

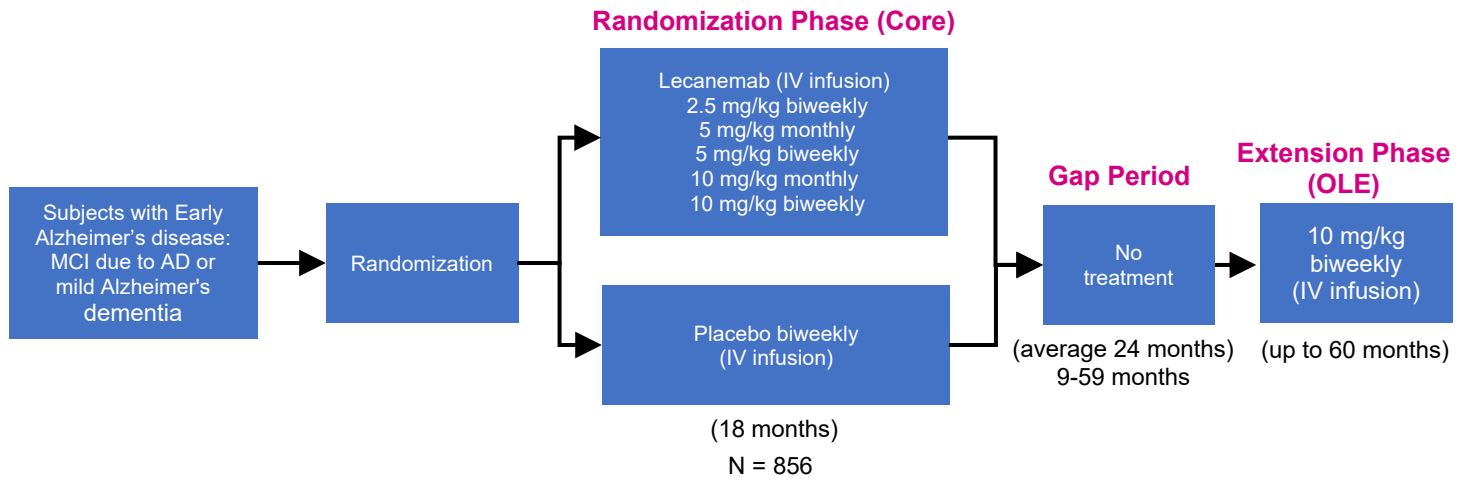

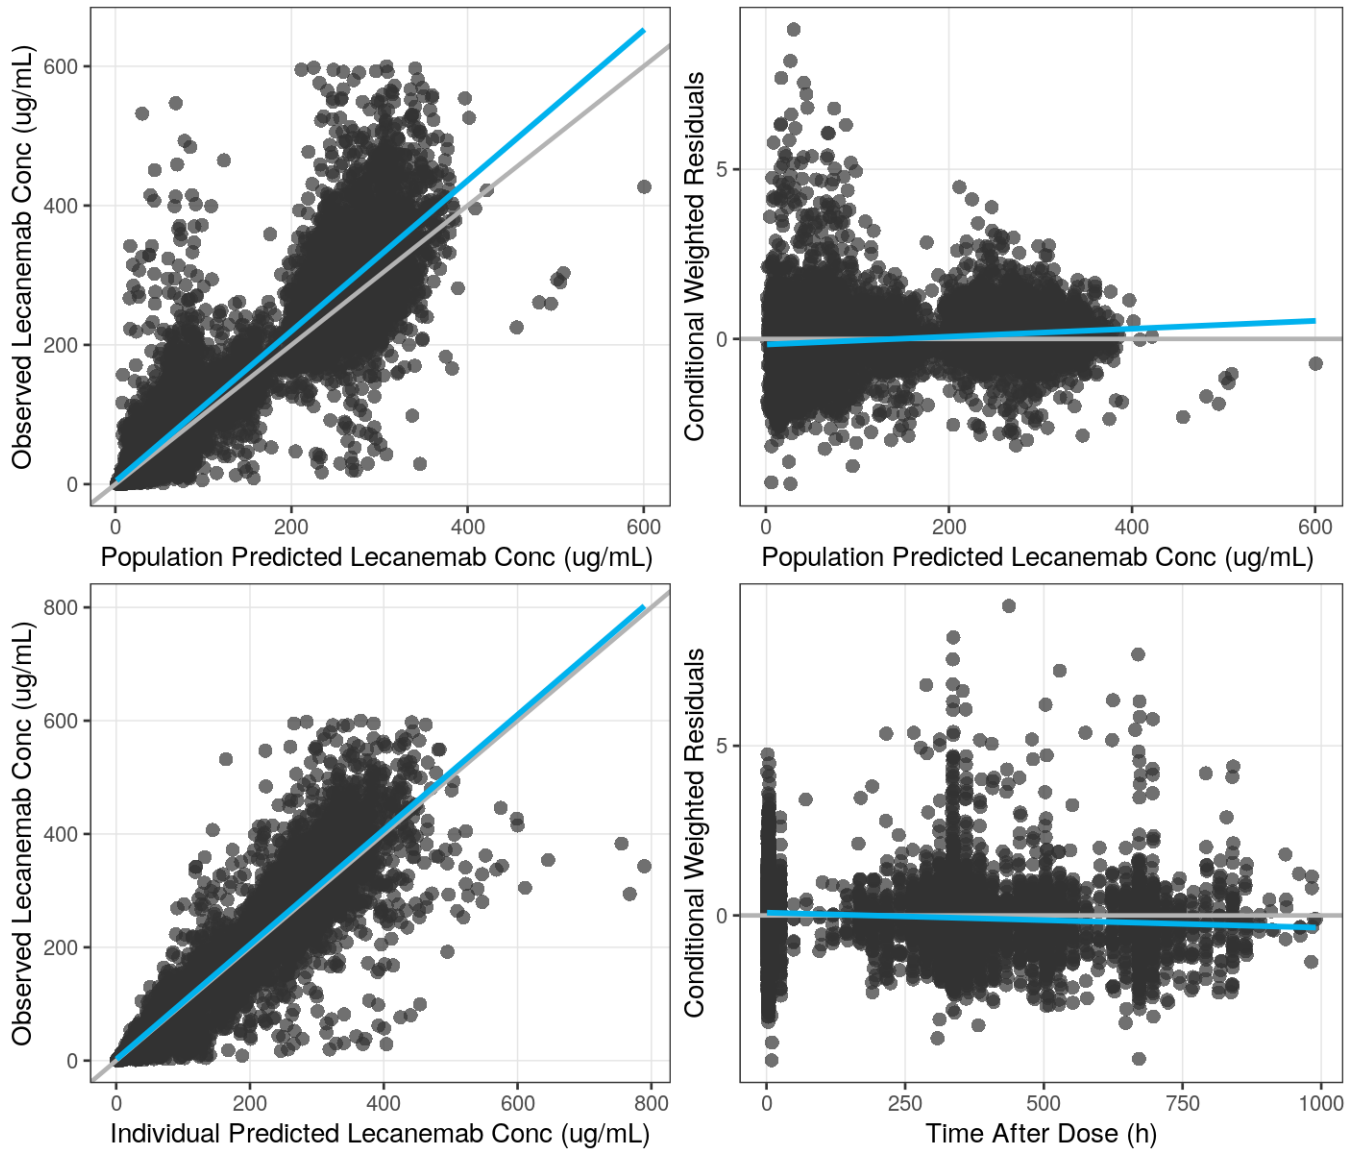

Figure S1. Design of Study 201 (Core and OLE)

AD, Alzheimer's disease; IV, intravenous; MCI, mild cognitive impairment; OLE, open label extension

Figure S2. Goodness-of-fit plots for the final lecanemab PK model

The gray line is the line of unity (predictions match observed) and the blue line is a linear regression line.

**Figure S3. Prediction-corrected visual predictive check plots of observed and predicted lecanemab concentrations for final PK model stratified by study (Top Left= 101; Top Right = 104; Bottom = 201)**
