

1165

1166 **Figure S2:** Differential microRNA expression profile of ADSC-NVs and ADSC-
 1167 EVs. (A) Hierarchical clustering assay of differentially expressed miRNAs
 1168 between ADSC-NVs and ADSC-EVs. (B) Venn diagram showing 210 shared
 1169 miRNA species between ADSC-EVs and ADSC-NVs, 215 upregulated miRNAs
 1170 and 123 downregulated miRNAs in ADSC-NVs. (C) Volcano plot of miRNAs in
 1171 ADSC-NVs and ADSC-EVs. The red points indicate significantly upregulated
 1172 miRNAs (fold change ≤ 0.5 and ≥ 2 and P value ≤ 0.05) in ADSC-NVs,
 1173 whereas green points indicate upregulated miRNAs in ADSC-EVs.
