Supplementary Materials 2: SoMi Measure

¹The task you are about to do involves two people; you and someone else. Imagine that the other person is someone you haven't met before, and will not knowingly meet again in the future (because you will not get to know or see each other in person).

Also imagine that you both get to choose one of the objects that are shown on the paper. There are only a few objects left. Once taken, these will not be replaced. In this task, you always get to choose first. You will have to make several choices.

So to summarize:

You and someone else can each choose one among the products shown on the paper.

It is important to remember that you always choose first!

→ *Make your choice by circling the number under the product you would like to take.*

First, here's an example. Which of these objects would you take? You pick first, then the other!

Now turn the page to start the task.

Remember that there's two of you, and that you always choose first!
Which of these objects would you take? You pick first, then the other person!

Supplementary Materials 3: Individual-level variables for Part 1

Age

- Age (in years): _____

Gender

- Gender: _____

Trust in others²

1. I dare to put my fate in the hands of most other people
2. I completely trust most other people
3. When push comes to shove, I do not trust most other people – reverse coded

Responses were recorded on a scale from 1 (*completely disagree*) to 7 (*completely agree*) and an average score for all items was calculated.

Others trust in you²

1. I think that most other people dare to put their fate in my hands
2. I think that most other people trust me
3. When push comes to shove, most other people do not trust me – reverse coded

Responses were recorded on a scale from 1 (*completely disagree*) to 7 (*completely agree*) and an average score for all items was calculated.

Economic conservatism

- Please indicate your political beliefs from left/liberal to right/conservative on issues of the economy (e.g., social welfare, government spending, tax cuts):

Responses were recorded on a scale from 1 (*left/liberal*) to 7 (*right/conservative*).

Social conservatism

- Please indicate your political beliefs from left/liberal to right/conservative on social issues (e.g., immigration, homosexual marriage, abortion):

Responses were recorded on a scale from 1 (*left/liberal*) to 7 (*right/conservative*)

MacArthur Scale of Subjective Socioeconomic Status³

- Think of this ladder as representing where people stand in <country>. At the top of the ladder are the people who have the most money, most education, and most respected jobs. At the bottom are the people who have the least money, least education, and least respected jobs or no job. The higher up you are on this ladder, the closer you are to the people at

the very top, and the lower you are, the closer you are to the people at the very bottom. Where would you place yourself on this ladder? Please select a number corresponding to the rung where you think you stand at this time in your life, relative to other people in <country>.

Responses were recorded on a scale from 1 (*least money, job prestige and education*) to 10 (*most money, job prestige and education*)

Supplementary Materials 4: Country-level variables for Part 1

Table S2. Country level variables and associated sources for Part 1

Variable	Description	Source
Trust	“Most people can be trusted” – recoded to 1 (<i>need to be very careful</i>) or 2 (<i>most people can be trusted</i>)	World Values Survey (Wave 6) ⁴ and European Values Survey (2017) ⁵
Religiosity	“Important in life: Religion” – recoded to 1 (<i>not at all important</i>) to 4 (<i>very important</i>)	World Values Survey (Wave 6) ⁴ and European Values Survey (2017) ⁵
Civic Cooperation	<p>“How justifiable is it to:</p> <ol style="list-style-type: none"> 1. Cheat on taxes 2. Not pay for a public bus fare 3. Claim government benefits you aren’t entitled to” <p>Average of responses from all three questions on a scale recoded to 1 (<i>always justifiable</i>) to 10 (<i>never justifiable</i>)</p>	World Values Survey (Wave 6) ⁴ and European Values Survey (2017) ⁵
Rule of Law	A measure for the confidence individuals have in the rules of society as well as the likelihood those individuals abide by those rules. Scores range from -2.5 (<i>weak rule of law</i>) to 2.5 (<i>strong rule of law</i>)	https://databank.worldbank.org/source/worldwide-governance-indicators/preview/on# ⁶
Democracy	The state of democracy in the country, measuring pluralism, civil liberties and political culture. Measured from 0 (<i>least democratic</i>) to 10 (<i>most democratic</i>)	Economist Intelligence Unit https://www.eiu.com/n/campaigns/democracy-index-2020/ ⁷
Global Competitiveness Index	A compilation of 12 facets of competitiveness. A scale from 0 (<i>less competitiveness</i>) to 100 (<i>more competitiveness</i>)	http://www3.weforum.org/docs/WEF_TheGlobalCompetitivenessReport2019.pdf ⁸

World Press Freedom Index	Degree of freedom available to journalists in the country. Measured from 0 (<i>least freedom</i>) to 100 (<i>most freedom</i>)	https://rsf.org/en/index ⁹
Environmental Performance Index (EPI)	Rank of performance on 24 environmental health indicators. Ranked from 0 (<i>worst performance</i>) to 100 (<i>best performance</i>)	http://epi.yale.edu ¹⁰
Hofstede's Cultural Dimensions	Six cultural dimensions: Power Distance, Individualism, Masculinity, Uncertainty Avoidance, Long Term Orientation, and Indulgence	https://www.hofstede-insights.com/product/comparison-countries/ ¹¹
GNI per capita	The income of a country per year divided by the number of people in that country in US\$	https://data.worldbank.org/indicator/NY.GNP.PCAP.CD ¹²
GDP per capita	The economic output of a country per year divided by the number of people in that country in US\$	https://data.worldbank.org/indicator/NY.GDP.PCAP.CD ¹³
Gini Index	A measure of economic inequality in a country. The index ranges from 0 (perfect equality) to 100 (perfect inequality)	https://www.cia.gov/the-world-factbook/field/gini-index-coefficient-distribution-of-family-income/country-comparison ¹⁴

Supplementary Materials 5: Individual-level variables for Part 2

Moral Expansiveness Scale ¹⁵

People sometimes talk about '***circles of moral concern***'. These circles are simple ways to make sense of the *levels of moral consideration we have for different entities* (e.g., people, animals, and the environment).

Where we place these entities within our moral circles is important and has direct consequences for how we treat them. For example, you might have close family or friends that are central to your moral world, this means you would be willing to make personal sacrifices for them. However, if we do not include an entity within our moral circles, this means we do not believe they are deserving of moral care and consideration, and wouldn't want to make sacrifices for them.

On the following page you are given the opportunity to organise a range of entities and place them within your own moral circles that reflect your individual views and feelings.

Please read the four moral boundary descriptions below before completing the moral circle task.

- **Inner Circle of Moral Concern:** These entities deserve the **highest level of moral concern and standing**. You have a moral obligation to ensure their welfare and feel a sense of personal responsibility for their treatment.

- **Outer Circle of Moral Concern:** These entities deserve **moderate moral concern and standing**. You are concerned about their moral treatment; however, your sense of obligation and personal responsibility is greatly reduced.
- **Fringes of Moral Concern:** These entities deserve **minimal moral concern and standing**, but you are not morally obligated or personally responsible for their moral treatment.
- **Outside the Moral Boundary:** These entities deserve **no moral concern or standing**. Feeling concern or personal responsibility for their moral treatment is extreme or nonsensical.

Having carefully read these descriptions, please consider the **level of moral concern you have for each of the entities below and select the appropriate moral circle placement**. Please note, there are no right or wrong answers – we just want to know your opinion.

- Rose bush
- Elected leader of your country (position, not specific individual)
- Close friend
- Mentally challenged individual
- Supporter of opposing political party
- Soldier of your country
- Fish
- Charity worker
- Terrorist
- Refugee
- Foreign citizen
- Chicken
- Partner/spouse
- Somebody with different religious beliefs
- Murderer
- Apple tree
- Co-worker
- Old-growth forest
- Bee
- Chimpanzee
- Homosexual
- Coral reef
- Redwood tree
- National park
- Somebody from your neighborhood
- Citizen of your country
- Cow

- Child molester
- Dolphin
- Family member

Responses are coded as 3 (*inner circle of moral concern*), 2 (*outer circle of moral concern*), 1 (*fringes of moral concern*) or 0 (*outside the moral boundary*). Responses to each entity are added together to create a total moral expansiveness score between 0 (*least morally expansive*) to 90 (*most morally expansive*).

Attitudes towards immigrants ¹⁶

1. Immigrants take resources and employment opportunities away from <Country>
2. In schools where there are too many children of immigrants, the quality of education will suffer
3. Immigrants abuse the system of social benefits
4. <Country> norms and values are being threatened by the presence of immigrants
5. The cultural practices of immigrants threaten the <Country> way of life
6. Immigrants are a threat to the <Country> identity

Responses were recorded on a scale from 1 (*strongly disagree*) to 7 (*strongly agree*) and an average score for all items was calculated.

Schwartz 'Universalism' Value ¹⁷

The next questionnaire asks about the things you personally value in life. Please answer in the space to the left of each item. First read the list of values below and choose the value that is most important to you and rate it **7**. Next, choose the value that is opposed to what you value and rate it **-1**. If there is no such value, choose the value least important to you and rate it **0** or **1**, according to its importance. **Then rate the rest of the values in the list:**

- Universalism, that is, equality, a world at peace, wisdom, social justice, broadmindedness, to enjoy the beauty of nature and the arts, to feel unity with nature and to protect the environment

Responses were recorded on a scale from -1 (*opposed to my principles*) to 7 (*very important*)

Perceptions of anomie ^{18,19}

- Social anomie
 1. People think that there are no clear moral standards to follow
 2. Everyone thinks of himself/herself and does not help others in need
 3. Most of people think that if something works, it doesn't really matter whether it is right or wrong
 4. People do not know who they can trust and rely on

- 5. Most of the people think that honesty doesn't work all the time; dishonesty is sometimes a better approach to get ahead
- 6. People are cooperative – reverse coded
- Government anomie
 - 1. The government works towards the welfare of people – reverse coded
 - 2. The government is legitimate – reverse coded
 - 3. The government uses its power legitimately – reverse coded
 - 4. Politicians don't care about the problems of average person
 - 5. The government laws and policies are effective – reverse coded
 - 6. Some laws are not fair

Responses were recorded on a scale from 1 (*strongly disagree*) to 7 (*strongly agree*) and an average score for all items was calculated to achieve a total anomie score. We calculated separate averages to achieve a social anomie and government anomie score.

Schwartz 'Benevolence' Value ¹⁷

The next questionnaire asks about the things you personally value in life. Please answer in the space to the left of each item. First read the list of values below and choose the value that is most important to you and rate it **7**. Next, choose the value that is opposed to what you value and rate it **-1**. If there is no such value, choose the value least important to you and rate it **0** or **1**, according to its importance. **Then rate the rest of the values in the list:**

- Benevolence, that is, to be loyal, honest, helpful, responsible, and forgiving

Responses were recorded on a scale from -1 (*opposed to my principles*) to 7 (*very important*)

Supplementary Materials 6: Country-level variables for Part 2

Table S3. Country level variables and associated sources for Part 2

Variable	Description	Source
Environmental Care	A sub-measure of the Citizenship Index from the US News Best Country measures. This provides a score for how much care a country puts into the environment. Ranked from 0 (<i>worst performance</i>) to 100 (<i>best performance</i>)	https://www.usnews.com/news/best-countries/citizenship-rankings ²⁰
Minorities as neighbors	Participants asked what categories of people they would not like to have as neighbors from: people of a different race, heavy drinkers, immigrants/foreign workers, drug addicts, homosexuals. Responses are recorded for each category as 1 (mentioned) or 2 (not mentioned) and an average was obtained. Higher values indicate greater tolerance for minorities.	World Values Survey (Wave 6) ⁴ and European Values Survey (2017) ⁵
Child quality: tolerance/respect	Participants are given a list of qualities children are encouraged to learn at home. They are asked to indicate five that they believe are important, including 'tolerance/respect' as an option. Recoded as 1 (<i>not mentioned</i>) or 2 (<i>mentioned</i>). Higher scores indicate greater value placed on this trait.	World Values Survey (Wave 6) ⁴ and European Values Survey (2017) ⁵
Trust	Percentage of individuals who think most people can be trusted. Obtained from Our World in Data.	https://ourworldindata.org/trust ²¹
Social Capital Index	A collated measure of five indices of social capital: health, equality, crime, freedom, and satisfaction. Higher values indicate more social capital. Obtained from the Global Sustainable Competitiveness Index.	https://solability.com/the-global-sustainable-competitiveness-index/the-index/social-capital

22

Citizenship Index	<p>From the US News Best Country measures. The Citizenship Index provides a measure of positive global citizenship by collating the following measures: well-distributed political power, cares about the environment, gender equality, cares about human rights, progressive, respects property rights, religious freedom, trustworthy. Ranked from 0 (<i>worst performance</i>) to 100 (<i>best performance</i>)</p>	<p>https://www.usnews.com/news/best-countries/citizenship-rankings²⁰</p>
Voice & Accountability of people	<p>A worldwide governance indicator subscale from the World Bank. The measure assesses citizen participation in government and freedom of expression. Scores approximately range between -2 (<i>worst performance</i>) to 2 (<i>best performance</i>)</p>	<p>http://info.worldbank.org/governance/wgi/²³</p>
Collective action	<p>Have participants engaged in these behaviors:</p> <ol style="list-style-type: none"> 1. Signed a petition 2. Attended a peaceful protest <p>Average of responses from both questions were recoded on a scale from 1 (<i>would never do</i>), 2 (<i>might do</i>) 3 (<i>have done</i>). Higher values indicate more collective action.</p>	<p>World Values Survey (Wave 6)⁴ and European Values Survey (2017)⁵</p>
Child quality: unselfishness	<p>Participants are given a list of qualities children are encouraged to learn at home. They are asked to indicate five that they believe are important, including 'unselfishness' as an option. Recoded as 1 (<i>not mentioned</i>) or 2 (<i>mentioned</i>). Higher scores indicate greater value placed on this trait.</p>	<p>World Values Survey (Wave 6)⁴ and European Values Survey (2017)⁵</p>

Supplementary Materials 10: Results for Linear Mixed Model Containing all Country Level Variables for Part 2

Based on advice from reviewers, we placed all nine of our country-level variables from Part 2 in the same model (Table S47). We removed three variables that had an unacceptable Variation Inflation Factor (VIF) above 5 (Table S48). We then conducted a second model (Table S49) with the remaining 6 country-level variables. We found that greater tolerance for minorities as neighbors and greater social capital were associated with social mindfulness. This suggests that many of our constructs may broadly reflect social capital and a tolerance for outgroup members.

Table S47. First Model Examining the Effect of Nine Country-Level Variables on Social Mindfulness

<i>Predictors</i>	Social Mindfulness		
	<i>Estimates</i>	<i>CI</i>	<i>p</i>
(Intercept)	-0.03	-0.34, 0.29	.865

N (Country)	29		
Observations	4474		
Marginal R ² / Conditional R ²	.338 / .576		

Table S48. Variance Inflation Factor for Nine Variables from Table S47.

Variable	VIF
Care for the environment	6.45
Tolerance for minorities as neighbors	3.02
Child quality: Tolerance/respect	2.54
Trust	2.61
Social capital	2.32
Collective action	6.77
Citizenship Index	15.90
Voice and accountability of people	3.09
Child quality: Unselfishness	1.72

Table S49. Second Model Examining the Effect of Six Country-Level Variables with Acceptable VIF on Social Mindfulness

<i>Predictors</i>	Social Mindfulness		
	<i>Estimates</i>	<i>CI</i>	<i>p</i>
(Intercept)	-0.03	-0.31, 0.25	.830
Tolerance for minorities as neighbors	0.53	0.14, 0.92	.010
Child quality: Tolerance/respect	-0.10	-0.48, 0.29	.608
Trust	0.05	-0.28, 0.37	.772
Social capital	0.49	0.14, 0.83	.007
Voice and accountability of people	0.07	-0.31, 0.44	.721
Child quality: Unselfishness	0.05	-0.31, 0.40	.787
Random Effects			
Residual	1.00		
Country (intercept)	0.61		
ICC	.38		
N (Country)	34		
Observations	5246		
Marginal R ² / Conditional R ²	.297 / .562
