<i>Other<sup>e</sup></i>	275	72	59
No	3,305	93	88
<b>Family History of Cancer<sup>c</sup></b>			
Yes	2,630	70	72

No	720	22	20
Not Sure	308	8	8

<sup>a</sup> Weighted percentages. These were calculated using jackknife replication.

<sup>b</sup> Participants who reported being employed full or part time were categorized as “employed”. Participants who were retired, disabled, students, homemakers or other were categorized as “not employed.”  $n = 121$  participants were missing responses for employment.

<sup>c</sup>  $n = 377$  participants were missing for income and 109 were missing responses for family history of cancer.

<sup>d</sup> The “other” category included participants who were widowed, divorced, or separated.

<sup>e</sup> Participants belonging to the “other” cancer type category included those with bladder cancer, bone cancer, cervical cancer, colon cancer, endometrial cancer, head/neck cancer, Hodgkin’s Lymphoma, renal cancer, leukemia, liver cancer, lung cancer, non-Hodgkin’s, oral cancer, ovarian cancer, pancreatic cancer, pharyngeal cancer, rectal cancer, melanoma, or another type of cancer.
