Description of Supporting Information

Supplementary Data 1 | sciMET Oligos. Tables containing the oligonucleotide sequences for the tagmentation and PCR processing steps.

Supplementary Data 2 | sciMET cell information. A tab-delimited gzipped text file containing per-cell statistics for each cell.

Supplementary Data 3 | Cluster-based promoter CG methylation. Methylation levels for gene promoters for each cluster.

Supplementary Data 4 | Neuron cluster-based promoter CG methylation. Methylation levels for gene promoters specifically for neuronal clusters.

Supplementary Data 5 | Neuron cluster-based gene body CH methylation. Methylation levels in the CH context for gene bodies specifically for neuronal clusters.
