

Title: Supplementary Data 1.

Description: Mouse DEGs per cell type

Title: Supplementary Data 2.

Description: Integrated mouse OPC and OL DEGs

Title: Supplementary Data 3.

Description: Mouse WGCNA & cWGCNA gene members, WGCNA stats

Title: Supplementary Data 4.

Description: Causal network gene members and interactions, IRIS3, LISA.

Title: Supplementary Data 5.

Description: ATACseq Tobias differential binding results

Title: Supplementary Data 6.

Description: Human sample metadata and demographics

Title: Supplementary Data 7.

Description: Human cluster markers regression CAG by lineage

Title: Supplementary Data 8.

Description: Human DEGs OPC and OL by region, GO, and venn analysis

Title: Supplementary Data 9.

Description: Human Gene module scores by lineage grade levine clusters

Title: Supplementary Data 10.

Description: R61 genotype DEGs

Title: Supplementary Data 11.

Description: R61 TB v Veh DEGs

Title: Supplementary Data 12.

Description: R61 TB v NT DEGs
