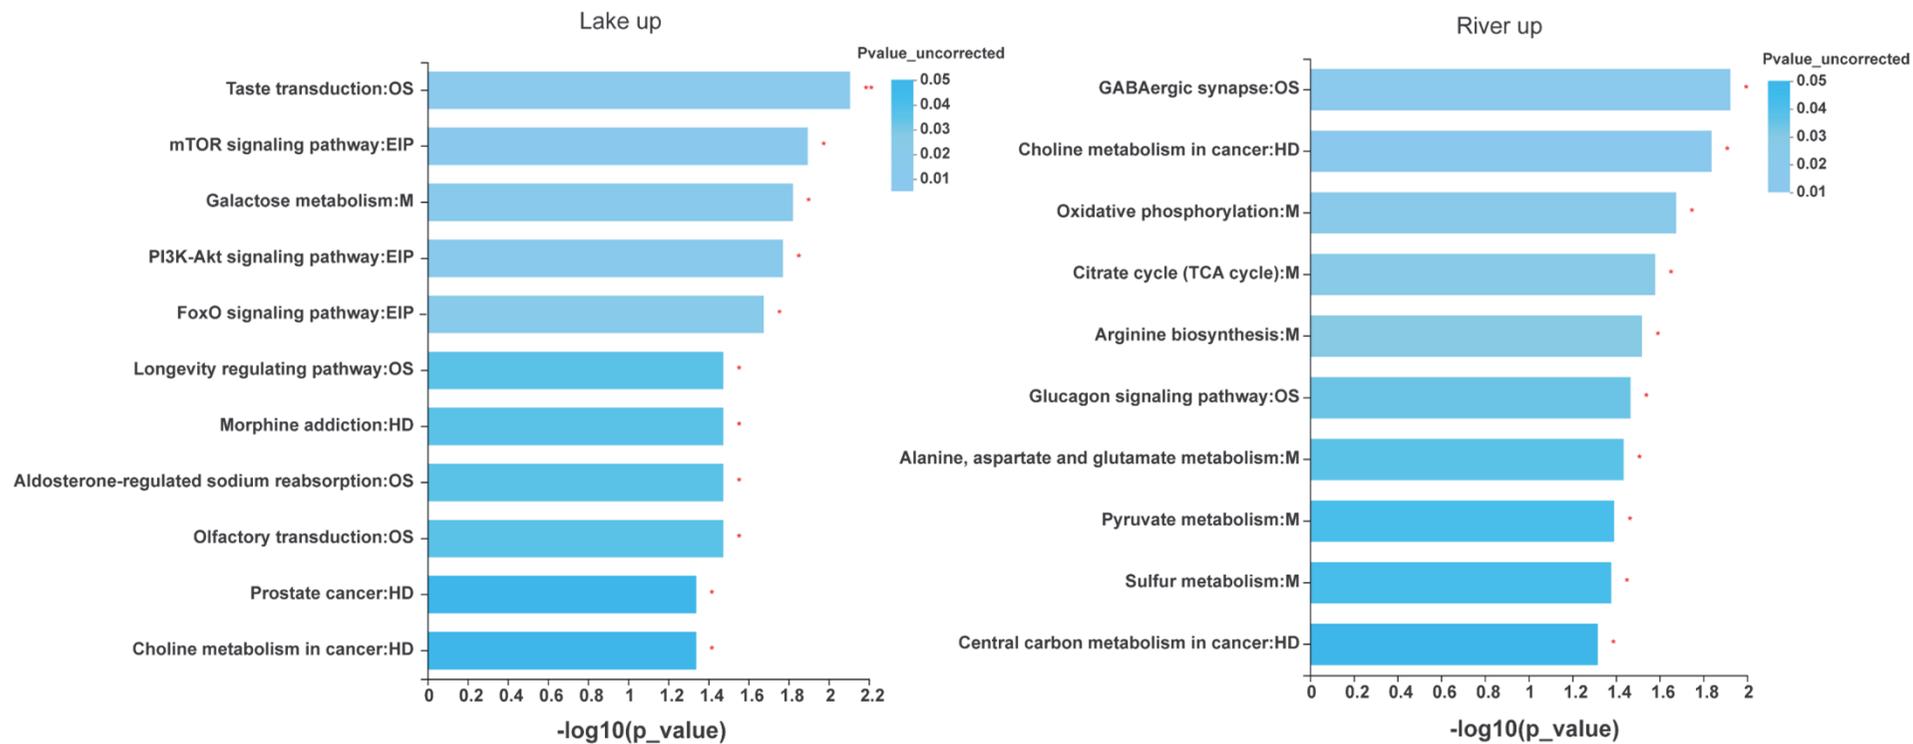

■ Organismal Systems   
 ■ Human Diseases   
 ■ Environmental Information Processing  
■ Metabolism   
 ■ Genetic Information Processing   
 ■ Cellular Processes

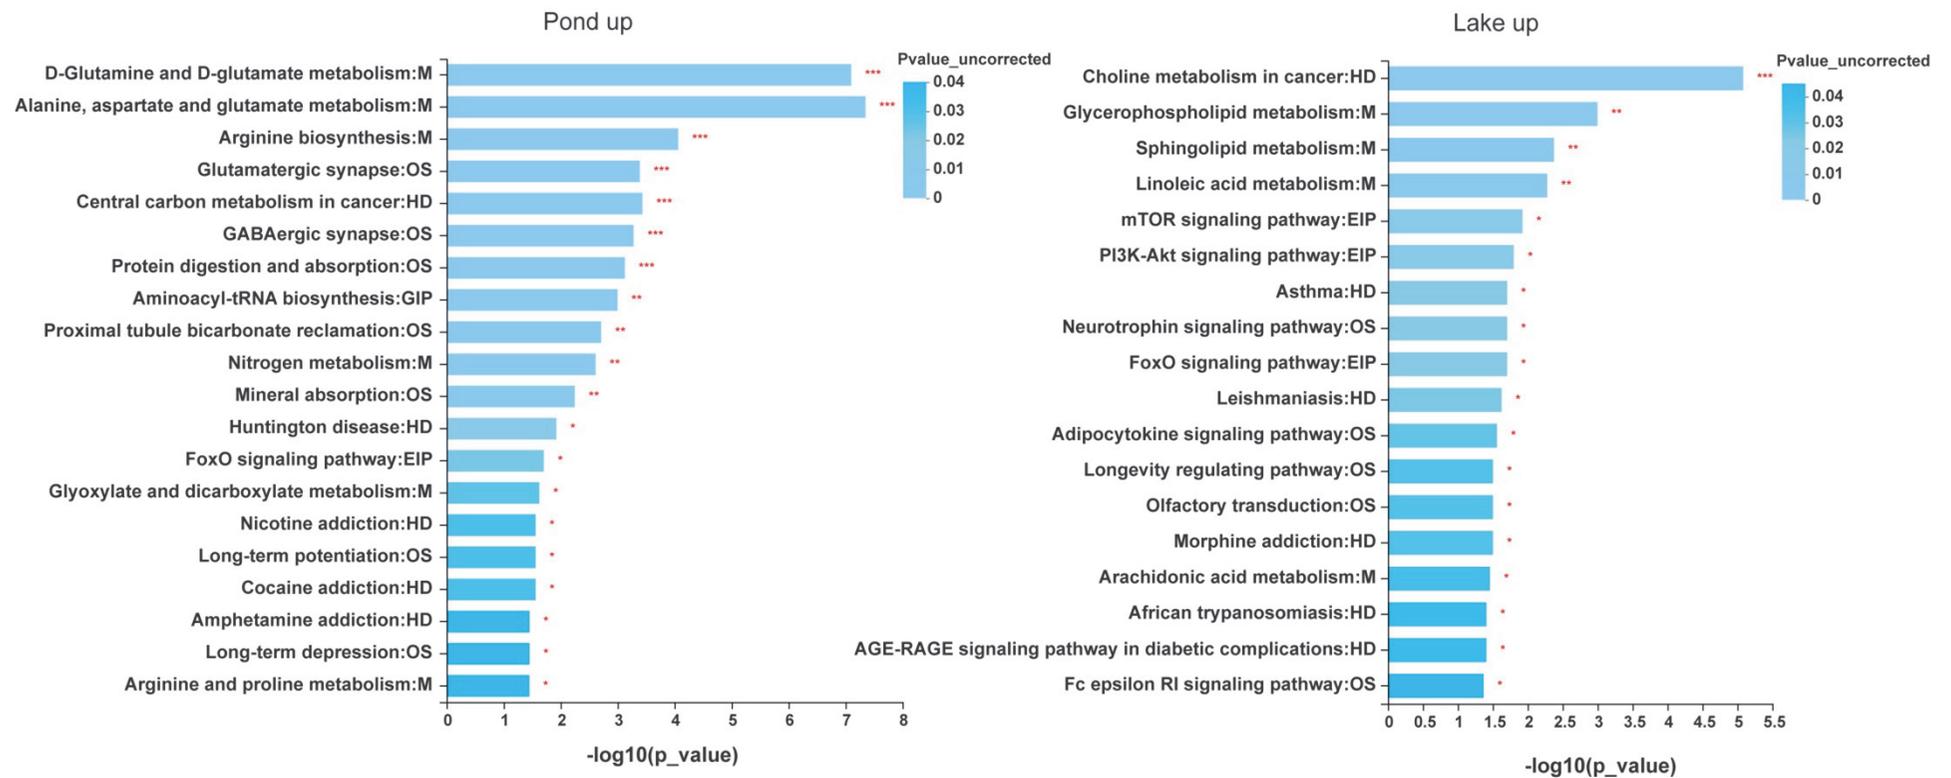

**Figure S4.** KEGG pathway annotation for the total identified metabolites.

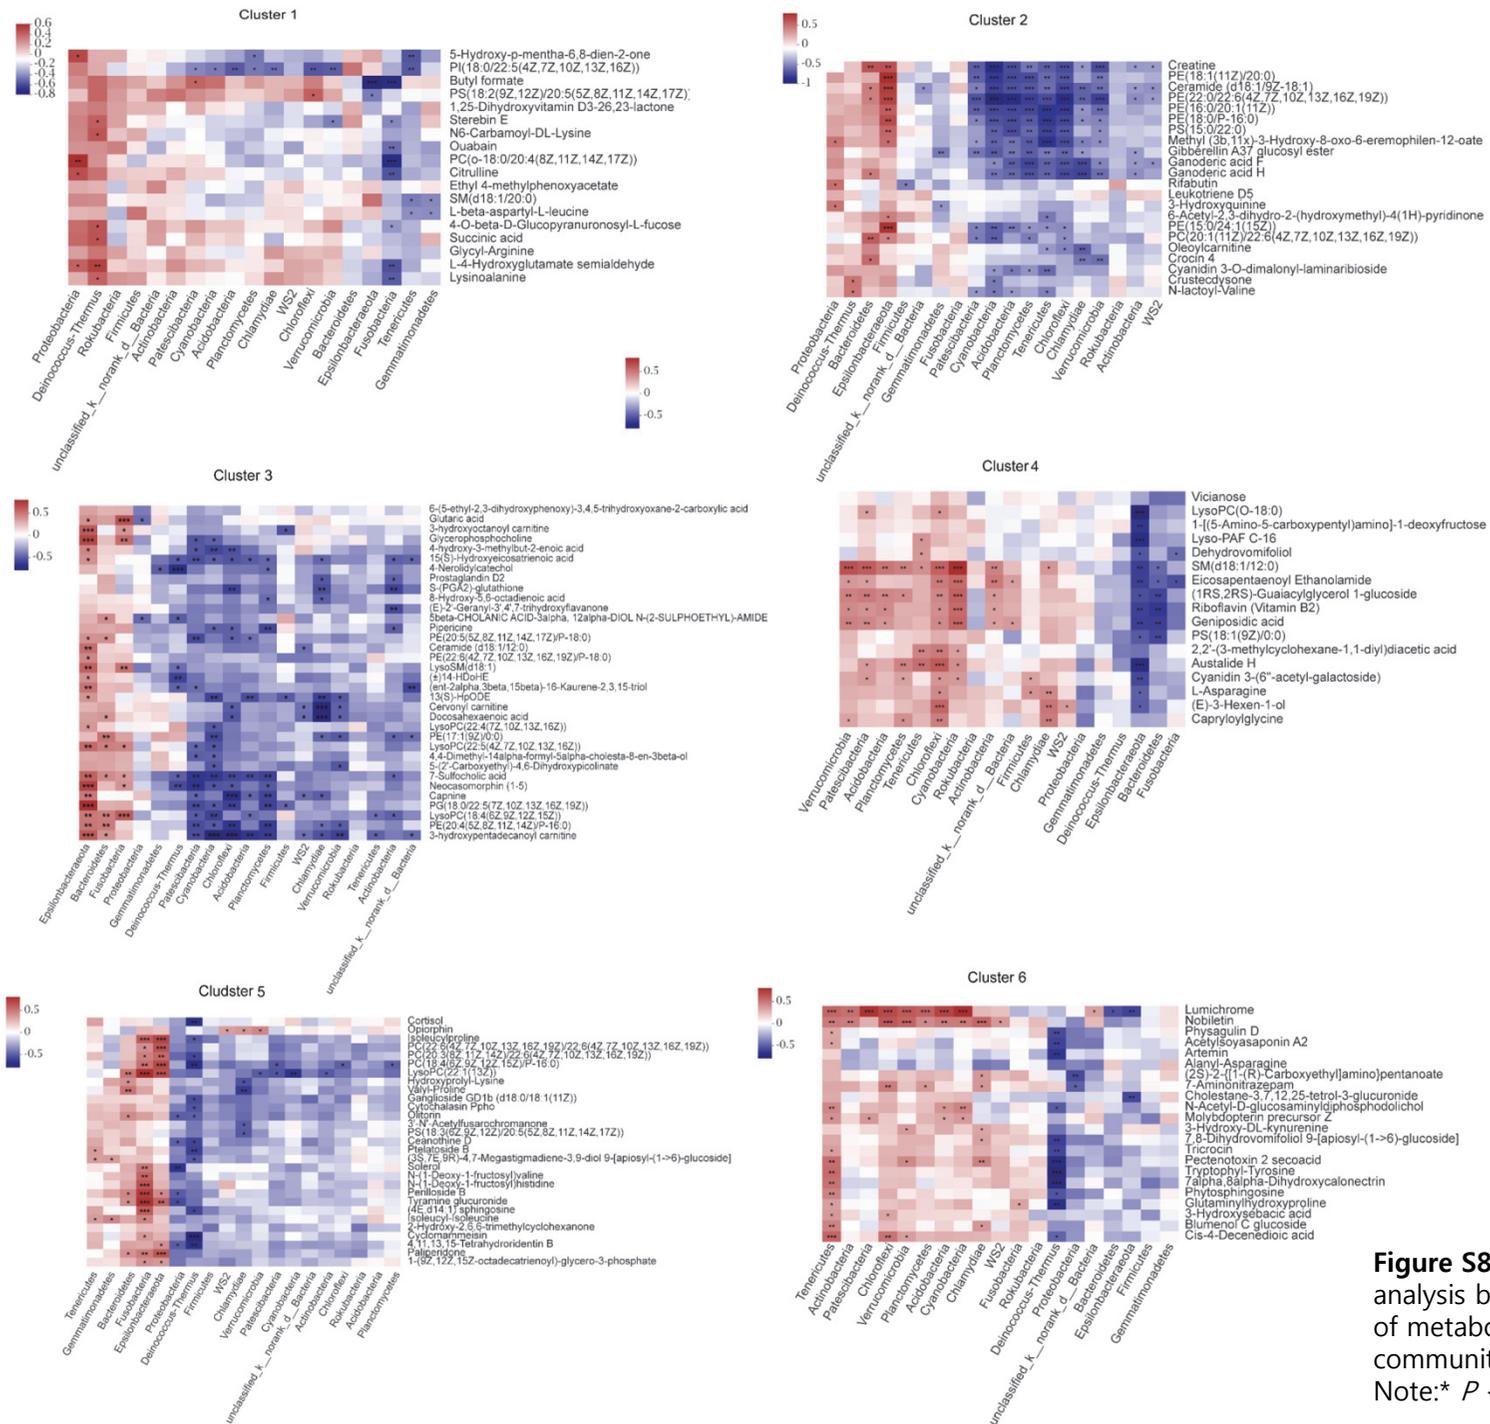

**Figure S5.** KEGG enrichment analysis for differential metabolites identified between the pond and river groups. Note: \*  $P < 0.05$ , \*\*  $P < 0.01$ , \*\*\*  $P < 0.001$ .

**Figure S6.** KEGG enrichment analysis for differential metabolites identified between the lake and river groups. Note: \*  $P < 0.05$ , \*\*  $P < 0.01$ , \*\*\*  $P < 0.001$ .

**Figure S7.** KEGG enrichment analysis for differential metabolites identified between the pond and lake groups. Note: \*  $P < 0.05$ , \*\*  $P < 0.01$ , \*\*\*  $P < 0.001$ .

**Figure S8.** Spearman's correlation analysis between the abundance of metabolites and gut microbiome communities in the identified clusters. Note: \*  $P < 0.05$ , \*\*  $P < 0.01$ , \*\*\*  $P < 0.001$ .
