

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/jtd-22-583	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	We are willing to share de-identified individual demographic, peri-operative, and pathologic data for patients in the study.
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	No other relevant documents are available.
5	When will data availability begin?	Upon document publication.
6	When will data availability end?	Two years after publication date, as we may seek to publish updated data as our clinical experience with this subject grows.
7	To whom will you share the data?	Medical investigators and clinicians with expertise in lung cancer.
8	For what type of analysis or purpose?	For comparison of our findings in other settings that treat similar conditions.
9	How or where can the data/documents be obtained?	Investigators can request data sharing by contacting Dr. Mark Berry via email (berry037@stanford.edu).
10	Any other restrictions?	We will consider all requests individually to ensure the data will be used ethically and sharing is approved by our home institution
