

Supplementary figures

Supplementary figure 1. The number of new GBS patients and SARS-CoV-2 vaccines administered, stratified by age groups from 2020 to 2021. The number of new GBS patients in 2020 - 2021, and the number of SARS-CoV-2 vaccines administered in 2021 are collectively portrayed in this figure. The bold red line represents SARS-CoV-2 vaccination; the dotted black line, the number of GBS patients in 2020; and the bold black line, the number GBS patients in 2021. The x-axis represents months from January to December (identical for 2020 and 2021). The y-axis flanking the left side represents the number of newly diagnosed GBS patients in 2020-2021. The y-axis flanking the right side represents the number of SARS-CoV-2 vaccines administered in 2021.
