Slow converters (N=12)	+	+	-

Fast converters: culture conversion between T0 and T1  
 Slow converters : culture conversion between T1 and T2

**Supplementary Figure 1. Flow diagram describing the enrollment and exclusion of participants with active TB, latent TB infection, and healthy donor participants from the different cohorts.** ATB patients were followed-up at four different time points throughout antibiotic therapy: at month 2 (T1), at the end of treatment (T2), and 2 months after treatment completion (T3). Fast converters are ATB patients with culture conversion between T0 and T1. Slow converters are ATB patients with culture conversion between T1 and T2
