

Supplemental Table A. Comparison of race assigned at randomization with race allocation for racial analysis of primary outcomes.

	Race and ethnicity assignment for outcomes analysis based on patient survey responses
--	--

Race assigned at randomization by research staff based on patient answers to structured questions	Black	Hispanic	White	Other
Black	869 (91.2%)	2 (0.4%)	8 (0.9%)	7 (22.6%)
Hispanic	5 (0.6%)	465 (92.5%)	3 (0.4)	1 (3.2%)
White	9 (0.9%)	22 (4.4%)	849 (98.4%)	1 (3.2%)
Multiracial	63 (6.6%)	9 (1.7%)	1 (0.1%)	5 (16.2%)
Other	7 (0.7%)	5 (1.0%)	2 (0.2%)	17 (54.8%)
Total	953	503	863	31

Supplemental Table B. Comparison of patient self-reported race and ethnicity with race and ethnicity allocation for outcomes analysis.

	Race and Ethnicity Assignment for Outcomes Analysis			
Patient Self-Reported Race and Ethnicity on Survey 1	Black	Hispanic	White	Other
Black	841 (88.3%)	0 (0%)	0 (0%)	0 (0%)
Hispanic	0 (0%)	462 (91.9%)	0 (0%)	0 (0%)
White	0 (0%)	0 (0%)	826 (95.7%)	0 (0%)
Other single race group	0 (0%)	0 (0%)	0 (0%)	22 (71.0%)

Biracial [†]	89 (9.3%)	37 (7.4%)	36 (4.2%)	6 (19.4%)
Multiracial (≥3 race groups)	1 (0.1%)	4 (0.7%)	1 (0.1%)	3 (9.6%)
Total	953	503	863	31

[†]Biracial (Other) includes patients that selected Black, Hispanic, or White and one other race/ethnicity outside of the previously identified biracial categories (i.e. Black and Native American or White and Asian).
