

This survey is very short (3-5 min) and it will help us a lot with our research. The objective of this study is to know the perceptions of cancer risk. Knowing perceptions about cancer and its underlying factors can help inform and guide cancer prevention efforts.

This study is carried out by researchers from ICO/IDIBELL. Your data will be treated anonymously and the Organic Law 3/2018 on the Protection of Personal Data and Guarantee of Digital Rights will be respected. Ethical approval: PR294/21. Contact: info@mejorsincancer.org

Thank you very much!

I understand the purpose of this study, and I grant consent to the use of my responses for the purposes of this study.

Yes/No

Age

<18 / 18-24 / 25-29/ 30-34 / 35-39 / 40-44 / 45-49 / 50-54 / 55-59 / 60-64 / 65-69 / >=70

Gender

- Woman
- Man
- Non binary
- DK/NO

Country of residence: _____

Were you born in the same country in which you now live?

- No
- Yes

[If No] Country of birth: _____

Education level

- No studies
- Primary studies completed
- Completed high school Post-high school training other than college (vocational or technical)
- College graduate Master's degree / grad school completed
- Doctoral degree
- DK/NO

Is your work related to the medical field?

- No
- Yes
- DK/NO

Compared with other people your age, how likely are you to get cancer in your lifetime?

- Very likely
- Likely
- Neither unlikely or likely
- Unlikely
- Very unlikely
- DK/NO

Have you been vaccinated against COVID-19?

- Yes, I have received 3 doses
- Yes, I have received 2 doses
- Yes, I have received 1 dose
- No, but I want to get vaccinated
- No, and I don't know if I will get vaccinated
- No, definitively will not get vaccinated
- DK/NO

[If No] Why haven't you been vaccinated?: _____

What type of medicine do you prefer?

- I prefer conventional medicine
- I prefer conventional medicine, complemented with alternative or integrative medicine
- I am not sure
- I prefer alternative or integrative medicine, complemented by conventional medicine
- I prefer alternative or integrative medicine

How much do you agree that each of these can increase a person's chance of developing cancer?

Strongly disagree – Disagree - Not sure – Agree - Strongly agree

- 1) Exposure to non-ionizing electromagnetic frequencies (WiFi, TV, radio)
- 2) Eating food containing additives
- 3) Living near power lines
- 4) Feeling stressed
- 5) Eating food containing artificial sweeteners
- 6) Using cleaning products
- 7) Using mobile phones
- 8) Eating genetically modified food
- 9) Using aerosol containers
- 10) Physical trauma, for example a punch or squeeze
- 11) Using microwave ovens
- 12) Drinking from plastic bottles
- 13) Smoking any cigarettes at all
- 14) Exposure to another person's cigarette smoke
- 15) Drinking more than 1 unit of alcohol a day
- 16) Eating less than 5 portions of fruit and vegetables a day
- 17) Eating red or processed meat once a day or more
- 18) Being overweight (BMI over 25)
- 19) Getting sunburnt more than once as a child
