* All categories of peripheral artery disease diagnosis (intermittent claudication, critical limb ischaemia, or other peripheral atherosclerosis) present in claims data for a patient during the lookback period were included. Patients were allowed to have more than one diagnosis if they received a claim for more than one peripheral artery disease condition during the lookback period.

** A standardised mean difference (SMD) of >0.10 was considered significant and are bolded in the Table.

ARB: angiotensin II receptor blocker; BMS: bare metal stent; DCB: drug-coated balloon; DES: drug-eluting stent; HMO: Health Maintenance Organisation; PPO: Preferred Provider Organisation; PTA: percutaneous transluminal angioplasty; SMD: standardised mean difference
