**Table S3** Quality assessment scale for rating the risk of bias

Bias type	Low risk (score=2)	Moderate risk (score=1)	High risk (score=0)
Selection (sample population)	1) Sample from the general population, not a select group; 2) Consecutive unselected population; 3) Rationale for case and control selection explained.	1) Sample selected from large population but selection criteria not defined; 2) Sample selection ambiguous but may be representative; 3) Rationale for cases and controls not explained; 4) Eligibility criteria not explained; 5) Analysis to adjust for sampling strategy bias.	1) Highly select population making it difficult to generalise finding; 2) Sample selection ambiguous and sample unlikely to be representative.
Selection (sample size)	1) Sample size calculation performed and adequate.	1) Sample size calculation performed and reasons for not meeting sample size given; 2) Sample size calculation not performed but all eligible persons studied.	1) Sample size estimation unclear or only sub-sample studied.
Selection (participation)	1) High response rate (>85%).	1) Moderate response rate (70-85%).	1) Low response rate (<70%); 2) Response rate not reported.
Performance bias (outcome assessment)	1) Assessment from independent objective assessment or individual secure records; 2) Assessment from administrative database or register (hospital record or linkage record).	1) Assessment from self-report	1) Assessment from non-validated data or generic estimate from the overall population.
Performance bias (analytical methods to control for bias)	1) Analysis appropriate for the type of sample (subgroup analysis / regression etc.).	1) Analysis does not account for common adjustment.	1) Data confusing.

**Table S4** Univariable and multivariable meta-regression models of cluster-level factors related to the adherence rate of cervical cancer screening (logit form)

Moderator	No. of studies	No. of data points	$\beta^b$	95 % CI	P value
Age (per year increase)	87	327	-0.0070	(-0.0072, -0.0068)	<0.0001
Year investigated (per year increase) <sup>a</sup>	87	327	0.0427	(0.0419, 0.0436)	<0.0001
SDI (per 1% increase) <sup>a</sup>	87	327	0.1014	(0.0990, 0.1038)	<0.0001
Area <sup>a</sup>	87				
	Other	283	Reference		
	Urban	7	0.1487	(0.0960, 0.2014)	<0.0001

- 130 Petrelli A, et al.
- 143 Zamorano-Leon JJ, et al.
- 152 Pelullo CP, et al.

#### Associated factor 9: Parity (n=11)

- 1 Cohen MM, et al.
- 12 Lee J, et al.
- 61 Hansen BT, et al.
- 73 Olesen, SC, et al.
- 88 Oussaid N, et al.
- 89 Cerigo H, et al.
- 103 Visanuyothin S, et al.
- 110 Barbadoro P, et al.
- 120 Leinonen MK, et al. (<45 years old)
- 120 Leinonen MK, et al. ( $\geq 45$  years old)
- 149 Deguara M, et al.

#### Associated factor 10: Mental illness (n=3)

- |     |                        |
|-----|------------------------|
| 35  | Chen LS, et al.        |
| 47  | Martin-Lopez R, et al. |
| 138 | Kaso M, et al.         |

Associated factor 11: Chronic disease (n=9)	
47	Martin-Lopez R, et al.
50	Lopez-de-Andres A, et al.
71	Martin-Lopez R, et al.
104	Ricardo-Rodrigues I, et al.
107	Richard A, et al.
117	Bianco A, et al.
127	Cofie LE, et al.
143	Zamorano-Leon JJ, et al.
140	Charkhchi P, et al.

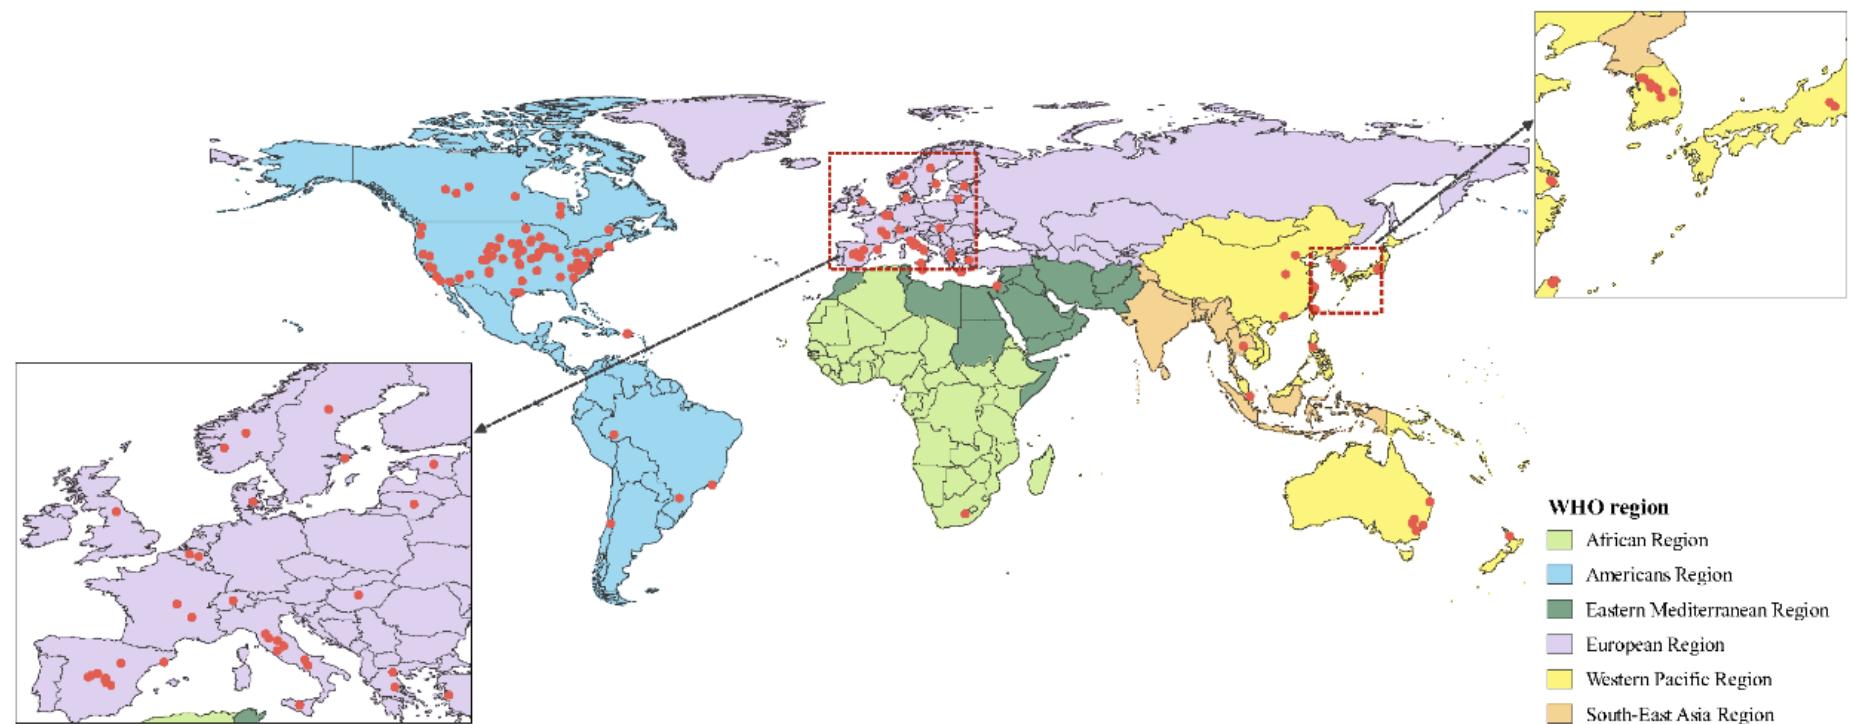

Abbreviations: BMI, body-mass index; CI, confidence interval. The definitions of some associated factors varied slightly across studies. Odds ratios for binary variable associated factors indicated better adherence to cervical cancer screening compared with those without the associated factor, except for married (vs not married), married (vs single), partnered (vs not partnered), currently married (vs never married), previously married (vs never married), married (vs divorced/widowed/separated), divorced/widowed/separated (vs single), high school (vs less than high school), higher than high school (vs less than high school), underweight/BMI <18.5 kg/m<sup>2</sup> (vs normal/BMI 18.5-24.9 kg/m<sup>2</sup>), overweight/BMI 25.0-30.0 kg/m<sup>2</sup> (vs normal/BMI 18.5-24.9 kg/m<sup>2</sup>), obesity/BMI ≥30.0 kg/m<sup>2</sup> (vs normal/BMI 18.5-24.9 kg/m<sup>2</sup>), and smoker (vs non-smoker), current smoker (vs former/never), current smoker (vs never), former smoker (vs never).

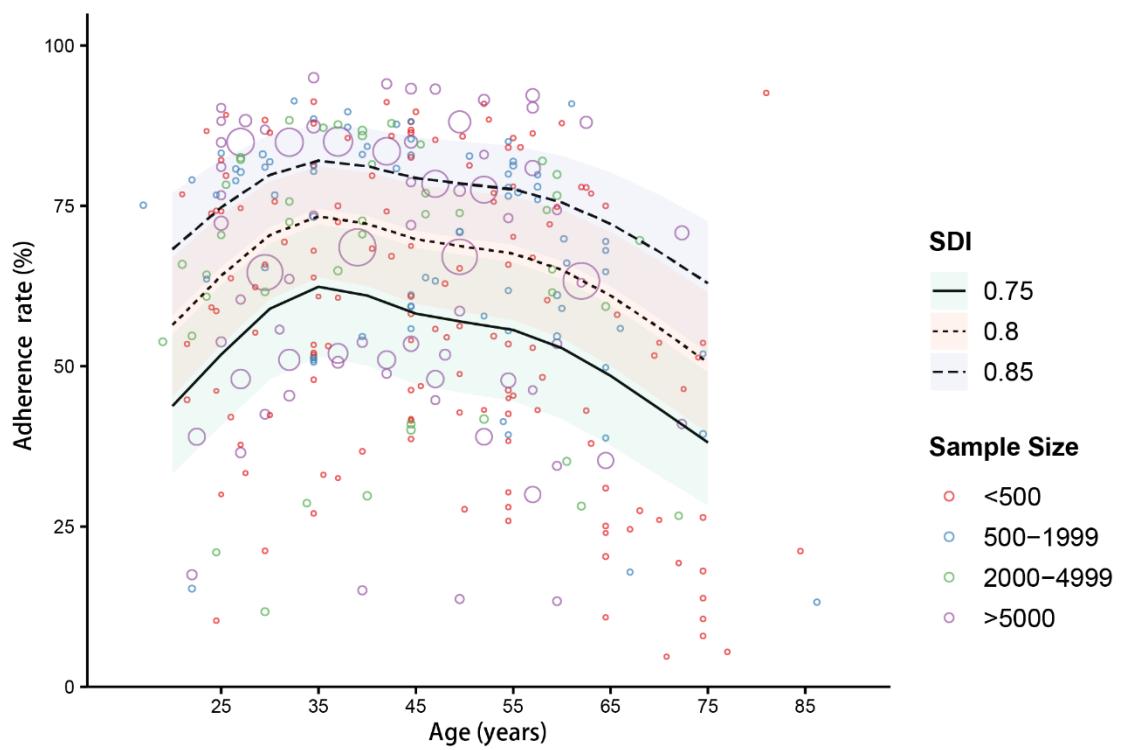

**Table S9** Pooled or reported adherence rate of cervical cancer screening in 28 countries with available data

Country	No. of articles	No. of data points	Sample size	Adherent women	Adherence rate (95%CI), %
Australia	5	5	48,813	25,484	57.91% (41.89-73.13)
Belgium	2	5	10,961,017	6,481,271	60.03% (57.24-62.79)
Brazil	3	3	1,625	1,204	74.53% (66.63-81.69)
Canada	8	8	158,891	121,596	75.16% (66.52-82.89)
Chile	1	1	1,042	800	76.78% (74.21-79.34)
China	8	8	5,838,110	3,041,043	34.69% (23.40-46.93)
Denmark	1	1	1,052,447	868,957	82.57% (82.49-82.64)
Estonia	1	1	3,226	1,205	37.35% (35.68-39.02)
France	2	2	7,368	5,652	82.30% (65.75-94.21)
Greece	3	3	763	378	43.27% (25.62-61.84)
Hungary	1	1	3,306	2,446	74.00% (72.50-75.50)
Israel	1	1	489,663	225,795	46.11% (45.97-46.25)
Italy	8	8	136,911	67,088	53.57% (37.53-69.25)
Japan	2	2	164,471	71,368	42.33% (37.23-47.51)
Lithuania	1	5	4,248	2,877	67.76% (62.32-72.97)
Malta	1	1	407	281	69.00% (64.50-73.50)
New Zealand	1	1	234	131	55.98% (49.61-62.35)
Norway	2	2	1,321,737	873,486	77.09% (54.22-93.63)
Singapore	1	1	726	302	41.60% (38.01-45.19)
South Africa	1	1	2,529	296	11.70% (10.45-12.95)
South Korea	8	12	31,529	15,029	46.25% (38.96-53.62)
Spain	10	10	64,338	43,612	66.04% (59.64-72.16)
Sweden	2	2	2,623,312	1,568,359	55.27% (46.15-64.22)
Switzerland	1	1	7,319	5,336	72.90% (71.88-73.92)
Thailand	1	1	595	389	65.40% (61.57-69.23)
Turkey	1	1	227	89	39.21% (32.84-45.57)
United Kingdom	2	2	1,035	815	74.79% (61.11-86.35)
United States of America	75	83	1,255,717	880,534	72.69% (68.93-76.29)

Abbreviations: CI, confidence interval.

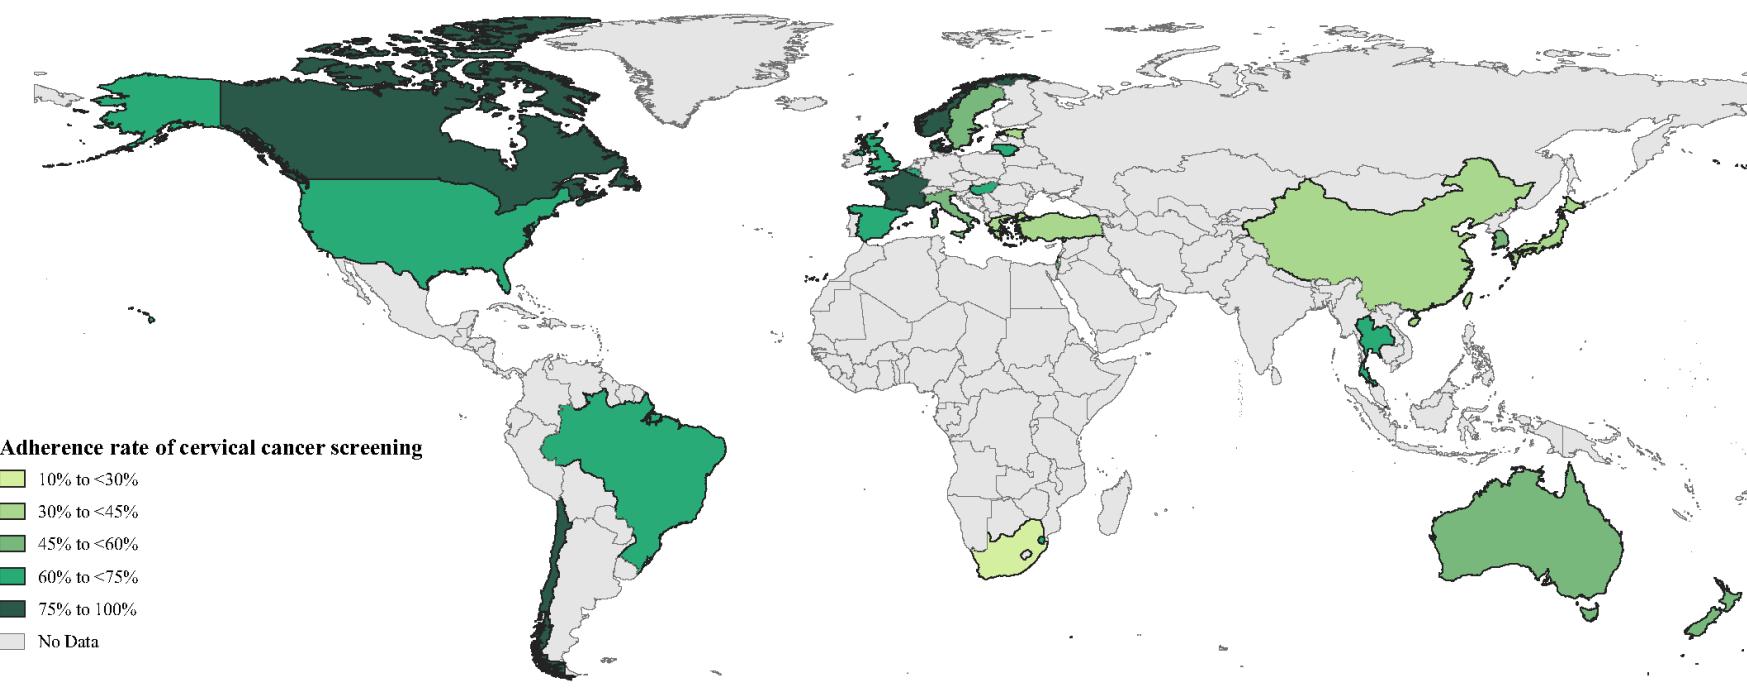

**Figure S1** Geographic distribution of the included studies

**Figure S2** The estimated relation between age and adherence rates of cervical cancer screening based on informative data points from the included articles, by SDI

Abbreviations: SDI, Socio-demographic Index. The size of the bubble is proportional to the number of individuals in the sample.

**Figure S3** Adherence rate of cervical cancer screening by country
