

1 Supplementary Figure 1 | Fraction of total all-cause DALYs attributable to malaria, diarrhoea, or LRIs

- 2 The combined DALYs burden of malaria, diarrhoea, or LRI experienced by children under-5 is compared to
- 3 the total DALYs burden experienced by children under-5 in 2000, 2005, 2010, and 2017.

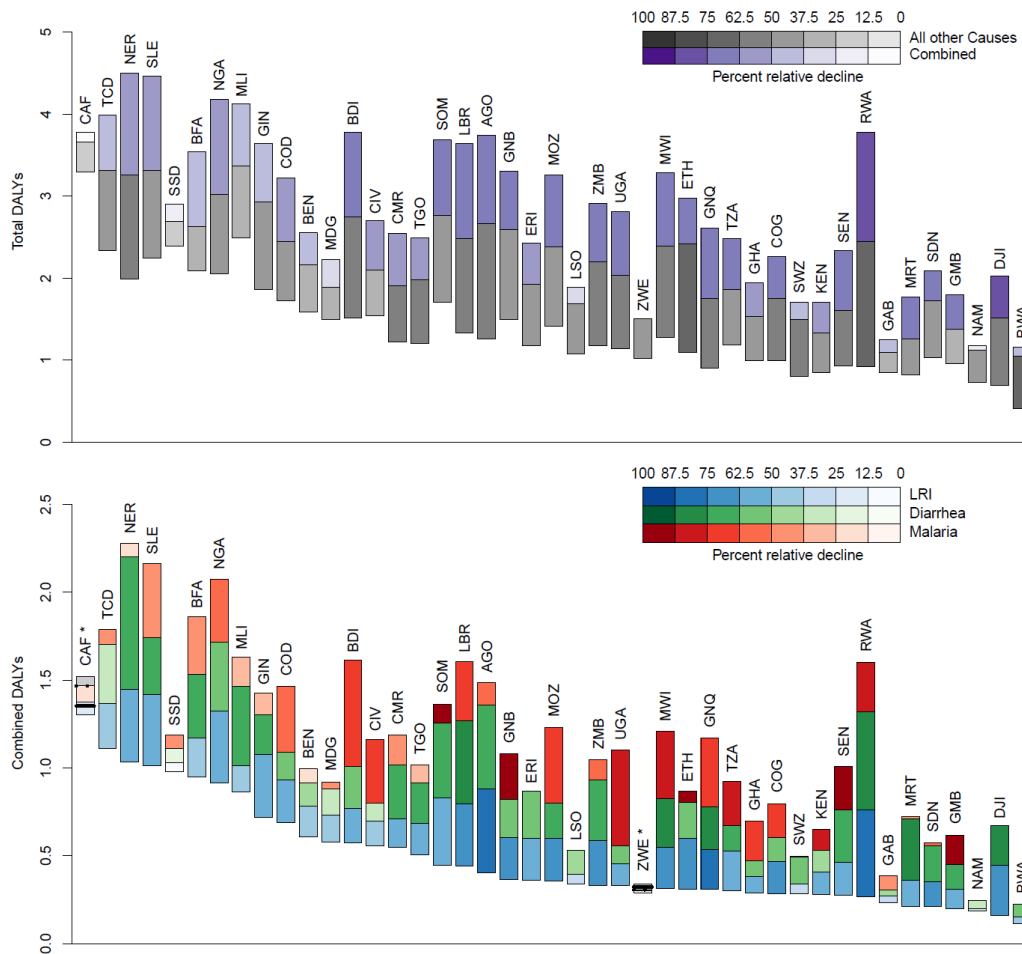

4

5

6 **Supplementary Figure 2 | Change in DALYs by country, 2000–2017**

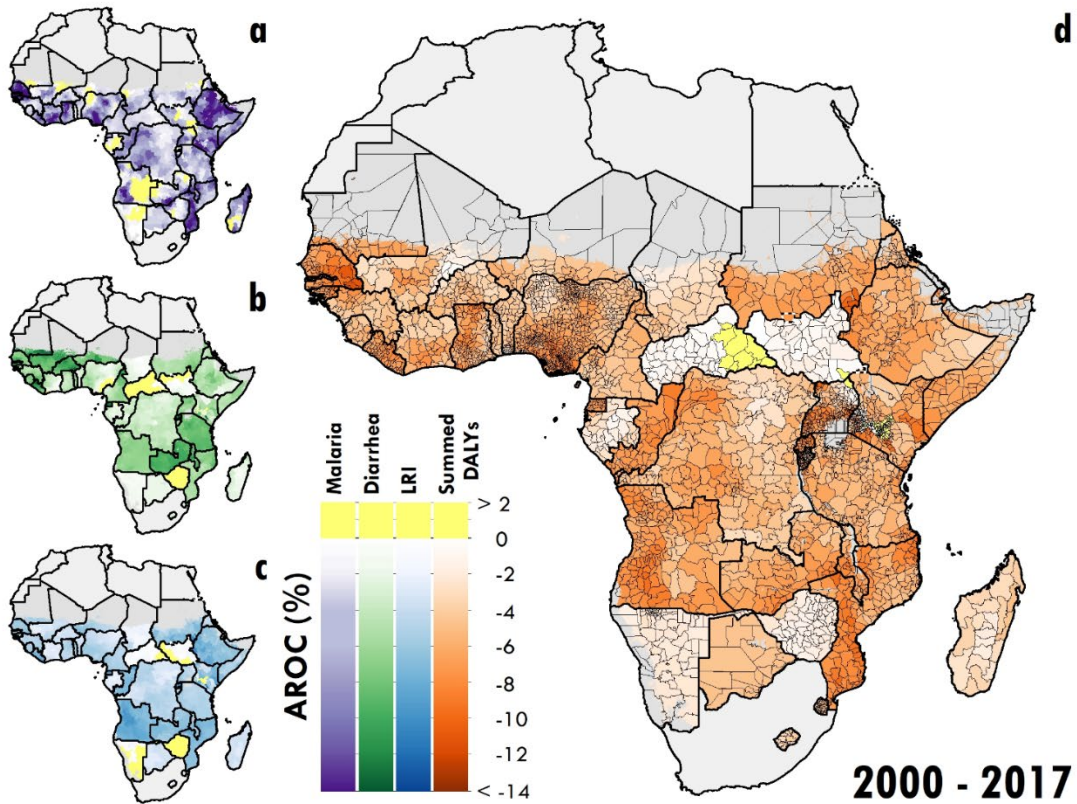

7 **a–b**, Composition of combined diarrhoea, LRI, and malaria DALYs compared to all-cause DALYs (**a**), and  
 8 the composition of diarrhoea, LRI, and malaria DALYs within this three-cause envelope (**b**). Each vertical  
 9 bar represents a country (designated by ISO 3166-1 alpha-3 codes). **a**, The total length of the bar  
 10 represents the change in all-cause DALYs between 2000 and 2017; the location of the top of the bar  
 11 indicates the DALY rate in 2000, and the location of the bottom of the bar indicates the DALY rate in  
 12 2017. Each bar is divided into two sections to represent the proportion of all-cause DALYs that are due to  
 13 diarrhoea, LRIs, and malaria; the top half (purple) represents the proportion of DALYs due to these three  
 14 causes, the bottom half (grey) represents the proportion of DALYs that are due to every other cause. The  
 15 colour gradients indicate the change in DALYs between 2000 and 2017. Darker colours represent a larger  
 16 percentage relative decline than lighter colours. **b**, The total length of the bar represents the change in  
 17 DALYs due to diarrhoea, LRIs, and malaria between 2000 and 2017. Each bar is divided into three  
 18 segments that represent the proportion of diarrhoea, LRI, and malaria burden in 2000, respectively. The  
 19 colour gradients indicate the change in DALYs between 2000 and 2017. Darker colours represent a larger  
 20 percentage relative decline than lighter colours. Bars are ordered by combined DALYs in 2017 and  
 21 countries with \* indicate at least one of the three causes had an increase in burden from 2000 to 2017.  
 22

**Supplementary Figure 3 | Annualised rates of change (AROC), 2000-2017**

24  
25  
26  
27  
28

a–d, Yearly AROCs are plotted at the second administrative unit level for 2000-2017 for **a**, malaria, **b**, diarrhoea, **c**, LRIs, and **d**, the combined DALY rates. Yellow represents the small number of regions where the burden increased over this period. Maps were produced using ArcGIS Desktop 10.6.

29  
30  
31  
32

Supplementary results: DALYs rate per child per year in 2000 and 2017 by country and unit. Upper and lower values indicate bounds of 95% UI. AROC indicates annualized rate of change between 2000 and 2017.
