

Supplemental Data Figure 3. Immunoblot analysis of a *D. immitis* protein somatic extract and *B. malayi* culture using mAb 2E6. Lane 1 shows the molecular weight marker. Lane 2 is run with *D. immitis* somatic whole worm extract. Lane 3 contains concentrated culture media in which *B. malayi* adult male and female worms were kept for 7 days, containing only excreted proteins.
