

ONLINE SUPPLEMENTARY DOCUMENT

Title: Survival of gastric cancer in China from 2000 to 2022: A nationwide systematic review of hospital-based studies

Authors: Houqiang Li, Han Zhang, Hujia Zhang, Youxin Wang, Xiaobing Wang, Haifeng Hou

Table S1 Checklist of PRISMA Statement

Section/Topic	Checklist Item	Reported or not
TITLE		
Title	Identify the report as a systematic review, meta-analysis, or both.	Y
ABSTRACT		
Structured summary	Provide a structured summary including, as applicable: background; objectives; data sources; study eligibility criteria, participants, and interventions; study appraisal and synthesis methods; results; limitations; conclusions and implications of key findings; systematic review registration number.	Y
INTRODUCTION		
Rationale	Describe the rationale for the review in the context of what is already known.	Y
Objectives	Provide an explicit statement of questions being addressed with reference to participants, interventions, comparisons, outcomes, and study design (PICOS).	Y
METHODS		
Protocol and registration	Indicate if a review protocol exists, if and where it can be accessed (e.g., Web address), and, if available, provide registration information including registration number.	Y
Eligibility criteria	Specify study characteristics (e.g., PICOS, length of follow-up) and report characteristics (e.g., years considered, language, publication status) used as criteria for eligibility, giving rationale.	Y
Information sources	Describe all information sources (e.g., databases with dates of coverage, contact with study authors to identify additional studies) in the search and date last searched.	Y
Search	Present full electronic search strategy for at least one database, including any limits used, such that it could be repeated.	Y
Study selection	State the process for selecting studies (i.e., screening, eligibility, included in systematic review, and, if applicable, excluded in the	Y

	meta-analysis).	
Data collection process	Describe method of data extraction from reports (e.g., piloted forms, independently, in duplicate) and any processes for obtaining and confirming data from investigators.	Y
Data items	List and define all variables for which data were sought (e.g., PICOS, funding sources) and any assumptions and simplifications made.	Y
Risk of bias in individual studies	Describe methods used for assessing risk of bias of individual studies (including specification of whether this was done at the study or outcome level), and how this information is to be used in any data synthesis.	Y
Summary measures	State the principal summary measures (e.g., risk ratio, difference in means).	Y
Synthesis of results	Describe the methods of handling data and combining results of studies, if done, including measures of consistency (e.g., I ²) for each meta-analysis.	Y
Risk of bias across studies	Specify any assessment of risk of bias that may affect the cumulative evidence (e.g., publication bias, selective reporting within studies).	Y
Additional analyses	Describe methods of additional analyses (e.g., sensitivity or subgroup analyses, meta-regression), if done, indicating which were pre-specified.	Y
RESULTS		
Study selection	Give numbers of studies screened, assessed for eligibility, and included in the review, with reasons for exclusions at each stage, ideally with a flow diagram.	Y
Study characteristics	For each study, present characteristics for which data were extracted (e.g., study size, PICOS, follow-up period) and provide the citations.	Y
Risk of bias within studies	Present data on risk of bias of each study and, if available, any outcome-level assessment (see Item 12).	Y
Results of individual studies	For all outcomes considered (benefits or harms), present, for each study: (a) simple summary data for each intervention group and (b) effect estimates and confidence intervals, ideally with a forest plot.	Y
Synthesis of results	Present results of each meta-analysis done, including confidence intervals and measures of consistency.	Y
Risk of bias across studies	Present results of any assessment of risk of bias across studies (see Item 15).	Y
Additional analysis	Give results of additional analyses, if done (e.g., sensitivity or subgroup analyses, meta-regression [see Item 16]).	Y
DISCUSSION		
Summary of evidence	Summarize the main findings including the strength of evidence for each main outcome; consider their relevance to key groups (e.g., health care providers, users, and policy makers).	Y

Limitations	Discuss limitations at study and outcome level (e.g., risk of bias), and at review level (e.g., incomplete retrieval of identified research, reporting bias).	Y
Conclusions	Provide a general interpretation of the results in the context of other evidence, and implications for future research.	Y
FUNDING		
Funding	Describe sources of funding for the systematic review and other support (e.g., supply of data)	Y

Y: the item was reported in article, N: the item was not reported.

Table S2 Search strategy of systematic review

Databases	Search strategy	Numbers of studies
English databases		
PubMed	((stomach neoplasms]) OR (gastric cancer) OR (gastric carcinoma) AND ((China) OR (Chinese)) AND (hospital) AND (survival)	10,175
Embase	('stomach neoplasms' OR 'stomach neoplasms' OR 'gastric cancer' OR 'gastric carcinoma') AND ('China' OR 'Chinese') AND ('hospital') AND ('survival' OR 'survival')	12,443
Web of science	((stomach neoplasms) OR (gastric cancer) OR (gastric carcinoma)) AND ((China) OR (Chinese)) AND (survival) AND (hospital))	9,980
Chinese databases		
CNKI	胃癌(gastric cancer) AND 生存(survival) AND 医院(hospital)	2,271
Wanfang	胃癌(gastric cancer) AND 生存(survival) AND 医院(hospital)	1,820

Table S3 Scale for quality assessment

Criteria	Score
Representativeness of cases	
Characteristics of participants were described.	1
Consecutive/randomly selected from case population was clearly defined.	1
Eligible patients are similar to controls, in term of age, gender and other important characteristics.	1
The percentage of loss to follow-up was provided, or the reasons of loss to follow-up were mentioned.	1
Accuracy of information	
Methods of variable measurement were offered	1
Definitions of outcome were offered.	1
Statistical analyses	
Methods of statistical analyses were adequate to resolve research hypothesis.	1
Multivariate analyses were performed.	1
Final question	
If there were any other important flaws in the design, the study would be not included.	1

P, prospective study; R, retrospective study; NA, not available

Table S5 Pooled survival rates (%) and 95% CIs of gastric cancer in four time periods

Survival	2000-2005		2006-2010		2011-2015		2016-2022	
	N	SR (95% CI)						
1-year	33	76.8(71.5-82.1)	67	77.9(75.0-80.9)	139	75.5(73.2-77.7)	130	73.7(71.1-76.3)
2-year	12	48.8(34.5-63.1)	20	54.5(43.8-65.3)	73	57.2(50.3-64.1)	67	52.1(44.9-59.4)
3-year	36	49.3(41.5-57.1)	67	49.9(43.7-56.2)	143	54.3(49.1-59.5)	92	56.0(50.9-61.0)
5-year	51	44.5(38.2-50.8)	83	37.7(33.5-41.9)	115	45.9(41.5-50.3)	46	53.1(44.8-61.4)

N, numbers of included studies; SR, survival rate; CI, confidence interval.
